CATALOG 2025

WILD MOUNTAIN

STAINLESS STEEL ACTION AND BARREL

The Wild Mountain: an interesting combination of design and performance.

ACTION	Stainless steel	The bases (20 MOA) and recoil lug are integrated into the action in a new 2024 lightweight version.
BARREL	Spiral fluted stainless steel	Is manufactured from a high quality match grade of stainless steel (416) in a beautiful spiral fluted shape.
WEIGHT	6.75 pounds	The weight is calculated using .300 WIN MAG caliber, 24 in barrel Adjustable cheek piece, adds 5 ounces
MUZZLE BRAKE	MB42 Included	Side Port (option) Cap (option)
STOCK	STANDARD left & right handed MOUNTAIN LR THUMBHOLE	STANDARD + Adjustable cheek piece (option) MOUNTAIN LR + Adjustable cheek piece (option)

COLOR:
ST-2-102 Hunter Orange

For each rifle, the ACTION/BARREL/MUZZLE BRAKE
Is available in black or in match color
14 available colors, 7 stock options

TI MOUNTAIN

TITANIUM ACTION / STAINLESS STEEL BARREL

Perfectly suited for hunting, 1 pound less, a greatly appreciable difference.

ACTION	Titanium	The bases (20 MOA) and recoil lug are integrated into the action in a new 2024 lightweight version. Is the best on the market
BARREL	Spiral fluted stainless steel	Very strong, tough, light, resistant to corrosion ion and in addition it has a very interesting appearance. Titanium is 50% lighter than stainless steel. This spiral fluted barrel is manufactured from a high quality match grade of stainless steel (416) in a beautiful spiral fluted shape.
WEIGHT	6.25 pounds	The weight is calculated using .300 WIN MAG caliber, 24 in barrel Adjustable cheek piece, adds 5 ounces
MUZZLE BRAKE	MB42 Included	Side Port (option) Cap (option)
STOCK	STANDARD left & right handed MOUNTAIN LR THUMBHOLE	STANDARD + Adjustable cheek piece (option) MOUNTAIN LR + Adjustable cheek piece (option)

SPIRAL FLUTED STAINLESS STEEL BARREL: From a technical aspect, the barrel grooves are formed with a button "butoff rifling" rather than cold forging. It has the advantage of inducing less stress into the barrel, leaves fewer marks and increases the precision of the diameter of the barrel. The fluting also eliminate weight, promotes cooling, and in addition, improves the esthetic appearance.

CARBON MOUNTAIN

CARBON FIBER BARREL/ STAINLESS STEEL ACTION

The perfect choice for magnum calibers that produce high-powered shots and generate a lot of heat. This barrel is stiffer, lighter and most importantly, it dissipates heat faster between shots than stainless steel barrels.

ACTION	Stainless steel	The bases (20 MOA) and recoil lug are integrated into the action in a new 2024 lightweight version.
BARREL	Carbon fiber	It is made up of a stainless steel barrel which has been thinned to make it as light as possible and then wrapped by several layers of carbon fiber making it very rigid.
WEIGHT	6.7 pounds	The weight is calculated using .300 WIN MAG caliber, 24 in barrel Adjustable cheek piece, adds 5 ounces
MUZZLE BRAKE	MB42 Included	Side Port (option) Cap (option)
STOCK	STANDARD left & right handed MOUNTAIN LR THUMBHOLE	STANDARD + Adjustable cheek piece (option) MOUNTAIN LR + Adjustable cheek piece (option)

COLOR :
Golden Forest ST-6-104

For each rifle, the ACTION/BARREL/MUZZLE BRAKE
Is available in black or in match color

14 available colors, 7 stock options

ROCKY MOUNTAIN

TITANIUM ACTION / CARBON FIBER BARREL

The Rocky Mountain is our elite model. This rifle has all of our superior components and offers you optimal support in all situations. We have combined our carbon fiber barrel and our ultra-light titanium action.

