filancore

Decentralized **identity & access management** for seamless interactions of IoT ecosystems.

Empowering **trusted** interactions

Our innovative **Self-Sovereign Identity (SSI)** technology is key to achieve a truly integrated IoT ecosystem within and across industry verticals, and enables enterprises to create immutable and verifiable data.

Benefits

Secure

No single point of failure

Real ID ownership – no 3rd party involved

**Security** on hardware level

Secured & validated data

Open

No vendor **lock-in**

Based on **open standards**

Building **bridges**

Scalable

High **performant**

Handle **millions of identities**

Surprisingly Simple

Easy lifecycle management

**Effortless** user experience

Products

filancore Sentinel
The core ID Platform

ID & access management

Full lifecycle administration

SSI security infrastructure

Monitoring & reporting

filancore Ankrypt
Integration on your IoT devices

Identity **management**

Trusted **access**

Leverage hardware **security**

filancore Records
Secure & validate your data

Verifiable **origins**

Data **immutability**

Timestamps
