

Linumiz GmbH

Embedded Intelligence. Engineered for Scale.

We are Linumiz — an embedded systems company focused on building secure, scalable hardware and software solutions. We operate at the intersection of embedded engineering, AI, and automotive-grade systems.

- Embedded Hardware & Software Development
- Automotive & Industrial Systems
- AI-Enabled Engineering Solutions
- Trusted Technology Partner for Semiconductor & OEM Ecosystems

Full-Stack Embedded Engineering

Embedded Hardware

- Custom Board Design
- High-speed PCB Layout
- Signal Integrity & Power Optimization
- Industrial & Automotive-grade designs

Embedded Software

- BSP & Low-level drivers
- RTOS / Zephyr / Linux Integration
- Secure Firmware Development
- Functional Safety & Compliance Support

Regulatory & Compliance

- CRA (Cyber Resilience Act) Consulting
- Security Architecture & Risk Assessment
- Approval & Market Certification Guidance

Open Source in Automotive

Enabling Zephyr for Automotive with Infineon

- Collaboration with Infineon
- Bringing Zephyr RTOS & NuttX RTOS into Automotive Applications
- Focus on:
 - Automotive-grade reliability
 - Security & Safety alignment
 - Long-term maintainability
- Bridging open-source innovation with automotive compliance

Cyber Resilience Act (CRA) – From Risk to Readiness

- Product Security Architecture Design
- Documentation & Audit Preparation
- Vulnerability & Lifecycle Management Strategy
- Guidance through Certification & Market Approval Processes

Security is no longer optional – it is regulatory.

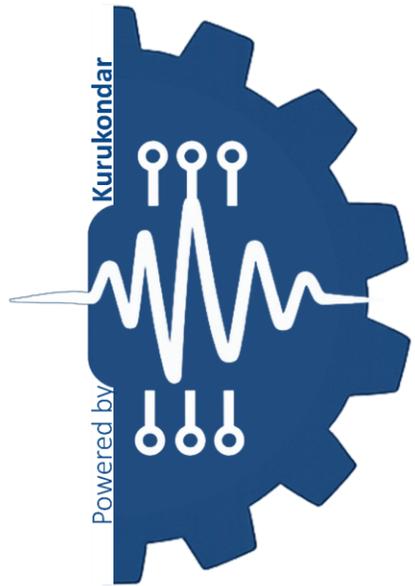

Transforming Embedded DX – AI for Instant Technical Intelligence

- **Zero-Debt Architecture** – based on Zephyr external modules for clean updates and upstream compatibility
- **Golden Project Templates** – production-ready DevContainers with integrated CI/CD pipelines
- **AI Access to Documentation** – datasheets, HAL manuals, and forum knowledge directly inside the IDE using RAG + MCP
- **AI-Ready Workspaces** – automated hardware-specific rules to guide AI tools and eliminate hallucinations

Accelerating Embedded Innovation

- Faster Design Cycles
- Reduced Engineering Overhead
- Secure & Compliant Systems
- AI-Powered Knowledge Access

Linumiz connects Embedded Engineering, Automotive Innovation, Regulatory Compliance, and AI into one unified ecosystem

Linumiz

Design. Develop. Deliver. Everywhere.