ACTION	Titanium	The bases (20 MOA) and recoil lug are integrated into the action in a new 2024 lightweight version. Very strong, tough, light, resistant to corrosion ion and in addition it has a very interesting appearance. Its weight is 50% lighter than stainless steel.
BARREL	Carbon fiber	It is made up of a stainless steel barrel which has been thinned to make it as light as possible and then wrapped by several layers of carbon fiber making it very rigid.
WEIGHT	6.2 pounds	The weight is calculated using .300 WIN MAG caliber, 24 in barrel Adjustable cheek piece, adds 5 ounces
MUZZLE BRAKE	MB42 Included	Side Port (option) Cap (option)
STOCK	STANDARD left & right handed MOUNTAIN LR THUMBHOLE	STANDARD + Adjustable cheek piece (option) MOUNTAIN LR + Adjustable cheek piece (option)

THE CARBON FIBER BARREL is made up of a stainless steel barrel that has been refined to make it as raw as possible and then surrounded by several layers of carbon fiber. During manufacturing, the carbon fiber is combined with a resin which is belted by heat treatment on 3 different axes of the barrel. The fiber is glued at high temperature along the entire length of the barrel so that each strand sticks perfectly to it. This method allows us to fuse these materials (stainless steel and carbon fiber) to obtain a single cylindrical body. The result is a **lighter**, stiffer and more **accurate** barrel. Which has the ability to dissipate heat more quickly

4 MOUNTAIN MODELS

A rifle that is made with utmost care. Throughout the process, rigorous checks using CMM, air gage and optical comparator are carried out in order to respect very tight tolerances of each component.

ACCURANCY TESTS are carried out in our underground shooting range. Upon delivery, we certify that each gun must have ½ MOA grouping (3 bullets within ½ inch over a distance of 100 yards) with the appropriate ammunition. The rifle is delivered with the target used during the accuracy tests. We provide the details of the ammunition used so that the customer can

FEATURES		WILD MOUNTAIN	TI MOUNTAIN	CARBON MOUNTAIN	ROCKY MOUNTAIN
ACTION		Stainless steel	Titanium	Stainless steel	Titanium
BARREL		Spiral fluted stainless steel	Spiral fluted stainless steel	Carbon fiber	Carbon fiber
WEIGHT		6.75 POUNDS	6.25 POUNDS	6.7 POUNDS	6.2 POUNDS
BASES		Integrated bases (20 MOA) and Recoil lug			
LUGS ACTION		3 lugs action, 70° degrees rotation, with fluted			
CARBON STOCK SELECTION	STANDARD RIGHT HANDED	Available			
	STANDARD LEFT HANDED	Available			
	STANDARD + ADJUSTABLE LEFT &	Option			
	MOUNTAIN LR	Available			
	MOUNTAIN LR + ADJUSTABLE	Option			
	THUMBHOLE	Available			
SAFETY LOCK		Three positions			
AJUSTABLE TRIGGER		Crisp 2 ¾			
DETACHABLE BOX MAGAZINE		Capacity 4 ammo (.338 lapua X 3 ammo)			
MUZZLE BRAKE	M42	Included			
	SIDE PORT	Option			
	CAP	Option (It is screwed at the end of the barrel)			
CERTIFICATION		1/2 MOA			

MUZZLE BRAKE MB42 *Included*
42 angle holes which allow gases to escape around the barrel, side holes the recoil by approximately 50%. The 15 degree forward angle on all holes directs the sound shot away from the shooter.

MUZZLE BRAKE :
SIDE PORT (option)

Many shooters are interested in the tactical style. When shooting, the orientation of the holes prevents dust from being raised from the ground.

ACTION : The base and recoil lug are integrated into the Action, this helps to increase the precision of the mechanism by reducing vibration.

LIGHT VERSION

CALIBRER	20"	22"	24"	26"	TWIST

.375 H&H * Garantie 5/8 MOA				X	12

3 LUGS ACTION:

To open the lock, it requires a rotation of 70 degrees instead of the usual 90 degrees for many other products.

70 degrees

Unobstructed bolt cycle when shooting with an oversized scope.

