About us

Comazo combines tradition and innovation and has become a specialist for workwear and protective underwear in recent years.

Our headquarters are in Albstadt, on the Swabian Alb in the South of Germany. Since 1884 Comazo has been family-owned and is now run by the 4th and 5th generation.

Whether for industrial companies, military, fire department or police and special units - the professional comazo|protect base layers convince with material and workmanship quality, wearing comfort, perfect fit and durability.

Our production

We produce our underwear, hoods and accessories in-house in Europe. The factory is still at our headquarters in Albstadt. Here you will find our knitting, dyeing and cutting departments as well as our administration, yarn purchasing, quality control, warehouse and logistic teams.

The high-quality comazo|protect fabrics are knitted and dyed in Albstadt and surrounds. After finishing and cutting they are sewn and packed in our own garment factories in Romania, Croatia and Bosnia.

As a European producer, we invest heavily in ecologically technologies that protect the environment. Our quality management is certified according to ISO 9001:2015. We are Fairtrade, GOTS and STeP by OEKO-TEX certified and a member of BSCI.

Our development

Research

Our textile engineers are always on the lookout for new materials and innovations. Ongoing development continuously optimizes the functionality of our workwear and protective underwear.

Functions

According to the field of work, the ideal functional composition is researched for each of our articles.

Production

Our own machinery at the headquarters in Germany consists of several different high-tech machines, that are cutting-edge technology and often customized to our ideas and needs. Our fabrics are dyed and finished on-site by our own qualified and experienced teams.

Certification

We set ourselves the highest requirements for your safety. That is why the final step is the certification of our products.

Functionalities

Safety starts with the right base layers. As a specialist in this field, we offer you underwear (first layer), hoods and accessories for a wide range of applications.

We are continuously working to further develop our certified functions. From flame protection, climate regulation to odor inhibition - our knowledge and know-how is vast and expanding continuously.

Our product range is extensive: moisture management, cold, heat and heat protection, thermal regulation, temperature equalization from cold to warm and vice versa, flame retardancy, antistatic, compression, phase change management, elasticity for optimal freedom of movement, 3D knitted fabrics as well as odor inhibition and much more.

Sweatmanagement

Use of fibers with hydrophobic properties

Flame retardant

by aramide, viscose FR, wool or modacrylic

Antistatic

antistatic fibers prevent static charging of objects

Membran

best protection against particles, bacteria, viruses, liquid and hot steam

Thermal storage

thanks to insulating air cushions in the knitted fabric or through internal roughening

Temperature compensation

for regulation of body temperature „phase change management“

Odor inhibition

through incorporated silver ions or an antiviral finish

Mobility

optimal comfort due to knitted-in climate zones or stretch inserts

Certificates

It is important to us to meet the highest standards and requirements for quality, safety, environmental protection and social and ecological. For this reason, we regularly have our know-how certified and undergo strict audits.

Our certificates - your added value. With Comazo, you are on the safe side.

Product range

Indoor

In manufacturing and many other industries employees quickly work up a sweat. Thanks to intelligent material composition, our base layers offer sweat management, comfort, durability and an antibacterial finish.

Outdoor

Mountain rescuers, offshore workers, sailors or pilots - many different task forces require sufficient cold protection in their workwear. Through "phase change" materials we offer you functional underwear for all sweaty operations in frosty areas.

Product range

For special operations

We respond to your wishes. You are looking for clothing with a certain material composition, cut and innovative functions. We customise according to your needs.

Flame retardant

Through our certified items such as flame retardant hoods, shirts and pants, we can professionally protect people in firefighting, police and military. We offer flame retardant, antistatic, comfort, sweat management and much more.

Applications

Whether fire protection, commercial kitchens, forestry, special units or extreme sports. Numerous satisfied customers are the best proof of the high quality of our products.

Because comazo|protect convinces with base layers for professionals with functional demands.
