

AperturesConnect

The Apertures CRM for
Windows & Doors Businesses

www.aperturesconnect.com
info@aperturesconnect.com

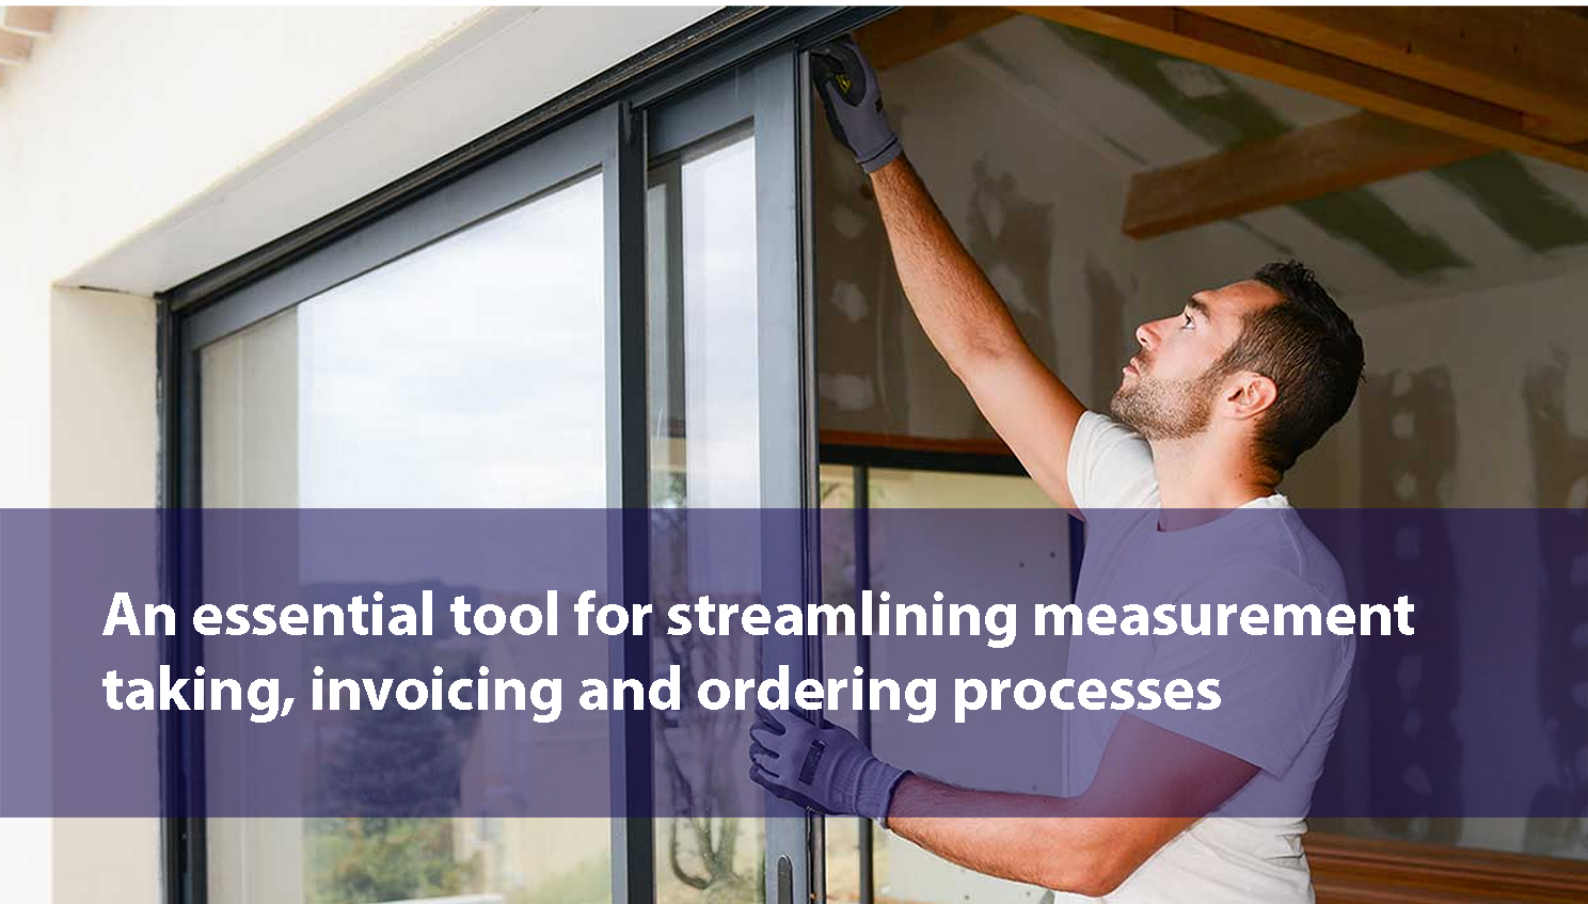

AperturesConnect is the CRM for businesses specialising in manufacturing & supply of apertures within the Building Industry

