SNIPER TRIPOD ADVANCED KIT

Mission Critical Precision

Equipped for excellence, the STAK delivers every component a sniper or observer needs for unparalleled success. Precision, adaptability, and reliability converge, ensuring you're always a step ahead in the field.

- + 100% USA Made – Designed, manufactured, and assembled in Lehi, Utah
- + Officially approved as a US Army replacement item in May 2022
- + 1x Top level NATO Stock Number (NSN)
9x included component NSN's

S.T.A.K.

CRITICAL INFORMATION

- + Load Capability established using sheer ice
 - + 80lbs load capable using rubber feet, before any degradation in performance.
 - + Test established w/tripod fully extended, mid-angle/weakest baseline
- + 3 Point Bend Test
 - + Minimum 1000-pound force before breakage (weakest carbon fiber section baseline test)
 - + Carbon tube ends static, perpendicular pressure applied to the center of each section; demonstrates the max load a soldier can lean into the tripod.
- + Environmental Chamber
 - + Ensures a 0% component failure at -22°F to 140°F
- + Outside RRS official testing
 - + US Army purchase order SPE8EL21F10KL; testing completed through DOD Units before the approval of the Sniper Tripod Advanced Kit.
- + Patented Dual Clamp Design
 - + Found in the Anvil-30 ARC Ball Head and SC-ARC Bipod Clamp.
 - + Soldiers can mount equipment designed with either 1913 Picatinny or the RRS 1.5" Dovetail Standard Rails.

SPECIFICATIONS

+ **TFCT-34L w/Anvil-30 ARC Ball Head**

- Load Capacity 1st Position Fully Extended: 80lbs
- Maximum Height: 71.1"
- Minimum Height: 6.7"
- Folded Length: 26.6"
- Weight: 5.50lbs

+ **SC-ARC with HBA**

- Height: 1.35"
- Length: 1.97"
- Width: 2.94"
- Weight: 5oz

+ **USR-240 M-LOK**

- Length: 9.45in
- Weight: 4.1oz

+ **VR-76**

- Length: 3.0"
- Weight: 1.9oz

+ **MPR-73**

- Length: 2.9"
- Weight: 1.5oz

+ **Tripod QD Set**

- ID: 36.7mm (Top Leg Section)
- Weight: 1.05oz

+ **STAK Carry Bag**

- Length: 28.5in
- Weight: 69.5oz
