

Tools for wood professionals

Wood Line

Product overview

ROUTER TABLE

- * Save time by changing router bits without retooling
- * The most important routers always ready for use in one machine
- * Work creatively thanks to a variety of tools on demand
- * Supplement to table milling machines and CNC milling cutters
- * Quality and efficiency thanks to high-performance motor that can withstand continuous load

Technical data	Router table Basic	Router table Classic	Router table Classic Performance	Router table Premium
Table size	520 x 430 mm	640 x 500 mm	640 x 500 mm	1070 x 500 mm
Engine Power	1050 Watt	1050 Watt	1600 Watt	1050 Watt
Max. tool diameter	40 mm	40 mm	ca. 55 mm	40 mm
Fine adjustments	optional at extra charge	optional at extra charge	✓ (3 pieces)	optional at extra charge
RPM range	8000 - 25000 1/min	8000 - 25000 1/min	3000 - 30000 1/min	8000 - 25000 1/min

LIFTING TABLE HPL HOLES Ø 20 MM

- * Optimal working conditions with proven “Made in Germany” technology
- * With the premium version, the work surface can be doubled simply by swiveling it open
- * Simple clamping system for holes & 20mm as an accessory
- * Ergonomic workplace with high-quality HPL coating
- * Expandable working surface with support rails with non-slip coating
- * Transport loads quickly and easily
- * Drawer and storage space under the table surface

Technical data	Lifting table Basic	Lifting table Classic	Lifting table Premium
Working surface	1200 x 800 mm	1600 x 800 mm (2200 x 800 mm extended)	1200 x 800 mm (1200 x 1600 mm swivelled out)
Subframe load-bearing capacity	300 kg	300 kg	300 kg
Working height	45 - 105 cm	53 - 113 cm	57 - 117 cm
Height adjustment	High-quality hydraulic pump	High-quality hydraulic pump	High-quality hydraulic pump

DRILL PRESS TABLE FOR PILLAR DRILL

- * The drill table for carpenters, industry and ambitious woodworkers
- * Make your drilling work easier and increase work safety by simply fixing workpieces
- * Optimize your work processes on the column drilling machine
- * Optional extension of the working surface by table extension
- * Integrated and replaceable splinter guard
- * Maximum precision thanks to a simple clamping system "Made in Germany"
- * Can be mounted easily and quickly on existing machine tables of drilling and milling machines

Wood Line

TECHNOLOGY MEETS PASSION

Always looking for new solutions and improvements. That's what keeps the RUWI team going.

RUWI was founded in 2000 by Reiner Ruggaber. As a master carpenter, he developed a router table to optimize workflows in his own carpentry workshop.

Since then, the team has grown and the products have expanded. With a passion for developing new solutions, the product range has grown and now consists of 10 different product groups in wood and metalworking with over 500 items. RUWI is located in the Black Forest in Germany and is based there with a lean production.

We are passionate about developing and manufacturing innovative solutions for saving time and for effective work.

Vision and Mission

As RUWI team we want to develop the best solutions for woodworking. We want to improve the working conditions and work-flows for woodworking professionals (and those who want to become one) - and empower them to do an even better job. We achieve our vision by developing and distributing durable and innovative products to equip wood professionals with optimal tools.

We work consistently and resolutely only with regional suppliers and rely on „Made in Germany“. Our high quality standards are reflected in the durability of our products.

Our drive

Together on the way, with irrepressible will and drive to find the best tools and solutions for everything to do with wood-working. Connected and committed to our values and beliefs, with reverent respect for the finest craft. Tradition and innovation in a passionate tension, marked with the humility never to believe that we already know everything.

Values

Our work culture is characterized by fair and appreciative interaction with all employees and partners. As a RUWI team we enjoy our work and grow together. There is room for error and shared growth, coupled with a dynamic pace of implementation.
