Security for What Matters Most

Applications | Data | Identities

cpl.thalesgroup.com

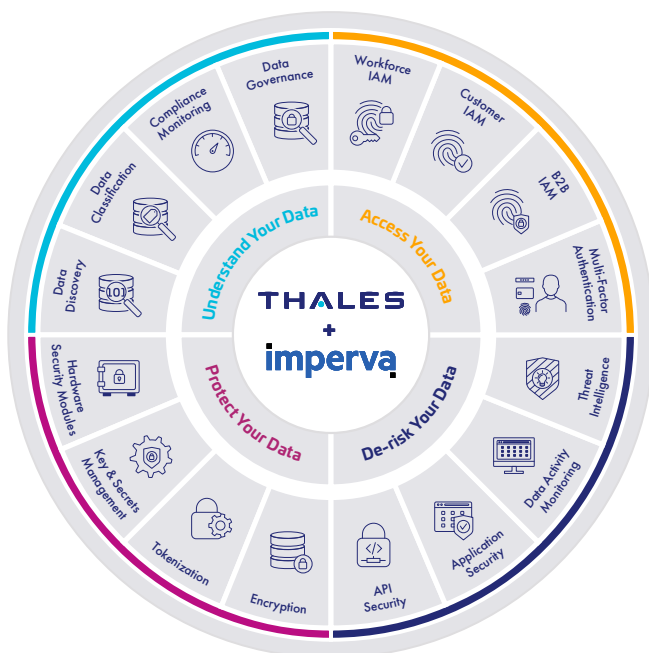

THALES
Building a future we can all trust

Today, as businesses drive digital innovation, more applications, data, and identities are moving to the cloud. This presents numerous security challenges, including increased complexity, less visibility and control of data, and heightened privacy concerns – all of which result in increased risks of data breaches and compliance challenges.

Thales, together with Imperva, helps organizations address these challenges by protecting what matters most – Applications, Data, and Identities. Our broad portfolio of complementary application security, data security, and identity and access management platforms helps reduce complexity and risks across cloud and on-premises systems (or Hybrid IT).

Our mission is to keep everything secure, protect what matters most, and ultimately, enable your organization to operate and innovate securely in the cloud. We protect a diverse range of organizations across various industries, speaking to the versatility and effectiveness of our solutions.

Security for what matters most

Application Security

Automatically protect applications and APIs with precision from bots, DDoS, and supply chain attacks and increase resilience and speed of your websites.

Data Security

Discover and classify data anywhere, protect data, keys, and secrets, and get real-time observability of threats with actionable insights.

Identity & Access Management

Orchestrate frictionless, secure, and trusted digital journeys for customers, employees, and partners at scale.

Delivering measurable business and strategic outcomes for customers

Reduce Risk & Accelerate Compliance

Increase visibility of threats and protect applications, data, and identities anywhere while helping achieve compliance.

Streamline Operations & Reduce Vendor Complexity

Eliminate siloed tools and processes with integrated platforms that reduce vendor complexity and total cost of ownership.

Accelerate Growth & Enable Digital Innovation

Operate in the cloud securely and deliver new and trusted digital services for customers, employees, and partners.

We are driven by our commitment to make the world safer

About Us

Thales, together with Imperva, is a global leader in cybersecurity, helping the most trusted brands in the world protect their most critical applications, data, identities, and software anywhere at scale. Through innovative and integrated platforms, Thales helps organizations operate securely in the cloud, defend against cyber threats, accelerate compliance, and deliver trusted digital experiences for billions of consumers every day.

Protecting Customers at Scale

- Protecting **\$150 trillion** in interbank money transfers every year
- Analyzing **2.6 trillion** web requests monthly
- Preventing **89 billion** attacks monthly
- Monitoring **184 countries** for threats every day

A man and a woman are standing in a server room, looking at a rack of servers. The woman is pointing at a server rack. The man is looking at the same rack. The server room is dimly lit with blue light. The server racks are filled with cables and components.

Security that integrates with your technology ecosystem

With one of the industry's largest data security technology ecosystems, Thales and Imperva solutions integrate with the most widely used technologies to protect and secure access to your mission-critical applications and data.

Through the Thales and Imperva partner programs, we have established partnerships with more than 6,700 global resellers, system integrators, distributors, managed service providers and technology companies who are committed to architecting solutions to meet secure cloud and digital transformation initiatives and compliance mandates around the world.
