

L'EVOLUZIONE DELLA PIETRA *dal 1951*
L'ADOZIONE DELLA PIETRA *ANCORA*

STONE EVOLUTION

Stone is the natural element for excellence that has always been used in architecture and beyond. During its life it has been changing shapes, colors and uses, but it has never lost the qualities that have always been appreciated by people. Its solidity, resistance, reliability and its being 100% recyclable are a proof of its being an extremely versatile and innovative material.

Our projects aims to reinvent the stone, to keep it alive and to offer solid, resistant and reliable solutions that are on the cutting edge and that can be used in both modern and contemporary environments.

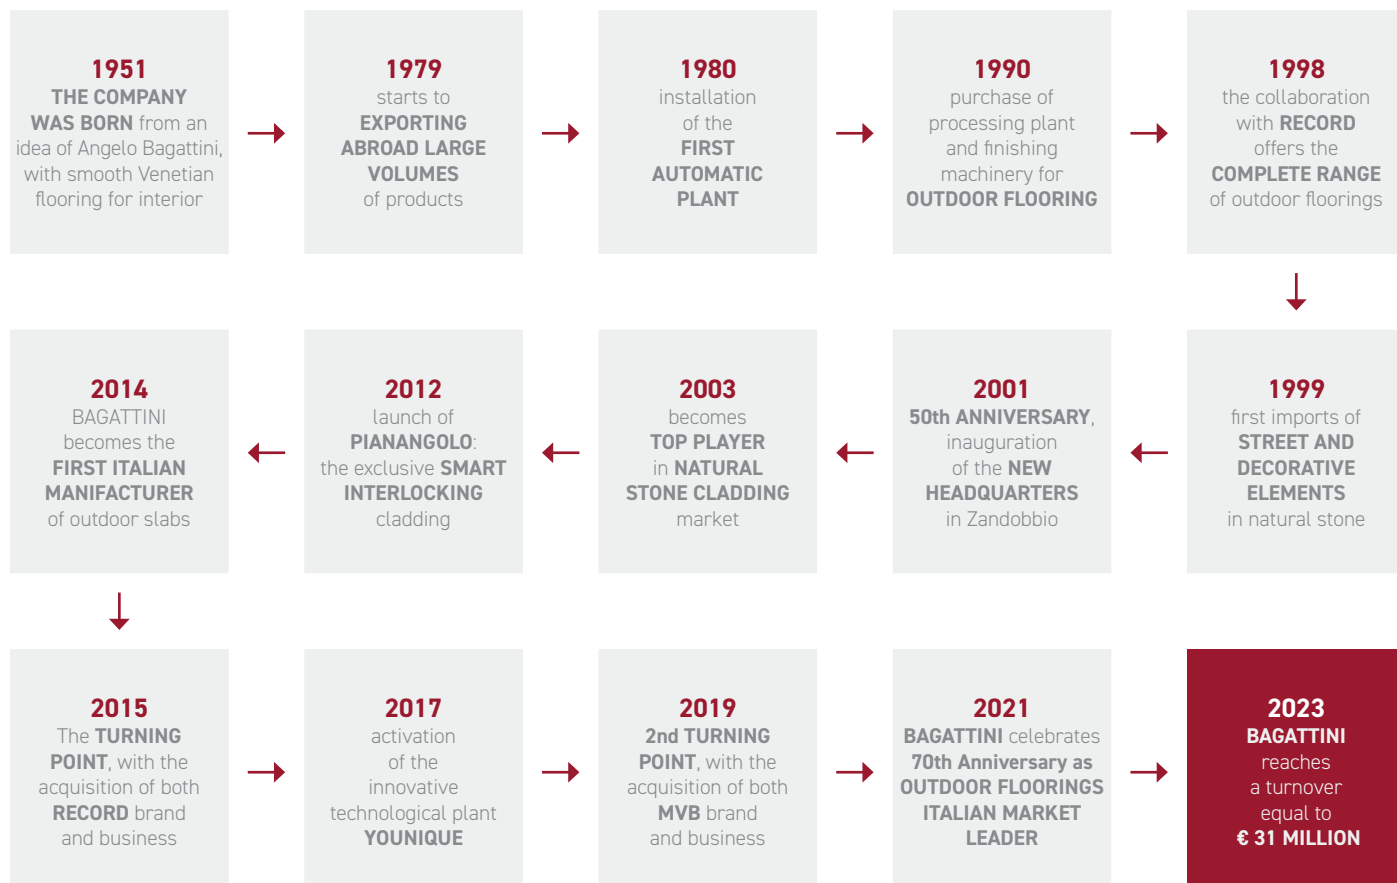

OUR STRENGTH

BAGATTINI was born in 1951 thanks to Angelo Bagattini as a small family company. Over time it has always been defined by quality and innovation. Today it has 4 production sites, a total area of about 150,000 square meters and a daily production of over 10,000 square meters of outdoor flooring available in several sizes, thicknesses, colors and finishes.

since 1951

- Since the acquisition of RECORD brand and business in 2015, our production includes new items as masonry and segmental retaining walls. This allows us to offer an increasingly wide range of outdoor solutions by proposing innovative ideas for design and renewal of urban, residential, commercial and industrial areas.
- YOUNIQUE was born from BAGATTINI and RECORD laboratories experience.
It is the first customizable concrete flooring that is able to fit every customer's need, helping him to express his unique personality, his unique taste and his unique vision of life.
- At the beginning of 2019 BAGATTINI acquires MVB: an important player in the outdoor flooring field. This operation adds further know-how to BAGATTINI's reality. Increasing the high technological level and guaranteeing an annual production capacity of over 2,000,000 square meters of flooring, available in several sizes, thicknesses, colors and finishes.
- In order to follow each realization in the best possible way, BAGATTINI founds PAVIMENTA: the service company that offers a "turnkey service" to the end-customer, from design consultancy to installation. PAVIMENTA provides a staff with thirty years experience in outdoor flooring, curbs and retaining walls installation.

