

Autobag® Brand AB850HB Hybrid

High-Speed Bagging and Printing System for mail order fulfilment and E-commerce

CHALLENGE

Struggling to choose between a reliable, versatile poly bagging system and a sustainable paper bagging solution to meet your customers' sustainability expectations?

SOLUTION

Stop choosing, start combining! The Autobag® Brand AB850HB Hybrid Bagger ticks all the boxes, handling both poly bags and 100% curbside recyclable paper bags up to 550 mm wide. It's the ultimate versatile, efficient, and sustainable solution for e-commerce and mail-order packaging needs. Our AB850HB Hybrid doesn't just package; it transforms your operations by automating the bagging process, boosting productivity with advanced features.

FEATURES AND BENEFITS

- Achieve **speeds up to 10 bags per minute (BPM)**, depending on bag size. These rates are achieved with the advanced bag grippers and label printing.
- **Cutting-edge bag-opening technology** for seamless order loading, even for multi-line orders.
- **Inline printing capability**, so shipping labels are directly printed on the bags.
- High quality seals with coordinated seal flattener for wrinkle free seals
- Continuous film/paper control with a sophisticated tension control unit that centres and monitors the position of the material throughout the entire bagging process
- Modular bag storage for **quick and easy loading** during changeovers
- Flexible machine that easily integrates with third-party systems
- Simple height adjustment and casters for operator comfort and portability
- **Ergonomic design** that's operator-friendly and saves valuable warehouse space.
- **Intuitive interface** with AutoTouch™ Control Screen with access to operator tutorials, help system, on-board diagnostics, data retrieval and performance monitoring with graphic or text-based views
- Reduces shipping cost compared to standard corrugate.
