

THE FUTURE OF CONSTRUCTION SITES IS CORDLESS

The new PREBENA cordless nailers combine state-of-the-art technology “Made in Germany” with robust construction – for precise work without restrictions.

Whether in timber construction, roofing, drywall installation, or interior finishing: they deliver reliable performance wherever it is needed.

Cordless. Powerful. Uncompromising – PREBENA cordless power for the cordless construction site.

The **PREBENA PKT-5-Z50** processes type Z staples from 16-50 mm. With its robust and proven magazine, this high-quality cordless nailer guarantees trouble-free processing of staples when fastening chipboard, OSB boards, plasterboard, and gypsum fiber boards

The **PREBENA PKT-5-ANP50** is suitable for paper-collated ANP anchor nails and plastic-collated ANK anchor nails from 40 to 50 mm with an angle of 25°. This special tool is precisely tailored to the high demands of wood connectors such as joist hangers, angle connectors, perforated plates, etc. The touchpoint nose makes it easy to find holes, enabling you to work quickly.

PREBENA PKT-5-SNH35. This cordless nailer was specially developed for the clean and secure fastening of paper-collated brad nails. It is particularly suitable for roofing and exterior cladding, as well as for fastening flashings or sheet metal to wood.

The new cordless nailers in the **PREBENA PKT-5** series are handy, reliable and with only 3.5 kg, the lightweights on the market. The air spring drive system for gasless, emission-free operation can be filled with compressed air using a standard compressor. Low-maintenance and sustainable operation without expensive gas cartridges saves time and money. The easily accessible control panel ensures simple operation.

Single and contact fire, depth adjustment, pressure protection, dry firing protection, and belt hooks are standard features.

The devices are available individually or as a set with an AKKU-STATION 12-36 charger and two AKKU18-2.0-LiPower batteries. Optionally, they can be delivered in a metaBOX as construction site-compatible packaging.

Want to work with different brands? It's easy with a CAS battery.

CAS batteries are compatible with over 45 brands. Simply combine your batteries and chargers with more than 450 machines from CAS brands.

This saves you time and money and also protects the environment. 100% compatibility in the 18 V class of the CAS (Cordless Alliance System).

With the expansion of PKT technology to include new cordless nailers, PREBENA is once again setting new standards in cordless fastening technology.

Robust, efficient, and future-oriented—for professional applications.
