The Revolution
in Glass.
Experiencing
indoor space
anew.

— Think wow.

superview – WHY

We believe that people have a deep longing for peace and space. That's why we've made it our mission to bring limitless freedom to many people in their personal living space. Maximum transparent and aesthetically groundbreaking – for a carefree and safe living experience without any noticeable boundaries.

superview – HOW

The fascination of our superview sliding door systems lies in the minimization of visible elements with an unprecedented consistency. By dissolving the boundaries between inside and outside, we expand the individual living space. Thanks to a unique material concept in our sliding doors, aesthetically inspiring room concepts are now also affordable for a larger group of users.

superview – WHAT

We develop minimalist sliding door systems as a flowing connection between inside and outside. The experience of freedom can be individually configured using our groundbreaking online planning tool. With practical training, we support our partners in the proper installation of our supervisory systems.

superview – Think wow.

We offer minimalistically designed sliding door systems at the lowest possible prices to enable many people to have a feeling of limitless freedom.

superview sees itself as a partner for architects, specialist and production companies as well as ambitious builders, commercial or private.

– Think wow.
