6

AVEFLOR, a.s

The unique preparations which takes care about the fur of your dog and provides long lasting effect against fleas, ticks and lice in all their developmental stages.

Volume	Pcs/box	Pcs/pallet	
150 ml	10 pcs	2 460 pcs	
ACTIVE INGREDIENTS			
PERMETHRINUM, FENOXYCARBUM			
CLASSIFICATION			
VETERINARY MEDICINE			

#### INTENDED USE

- » Cutaneous ectoparasitic solutions with ovicidal and larvicidal effect.
- » Treatment and prevention of ectoparasites for dogs.
- » It acts against fleas, ticks, louse, house dust mites and all their developmental stages.

#### BENEFITS

- » Triple insecticidal effect:
- 1. destructive: kills adult ectoparasites
- 2. ovicidal: kills their eggs
- 3. *larvicidal:* it kills larvae of ectoparasites, which eliminates the occurrence of a new population, and the development chain is interrupted
- » Acts as a tick prevention for up to 4 weeks
- » Application form suitable for small breeds, extrememly timid dogs
- » The advantage of foam application form is simple, visible dosing of the amount of antiparasitics accordingly to the size of the treated dog.

#### **INSTRUCTION FOR USE**

- » Apply foam on a hand in glove or directly to the surface of the body in the approximate size of a tennis ball, evenly spread over the surface of the body.
- » After treatment it is necessary not to wash the animal for 48 hours.
- » The treatment can be repeated after I week.
- » After applying the product, avoid licking of treated hair.

# Arpalit® NEO Foam

The unique preparations which takes care about the fur of your dog and provides long lasting effect against fleas, ticks and lice in all their developmental stages.

Volume	Pcs/box	Pcs/pallet
150 ml	10 pcs	2 460 pcs
ACTIVE INGREDI- ENTS		
PERMETHRINUM, FENOXYCARBUM		
CLASSIFICATION		
VETERINARY MEDICINE		

#### **INTENDED USE**

- » Cutaneous ectoparasitic solutions with ovicidal and larvicidal effect.
- » Treatment and prevention of ectoparasites for dogs.
- » It acts against fleas, ticks, louse, house dust mites and all their developmental stages.
- » The disinsection of animal shelters.

#### **BENEFITS**

- » Triple insecticidal effect:
- 1. destructive: kills adult ectoparasites
- 2. ovicidal: kills their eggs
- 3. larvicidal: it kills larvae of ectoparasites, which eliminates the occurrence of a new population, and the development chain is interrupted
- » Acts as a tick prevention for up to 4 weeks

#### **INSTRUCTION FOR USE**

- » Press the spray against hair in direction from 15-20 cm from the surface.
- » The treatment is performed only on slightly wet hair except for the facial part.
- » To treat the facial part of the body, spray the product on the gloved hand and gently rubbed into the hair.
- » After treatment it is necessary not to wash the animal for 48 hours.
- » The treatment can be repeated after I week.
- » After applying the product, avoid licking of treated hair.

Two in one product. Disinfectation product for dog shelters (houses, beds) and against ectoparasitosis.

Volume	Pcs/box	
300 ml	10 pcs	
ACTIVE INGREDIENTS		
PERMETHRINUM, FENOXYCARBUM		
CLASSIFICATION		
VETERINARY MEDICINE		

#### **INTENDED USE**

- » Spray that acts against fleas, ticks, lice, biting lice and their development stages.
- » Comfortable, fast and simple application for the disinsection of dog houses, beds, kennels, mats, pet carriers, etc.

#### BENEFITS

- » Application of spray to places where the dog sleeps, prevents the occurrence of parasites and their further spread.
- » Acts on a wide range of parasites from ticks and fleas to biting lice. Acts on all developmental stages from larva to adult parasite.
- » Preventive efficacy of the product for up to 4 weeks.
- » Can be used directly on the dog

#### **INSTRUCTION FOR USE**

- » Push the spray button and apply the product against the lay of hair from a distance of approximately 15 - 20 cm from the body surface. The dose depends on the size of the animal being treated.
- » Spray the entire body of the animal with the exception of the head (around the eyes, snout) until the hair is lightly dampened.
- » To treat the head, spray the product onto a gloved hand and carefully rub it into the hair. Wait 48 hours after applying the product before giving the animal a bath.
- » Spray doghouses, animal beds and other places where the animal stays and where the occurrence of ectoparasites can be expected, for a few seconds from a distance of 20-30 cm until light but even dampening of the treated area and allow to dry. Pay special attention to baskets, blankets, carpets, floors, cracks in the floor, corners and back sides of furniture. Ventilate the area thoroughly after application.