EXPEDITION

STAINLESS STEEL ACTION AND BARREL

The "Expedition" is our entry level model. Machined without spiral fluted on the barrel and bolt. At Antler, we know that trusting your rifle is essential. The "Expedition" model has been designed with the aim of going along with the hunter during crucial moments and to ensure that these moments become unforgettable hunting experiences.

ACTION	Stainless steel	No integrated bases (available as an option)
BARREL	Stainless steel	Plain stainless steel barrel(416)
WEIGHT	6.8 pounds	The weight is calculated using .300 WIN MAG caliber, 24 in barrel
MUZZLE BRAKE	MB42 Included	Cap (option)
STOCK	STANDARD Right Handed THUMBHOLE	Carbon fiber Monte Carlo style

COLOR: Coyote [ST-7-107](#)

For each rifle, the ACTION/BARREL/MUZZLE BRAKE
Is available in black or in match color
14 available colors, 2 stock options

CARBON EXPEDITION

CARBON FIBER BARREL / STAINLESS STEEL ACTION

This NEW version of the Expedition model is assembled with our carbon fiber barrel, ideal for magnum calibers, guaranteeing powerful and accurate shots. The Carbon Expedition model is the perfect choice for those looking for performance and comfort in all circumstances.

ACTION	Stainless steel	No integrated bases (available as an option)
BARREL	Carbon fiber	It is made up of a stainless steel barrel which has been thinned to make it as light as possible and then surrounded by several layers of carbon fiber making it very rigid.
WEIGHT	6.75 pounds	The weight is calculated using .300 WIN MAG caliber, 24 in barrel
MUZZLE BRAKE	MB42 Included	Cap (option)
STOCK	STANDARD Right Handed MOUNTAIN LR THUMBHOLE	Carbon fiber Monte Carlo style

COLOR : Phantom [ST-1-101](#)

For each rifle, the ACTION/BARREL/MUZZLE BRAKE
Is available in black or in match color

2 EXPEDITION MODELS

A rifle manufactured with care. Throughout the process, rigorous checks using CMM, air gage and optical comparator are carried out in order to respect very tight tolerances of each component.

MUZZLE BRAKE MB42

Is included

42 angle holes which allow gases to escape around the barrel, side holes the recoil by approximately 50%. The 15 degree forward angle on all holes directs the sound shot away from the shooter.

FEATURES		EXPEDITION	CARBON EXPEDITION
ACTION		Stainless steel	Stainless steel
BARREL		Stainless steel	Carbon fiber

28 Nosler			x	8.5
.300 WIN MAG		x		10
.300 PRC		x		9
.338 LAPUA			x	10

MANUFACTURING & TESTING

THE INTERIOR CUTTING

The cutting of the interior of the action is done with a "wire EDM" wire cutter. This machine makes a cut at 0004, the most precise.

FACTORY CONTROL: Throughout the manufacturing process, we carry out rigorous controls using CMM, air gage, optical comparator in order to respect extremely tight tolerance.

CERAKOTE COATING:

Used on all our models to improve the strength and finish of our parts.

According to SMTP International standards, it is by far the most durable coating against corrosion and scratches on the market. In addition, it facilitates sliding and thus limits wear, while reducing traditional greasing.

ACCURANCY:

Accuracy tests are carried out in our underground shooting range so that each product is certified. Upon delivery, we certify that each gun must have ½ MOA grouping (3 bullets within ½ inch over a distance of 100 yards) with the appropriate ammo.

MATCH COLORS AVAILABLE

The carbon fiber is hand-stretched to provide more rigidity in strategic areas. Carbon fiber is **3X harder** and **50% lighter** than wood, which makes it a component of choice. In addition of being waterproof, resistant and requiring little care. The carbon fiber stock doesn't react to temperature variations. It remains accurate and so there is no unpredictable tensions between the barrel and the stock.

PRECISION & PERFORMANCE

Let me introduce myself, Hugues Vaillancourt, owner of Antler Firearms. We have been manufacturing gun parts for major gun manufacturers for over 30 years.

