20/K	350x470	370x480	50	1 200
CD	180x165	200x175	100	7 200

The interior of the envelope is lined with a protective layer made of a bubble foil which stiffens the envelope, prevents it from being torn and cushions against and deadens shocks, prevents scratches, creases, chips and breaks. Hot melt glue is applied on the trapezoid-shaped flap of the envelope. After silicone tape removal, the envelope can be sealed in two ways: either permanently or temporarily ("stick & unstick").

The durable, wide and aesthetic seal on the edges of the envelope (two side ones and a bottom one) prevents the envelope from tearing. The envelope has buckle holes for closure. It is possible to identify the envelope using printed markings, such as a given product brand, the envelope symbol or its bar code. The envelopes are available in two paper colours: white and brown. The envelopes are packed into bleached cardboard collective boxes, with a neutral print.

Production and sale of AIRMAX Premium® envelopes is with accordence with the standard PN-EN 13427 (DECLARATION OF CONFORMITY with the essential requirements of Directive 94/62/EC) and FSC® certified - licence number: FSC® C043072.
