

ProLion extends storage solutions – our powerful solutions help to ensure that data is always protected, secure, accessible, and manageable at all times.

CryptoSpike

for file service on ONTAP/PowerScale

- Protection against ransomware, data manipulation, and insider threats
- Two-pillar concept: analyzer, blocklist
 - Anomaly detection and automatic blocking in real time
 - Auditing of the file system
- Transparency & traceability of all file accesses
 - Single-file recovery from snapshots
- Data security through 4-eye authentication
 - File activity monitoring via API

Licensing according to tier classes and number of controllers

RestoreManager

for file service on ONTAP

- Central index for all NetApp snapshots
 - Supports Primary, Secondary & SnapMirror Cloud
- Criteria-based search for folders, files, date, etc.
 - Single-file restore from snapshots
 - Direct restore from an S3 archive
 - Integration via SnapDiff API
- Licensing independent of data volume & user (Primary only)

Licensing according to tier classes and number of controllers

ClusterLion

for ONTAP MetroCluster

- Permanent monitoring of all cluster services
- Automatic switchover without user intervention
 - No third location required (ProLion Quorum)
 - Infrastructure independent (cellular connection and battery buffer)
- Physical separation of power supply avoids split-brain scenario
- For all MetroClusters (MCC-IP, FMC, SMC)
 - Application integration available
 - Simple installation & operation

Licensing according to tier classes and number of controllers