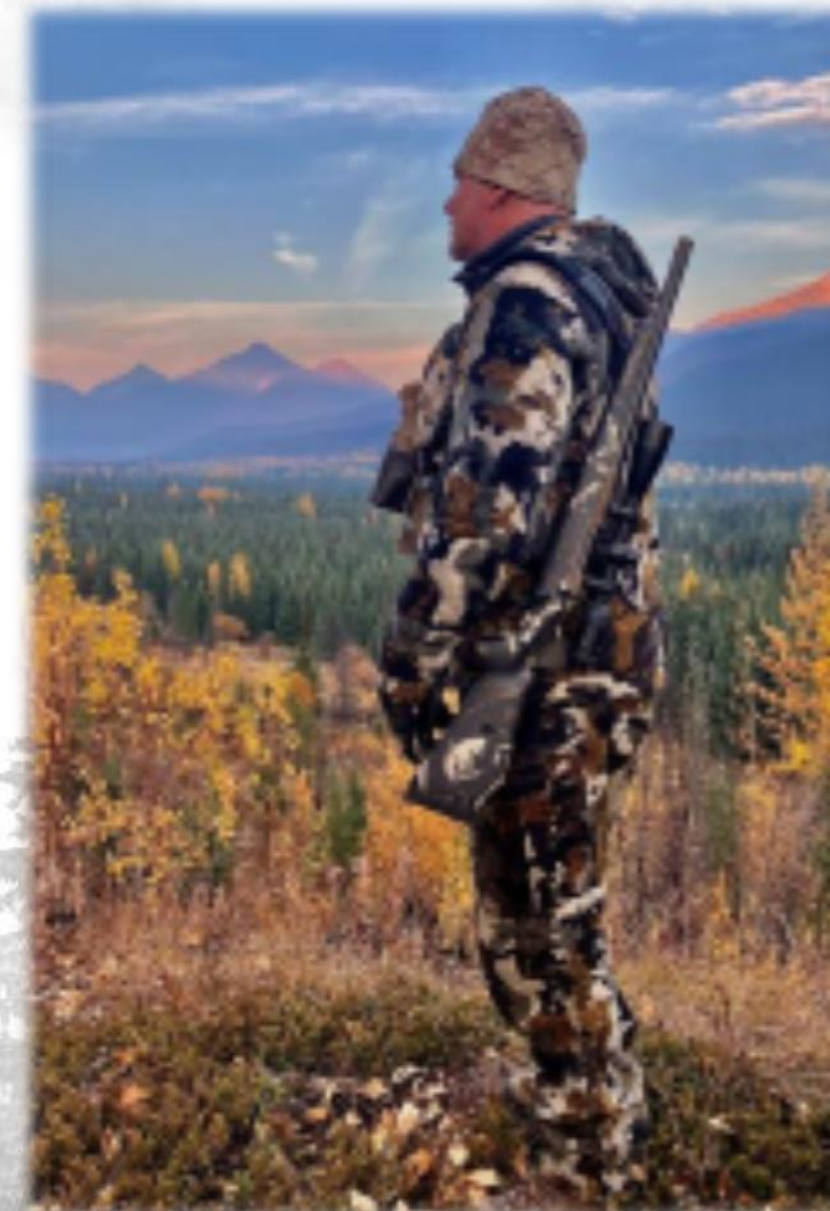

I combined my experience as well as the expertise of my team to design the best rifle on the market. To obtain a high precision rifle, every little detail is important, especially when shooting over long distances.

There are so many external factors that can influence our performance that's why it's essential to trust perfectly your gun. Our rifles are entirely made in Canada: from designing to manufacturing.

Antler Firearms, was created in 2014, under the name Fierce Canada. Following a reorganisation, we changed our name in order to distinguish ourselves from our former American partner Fierce Firearms. We don't produce guns or components anymore for this previous partner.

We are proud to present our ANTLER FIREARMS rifles which are designed and manufactured in Canada.

Hugues Vaillancourt, President

20 INDUSTRIELLE ST, DISRAELI, QC, G0N 1E0
