## SPECIALIST IN PET FOOD PACKAGING

MAKING FUTURE • FLEXIBLE PACKAGING

### About us

We are a Spanish company, based in Madrid, which has been manufacturing flexible plastic packaging since 1970. PetFood dry pouches, both in traditional and in the new recyclable ones. We can do any size, type and reclose system.

**50** Years on the market

**500** mm of packaging manufactured every year

**1.000** tons recycled

### Our value

We cover all the steps of the value chain:

- Coextrusion, printing, lamination, slitting, preformed bag, in order to provide our customers with a product of the highest quality.
- Coextrusion: 3 and 5 layers.
- Flexo HD technology (from 1 to 10 inks).
- Lamination with and without solvents.
- Packaging bag: from 200g to 20 kg, multiple formats and accessories.

### Our markets

We supply **70** plants in Europe.

## Quality certifications

We apply the assessment by Ecovadis and we are members of Ceflex, collaborations on European sustainable design standards.

## MDO / PE Coextrusion

In this step we transform the ingredients into a PE film. This structure is designed to replace PET, and can be provided with an oxygen and water vapour barrier in this or subsequent steps, even without the use of PVdC or EVOH. And we achieve also:

- Barrier taylor made (from no one till very high one).
- Soutable for food contact.
- Excellent printability.
- High trasparency.
- Tear- resistant.
- Large sealing window.
- Soutable for Dry foods, snaks, Frozen and Chilled food and also Non Food applications that requires barrier.

## Barrier properties

Example barrier MDO/PE estructura.

OTR 23° C, 50% RH

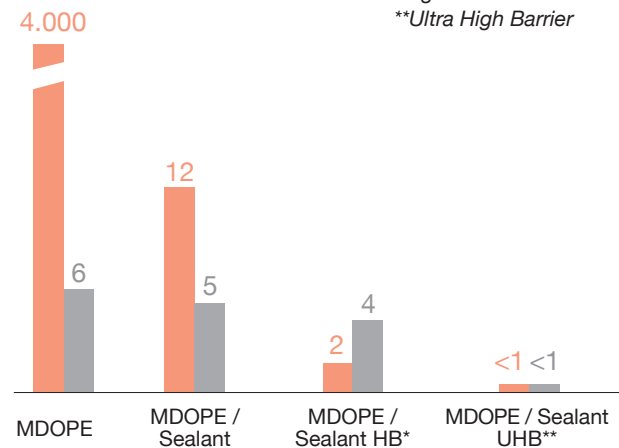

WVTR 37° C, 90% RH

■ OTR

■ WVTR

\*High Barrier

\*\*Ultra High Barrier

The data and facts contained herein are based on our and others reseachs, and are accurate on their conditions. But no guarantee of their accuracy is made since we are in the experimental phase. Also the use indications are only possibilities, that must be checked by the user's own test.
