Corporate Presentation

# Soldini Professional

SOLDINI  
PROFESSIONAL

Soldini Professional is an Italian manufacturer specialized in **operational**, **professional**, and **uniform** footwear.

Founded in 1945 in Tuscany, the company has been a trusted partner of Italy's main operational forces — including the Police, Carabinieri, Armed Forces, and government agencies — for over 80 years.

Our main strength lies in **complete in-house control of the production chain**: design, material research, prototyping, production and quality testing are all carried out in Italy.

This ensures **consistent quality**, **full traceability**, and **total compliance** with military and institutional specifications.

Our team combines traditional craftsmanship with advanced engineering expertise, conducting **extensive testing on ergonomics, durability, breathability, waterproofing, and mechanical resistance**. Each model is developed through direct collaboration with field operators, turning real operational needs into **tested, reliable solutions**.

Today, Soldini Professional stands for **reliability**, **endurance**, and **comfort**, supporting military and law enforcement personnel in every operational scenario worldwide.

# Bormio Line

SOLDINI  
PROFESSIONAL

The Bormio line is designed for **everyday operational use**.

It is intended for personnel who spend long hours on the move, often on uneven surfaces or in variable weather conditions.

High-grip, anti-slip outsoles reduce slipping risks, while targeted reinforcements on the upper and heel ensure protection without compromising comfort.

Shock absorption is engineered for long walking distances, helping prevent fatigue and stress-related injuries.

The line has been refined throughout the years thanks to **continuous feedback** coming from Italian and international units, allowing us to constantly update materials and performance.

# BORMIO LINE

**OPERATIONAL USE  
ON A DAILY BASIS**

**LONG-DISTANCE  
PERFORMANCE**

PROFESSIONAL

# Merano Line

SOLDINI  
PROFESSIONAL

The **Merano line** embodies **absolute versatility**, designed to deliver top-level performance both in urban environments and in field operations.

Available in **high, mid, and low versions**, for **summer and winter use**, it guarantees **outstanding protection, comfort, and durability** in all conditions.

Developed in accordance with **elite unit specifications**, Merano combines **lightness, agility, and robustness**, while maintaining the practicality needed for daily service.

From ankle to toe, every component is engineered to ensure **stability, protection, and lasting comfort**, even in highly dynamic missions.

# MERANO LINE

*RELIABLE EVEN IN  
CRITICAL CONDITIONS*

*PROTECTION, COMFORT  
AND DURABILITY*

# Stelvio Line

SOLDINI  
PROFESSIONAL

Stelvio is the new **Soldini Combat Boot**, developed for **Special Forces** and elite units operating in extreme environments.

Entirely **designed and manufactured in Italy**, it combines **strength, lightness, and maximum protection**.

Built with next-generation materials, it provides **abrasion resistance over 200.000 Cycles** and **waterproof protection exceeding 40,000 mm**, maintaining **excellent breathability** for extended missions.

The **reinforced upper, Vibram outsole, and quick-adjust lacing system** ensure stability, grip, and comfort in all operational scenarios.

**CONSISTENT  
PERFORMANCE**

**GOVERNMENT  
SPECIFICATION**

# Saturnia Line

SOLDINI  
PROFESSIONAL

The **Saturnia line** is the official footwear of the Italian Police Forces, designed for urban and operational use where **durability, traction, and lightness** are key.

Over time, it has been continuously refined with **ergonomic and structural improvements** based on user feedback from active units.

**ERGONOMIC AND  
TECHNOLOGICAL  
ENHANCEMENTS**

**STABLE  
OUTSOLES**

# Uniform & Goodyear Flex

SOLDINI  
PROFESSIONAL

Our uniform footwear adopts also **Goodyear Flex construction technology**, inheriting the best of Italian shoemaking tradition.

Ensures **natural flexibility** while walking and exceptional durability, with an institutional aesthetic suitable for official representation.

The footwear becomes an **elegant yet functional work tool**, ideal for personnel in uniform who require both comfort during long duty hours and suitability for ceremonies.

**TECHNOLOGY INSPIRED  
BY ITALIAN  
CRAFTSMANSHIP**

# Conclusion

**SOLDINI**  
PROFESSIONAL

In summary, Soldini Professional is an **entirely Italian reality** that combines craftsmanship, innovation, and close collaboration with field operators. Our mission is to support the safety and operational effectiveness of forces in the field through footwear designed around real-life user experience.

We are ready to **develop customized solutions**, conduct **dedicated technical testing**, and assist each organization in its operational evaluation process.

# Soldini Professional - Technical & Production Overview

## Technology and Production

Soldini integrates cutting-edge systems throughout its production cycle.

- **Design and Engineering:** The company uses **Naxos 2D/3D CAD** and **Easy Last CAD-CAM** software for digital model and last development, optimizing material use and ensuring precision in all sizes.
- **Leather Cutting:** The **TESEO FC4 automated cutting machines** maximize material yield and minimize waste and human error through advanced fixed-plane technology.
- **Material Research:** Continuous R&D focuses on innovative leathers, fabrics, and soles (TPU, EVA, leather). All materials are **tested under AC-CREDIA-accredited laboratories**, guaranteeing compliance with the strictest standards.
- **Quality Control:** Every pair undergoes rigorous inspection by expert technicians whose experience allows defect detection beyond laboratory limits.

## R&D and Staff Structure

Soldini's technical department is a highly specialized structure dedicated to product innovation and feasibility analysis. It includes:

- 1 Head of Patternmaking Department
- 2 Pattern makers specialized in CAD Naxos 2D/3D
- 1 Specialist for last development and modification
- 5 Technicians dedicated to sample cutting and assembly
- 1 Dedicated assembly line for prototype and testing phases

This internal synergy allows rapid prototyping, testing of new materials, and adaptation to specific client requirements.

## Experience and Philosophy

In the last decade alone, Soldini has produced footwear worth over €25 million for the Carabinieri Corps, with similar volumes for the State Police and Guardia di Finanza, as well as other military and civil agencies.