360° QUALITY

We strongly believe that quality underlies everything: it is essential for us to carefully select raw materials, starting from the smallest sand grain. Each step of the product life, from design to installation, follows the same philosophy of constant improvement. We work with this in mind to be able to offer high-quality and technologically advanced solutions, which can meet any new and ever-changing need of customers.

BAGATTINI®

BAGATTINI S.r.l.

BAGATTINI produces outdoor flooring slabs in several colors, sizes and finishes. A best seller is BAGAFLAME series, which particular flamed colors reminds the natural granite and sandstone cromia. BAGATTINI's offer also includes natural stone cladding for internal and external walls, such as the BAGASTONE line (strips of 2/3 cm thick stone) where you can find the exclusive PIANANGOLO. It is a "smart interlocking" cladding that allow the covering of both plain surfaces and corners by using the same module.

PROJECTS

Over the years, our companies collaborated with worldfamous designers and architects such as Renzo Piano, Studio Lombardini22, Gregotti and Fuksas.

Among the most successful projects we mention:

- Mc Arthur Glenn Outlet Village in Serravalle, Northern Italy;
- the "FieraMilano Exposition Center", proving that our products could bear considerable loads;
- the Vodafone headquarters "Vodafone Village" in Milan;
- the flooring of the "Old Harbour Area" in Genoa;
- several pavilions of Expo 2015 in Milan;
- "Palalido", a famous sports hall in Milan
- the "Cornelle Park Zoo" in Bergamo
- 43,000sqm of the Mauritania Port, produced in less than 20 days.

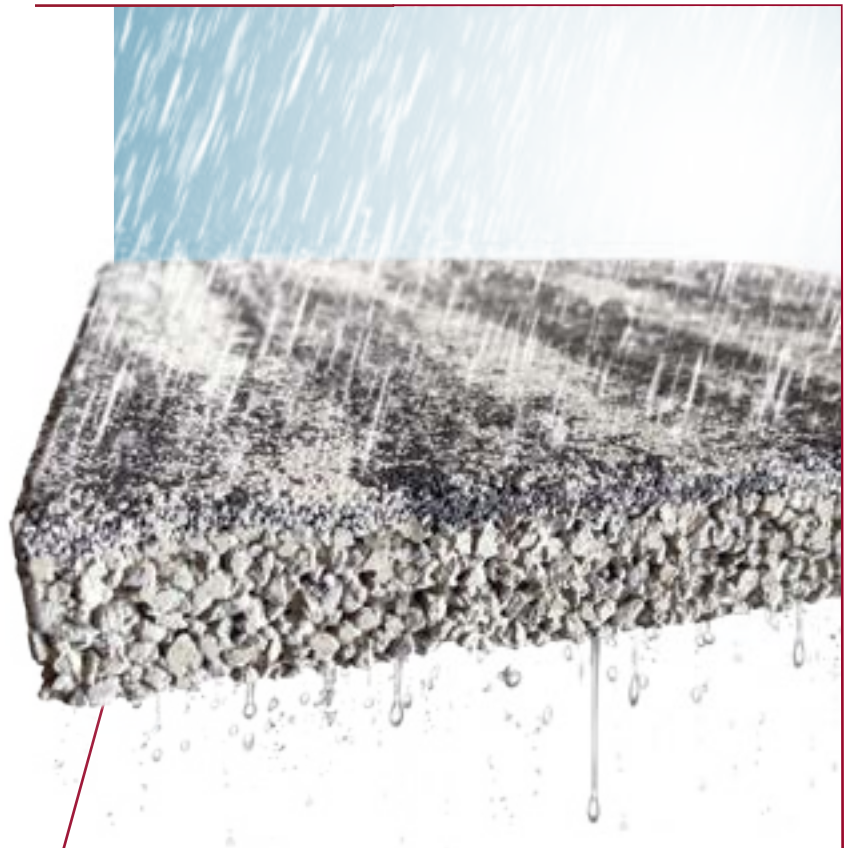

NEWS 2024

MEGADRAIN®

BAGATTINI presents the new **MEGADRAIN**: the first 4 cm thick slab 100% permeable, for pedestrian use (permeability test according to UNI EN 12697 standards).

Part of the well-known BAGAFIAME line, MEGADRAIN is characterized by **typical flamed streaks** capable of giving outdoor spaces a modern and captivating design.

MEGADRAIN slabs, thanks to their filtering capacity, **guarantee the absence of puddles**, allowing water to filter naturally through them into the lower layers of the ground.

RECORD

RECORD has been representing creativity, quality and innovation at the service of architecture for over 40 years. Starting from the first flooring launched on the market, our research looks forward to offer new and modern solutions to designers, business and private customers. The innovations introduced so far are countless, including: sandblasted "DIAMANTI" surface finish; "RENOVA" (the very first "smog-eating" paver in the world) and DRENOPAV, the first 100% permeable flooring.

MVB BAGATTINI S.r.l.

MVB was one of the first companies in Italy manufacturing interlocking pavers, introducing an exclusive line of paver into the market. Today it offers a very wide range of items, such as VERONA: a modular system on four different sizes with irregular texture, characterized by multiple finishes, including the FILTERING 100% permeable one. Another example is the innovative MURETT, which allows an easy realization of both decorative and retaining walls.
