Natural Calming & Emotional Wellbeing

Emotional wellbeing is key to a happy, healthy pet. Stress and anxiety don't just affect behaviour—they can impact a pet's overall quality of life.

Pet Remedy is an established, clinically proven solution designed to support pets in feeling calmer and more balanced.

Used and **trusted by pet professionals** and owners, it's fast-acting, natural, and effective for all pets.

At Pet Remedy, we're **dedicated to improving the lives of pets** by addressing stress and promoting their emotional wellbeing.

Because emotional wellbeing matters!

What is Pet Remedy?

Pet Remedy is a **clinically proven** blend of absolute and essential oils derived from valerian, vetiver, basil, and clary sage.

- Natural
- Clinically proven
- Starts to help immediately
- Helps **calm without sedating**
- Helps develop **emotional resilience and wellbeing**
- Helps with **settling and to speed up bonding**

How does Pet Remedy work?

Working with the pet's own natural calming mechanisms, the low concentration of oils is very gentle in its effect and starts to help immediately.

The unique mode of action through the olfactory system helps an anxious pet become more aware of their surroundings and less reactive to stressful situations.

Effectiveness of **pet remedy** in reducing aggression in pigs.

Independent consumer study

Study Design Overview

This study was an open trial evaluating Pet Remedy Spray, provided in plain, unbranded packaging to avoid any preconceptions or bias. A total of 130 pets participated, with owners using the spray at home over a seven-day period. Feedback was gathered via a questionnaire on the pets' response after the first use, as well as on days 3 and 7. In total, 106 responses were collected, offering valuable insights into owners' perceptions of the product's effectiveness.

Subjects

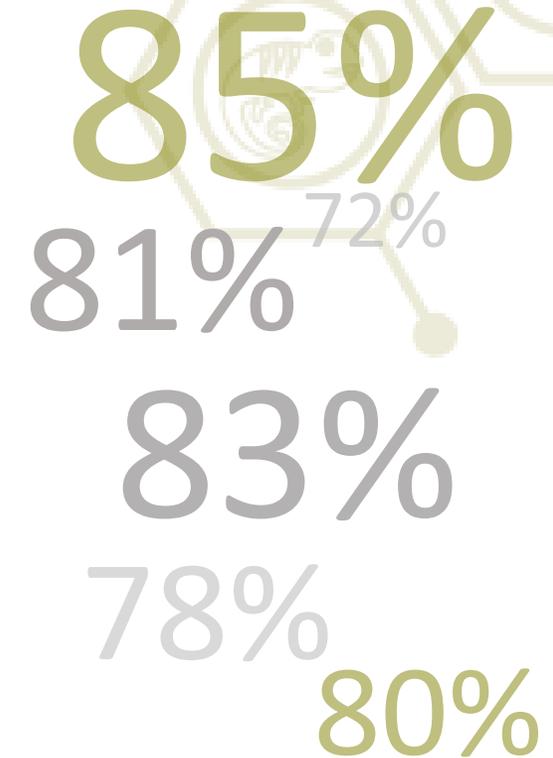

The 130 pets were selected from Cue Consumer Research's test panel, focusing on pets whose owners perceived them as experiencing mild to moderate stress.

Effectiveness:

- **81%** noticed their pet seemed calmer after using the spray
- **82%** observed their pet appeared less stressed with the spray
- **85%** reported a noticeable difference in their pet's behavior
- **80%** felt their pet handled stressful situations better with the spray
- **72%** said their pet appeared more confident
- **78%** felt the spray improved their pet's emotional well-being

Use and Recommendation:

- **83% found this product more effective than others they had tried**
- **81%** would recommend this product to a friend
- **83%** were happy with the smell of the spray
- **80%** liked the smell of the spray

**Results from independent consumer trial of 106 pets with mild to moderate levels of stress.*

Independent consumer study

Adult cat displaying symptoms of stress for no clear reason. Other products have been tried and vet advice sought. This is the first thing to improve his behaviour!

Just chilled out immediately

Less anxious in the car, less stressed around other dogs and strangers

Less reactive around another animals

More relaxed around guests

My cat is more Happy to interact since using the spray

My dog is really anxious with separation anxiety also fireworks or anyone coming to the door and this spray has been amazing