Arpalit® NEO Mechanic diffuser

Gentle shampoo designed to kill ectoparasites such as fleas, ticks and lice and their developmental stages.

Volume	Pcs/box	Pcs/pallet
250 ml	15	2 415 pcs
500 ml	6	52 pcs
ACTIVE INGREDIENTS		

PERMETHRINUM, PHENOXYCARBUM

CLASSIFICATION

VETERINARY COSMETIC PRODUCTS

#### **INTENDED USE**

» Gentle shampoo designed to kill ectoparasites such as fleas, ticks and biting lice. It is used for the treatment of dog hair and other animals with hair, which after treatment gets softness, firmness, elasticity and deep shine.

#### BENEFITS

- » Shampoo washes, cleans and cares the coat.
- » Ovicidal and larvicidal effect.
- » It contains bamboo extract, vitamins B3 and B5, olive oil and elastin.
- » It does not dry or irritate the skin.
- » The pH is neutral.
- » Coat gains softness, strength, flexibility, deep lustre and bright colour after treatment.
- » Up to 4 weeks of protection against parasites.
- » Suitable for young animals from 2 months of age.

#### **INSTRUCTION FOR USE**

- » Take an adequate amount of shampoo, apply to the soaked hair and gently massage to create a rich foam.
- » For young animals or small animals use shampoo diluted with water in ratio 1:2.
- » Leave the shampoo for about 5 minutes and then rinse the coat thoroughly with warm water.
- » Leave for 2–5 minutes. Then wash the coat again thoroughly with lukewarm water.
- » Dry the hair or leave freely to dry.

#### DO NOT USE

- » On sick or allergic animals.
- » During lactation or pregnancy.
- » For young animals up to the age of 2 months.
- » In cats.

# Arpalit® NEO Shampoo

# against parasites with bamboo extract

### Antiparasitics and biocides

Arpalit Neo antiparasitic collar for dogs with a gradual release of substances that provide the dog protection against parasites for up to 10 months.

Volume	Pcs/box	Pcs/pallet
N/A	10 pcs	2 610 pcs
ACTIVE INGREDIENTS		
40 KHZ ULTRASONIC PULSES		
CLASSIFICATION		
VETERINARY TECHNICAL DEVIE		

#### INTENDED USE

» Veterinary technical product intended for dogs and cats to repel ticks and fleas based on 40 kHz ultrasound. It is an agent that contributes reducing the incidence of these ectoparasites on the animal's body, but, like repellents, does not provide 100% protection against infestation. It is suitable for dogs and cats of all sizes and ages. It is also used for older and weak animals prone to disease, for puppies, during lactation and for pets staying at home

#### BENEFITS

- » Attached to the collar so that the opening is directed towards the animal's body.
- » Contains a microchip that emits ultrasonic pulses at a frequency of 40 kHz, harmless to humans and animals. The short ultrasonic pulses disturb and repel fleas and ticks within a radius of 3 metres from the animal, thus preventing infestation.
- » The effectiveness does not diminish in wet and rainy conditions.
- » Harmless to humans and animals, non-toxic, odourless.

#### **INSTRUCTION FOR USE**

- » Remove the unit from its packaging and remove the red fuse. After the LED light flashes several times, the product is activated.
- » After activation, the shelf life is 10 months. Activation is possible no later than 26 months from the date of manufacture stated on the packaging. ARPALIT® electronic flea and tick repellent ATTACH AS A COLLAR PENDANT. The opening with grille from which the ultrasonic waves are emitted must be directed towards the body of the animal.
- » The electronic repellent is powered by a lithium battery which cannot be replaced.