Ready to ditch old habits like jotting down measurements and sending quotes via WhatsApp or messenger? Discover a smarter solution with AperturesConnect CRM. Say goodbye to errors and wasted time by seamlessly storing all aperture-related information in one platform

AperturesConnect CRM offers a fast and reliable method for various functions related to the supply and installation of aperture products such as PVC, Wood or Aluminium windows as well as doors, louvers, blinds and garage doors. It serves the needs of a team within various levels in the supply chain, from supplier to consumer

AperturesConnect CRM optimises various tasks ranging from product measurements to quotations, sales orders, issue tracking, on-site photos, site assessments, analytics and more! Our proven system not only streamlines processes but also accelerates sales, even closing deals right on-site. Experience efficiency like never before

AperturesConnect CRM also provides an easy-to-use display interface, whilst providing the structure and controls necessary for a robust inventory system. User experience is designed for actions to be completed in a minimum number of steps, whilst on-site, offering immediate access to prices, availability and order processing

An essential tool for streamlining measurement taking, invoicing and ordering processes

Some of AperturesConnect CRM Features

On-site Measurements Taking

Measurements data can be inputted into the system whilst on-site, generating limitless aperture configurable options in seconds

Quotation and Sales orders

Provide quick quotations and close deals in record time. Quotations can be easily converted to sales orders; a user friendly tracking system is also implemented, allowing users to monitor orders easily and effectively

Issue & Job Tracking

Track all your customer issues and job statuses in one unified platform

Email/SMS notifications & Appointments Scheduling

The in-built email functionality allows users to compile and share various documents such as quotations, sales orders and measurements to relevant stakeholders

E-Signatures, on-site photos & site assessments

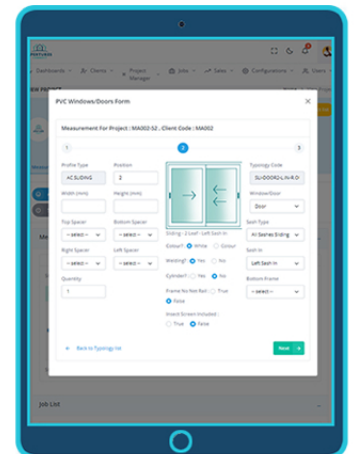

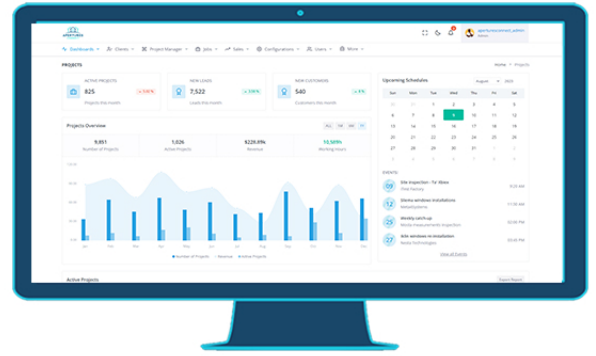

Set up approvals processes and ensure all customer agreements are centralised in one system. Users can input site assessment information and other relevant documentation into the system, allowing for the necessary preparatory works for installation

Real-time Analytics & Reporting

The system incorporates additional features including analytics and forecasting, using Business and Artificial Intelligence

Integratable with your Systems

AperturesConnect seamlessly integrates with leading accounting software including Xero, Zoho, Sage, Quickbooks, and Shireburn SFM, as well as production software, ensuring full automation from measurement to production. Let us integrate your accounting and/or production systems for seamless operations

A supply-chain management system that knows no boundaries to your business

Invest slowly as you grow

AperturesConnect CRM is a modular system, allowing users to opt for one or more features at any given time. The flexibility of the system allows for further product integration. We are proudly hosted on the Microsoft Azure Cloud, which offers a robust uptime of 99.999% for AperturesConnect CRM

Support & Training

Clients benefit from staff training, alongside user-friendly manuals designed to assist users with all available features effortlessly. Day-to-day assistance in managing AperturesConnect CRM is also provided, aiding businesses in becoming more efficient in their daily operations
