

ABOUT US

Saccarta Spa, founded in 1948, is one of the main Italian companies specialised in the production of industrial paper bags. Our modern technology, the know-how developed over the years and our client oriented approach, allowed us to affirm our presence throughout all Europe and to be able to offer always a "tailor-made" packaging solution in order to satisfy the specific needs of every customer and every product. All markets, even the more demanding, can be perfectly supplied by Saccarta.

Our keywords are direct contact, service and flexibility: clients are assisted in their decisions with a technical and sales staff able to provide a totally customer-oriented sales service as well as an after-sales service made in local language.

The focus on quality of our work is a core value in our corporate culture and therefore Saccarta was one of the first Italian company who obtained the Certification ISO 9001.

THE FUNDAMENTAL STEPS ON THE WAY TO QUALITY, ENVIRONMENTAL PRESERVATION AND SAFETY:

- 09/11/2018 - FSC® Chain of Custody
- 24/04/2018 - BS OHSAS 18001
- 30/07/2014 - UNI EN 15593
- 07/09/2010 - HACCP
- 21/02/2008 - ISO 14001
- 15/07/1994 - ISO 9001

OUR MARKETS

Saccarta produces paper sacks to contain its customers' products in all the markets. The possibility to make any existing type of paper sacks, combined with the company's know-how, developed over more than 70 years, and the implementation of a very strong Quality System, in complete compliance with European standards and regulations, has allowed Saccarta to affirm a strong presence all over Europe and to supply even the most demanding customers in the markets of:

- Human Consumption
- Animal Feed
- Chemicals
- Building materials
- Seeds

Customers are assisted in their packaging decision to find always a solution that matches and optimizes different needs:

- Quality
- Value for money
- Innovation
- Ease of use
- Safety

OPEN MOUTH BAGS

The most traditional paper bag, largely spread in all industrial fields. Polycoated plies or high-density polyethylene (HDPE) / low-density polyethylene (LDPE) liners, metalised and/or aluminium coated paper can be incorporated for enhanced barrier properties and to enable heat sealing. Different types of special papers (i.e. smooth or gloss) can be used to give greater emphasis to the customer's graphics.

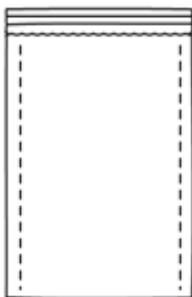

OPTIONAL FEATURES

- Application of internal bottoms: to improve the bag's resistance to dusts and to prevent the product's exit.
- Easy open: integrated tear open strip at the bottom of the bag to easily open the bag and quickly release the content.
- Handle: external bottom can be used also as handle with a charge and transport capacity of approximately 10/15 kg.
- Window: a transparent window made from PE film ensures that bag's contents are visible.
- Zed-folding system: insertion of PE liner, welded on the bottom and longer than the paper, that allows a better filling of the bag and an easier closing.

SPECIFICATIONS

Width: 18 to 72 cm
 Bottom: up to 25 cm
 Length: 25 to 130 cm
 Nr of plies: 1 to 6

PINCH BOTTOM BAGS

Available either with or without gussets, it represents the logic evolution of the sewed bag with remarkable technical and aesthetic improvements. A stable bottom forms as the bag is filled and allows for an attractive product display and an optimal palletisation. A wide range of barrier materials (coated material, laminated or free film between the paper plies) is available to optimally protect the product. Different types of special papers (i.e. smooth or gloss) can be used to give greater emphasis to the customer's graphics.

OPTIONAL FEATURES

- Hot-melt: for heat sealed pinch top closure after filling.
- Hermetic bottom closure: with a thermo-sealed bottom and corners, a tight and hermetic closure is guaranteed.
- Easy open: integrated systems to easily open the bag and quickly release the content.

SPECIFICATIONS

Width: from 23 to 60 cm

Length: from 44 to 127 cm

Gusset: from 2,5 to 11 cm

Nr of plies: 1 to 4

PASTED VALVE BAGS

The most used bag in all industrial fields, designed for high-speed filling. The valve can either be self-closing by the pressure of the product, closed by sticking down, heat sealed or by ultrasonic, depending on the required level of sift proofness and the need for a clean work environment. Valve bags help ensure optimally shaped pallets, due to sturdy bag constructions. Polycoated plies or HDPE films can be incorporated for enhanced moisture protection.

OPTIONAL FEATURES

- Application of internal bottoms: to improve the bag's resistance to dusts and to prevent the product's exit.
- Handle: external bottom can be used also as handle with a charge and transport capacity of approximately 10/15 kg.
- Various de-aeration systems: to reach the maximum high filling speed.
- Easy open: integrated tear open strip at the bottom of the bag to easily open the bag and quickly release the content.
- Easy sealable valve: to hermetically close the valve and to improve product protection.

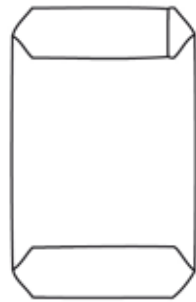

SPECIFICITATIONS

Width: 18 to 72 cm

Bottom/Valve width: 7 to 22 cm

Length: 25 to 130 cm

Nr of plies: 1 to 6

PERFORMANCE POWERED BY NATURE

Nature provides amazing organic packaging solutions that offer great benefits. Inspired by nature's we keep creating our own high-performance packaging solutions – based on natural fibres and designed to meet our customers' needs. Whether those needs relate to moisture protection, safety and ease of use, material efficiency or a long shelf life, we offer innovative, market-oriented solutions that are good for business and good for the environment:

- The main raw material used in our paper sacks is sack kraft paper produced from 100% virgin fibre and sourced from sustainably managed forests in Europe.
- In everything we do, we rely on a wealth of experience and expertise.
- This helps us to strike the perfect balance between performance, efficiency and sustainable development.
- This helps us to strike the perfect balance between performance, efficiency and sustainable development.
- Paper sacks are the right choice for producers and fillers of dry bulk goods: they offer good value for money as packaging solutions and provide effective product protection along the entire supply chain without compromising the quality of life of future generations.

WHY TO CHOOSE SACCARTA

STATE-OF-THE ART PERFORMANCE

We produce all type of industrial bags that can be filled even on the most modern automatic packaging plants: with our bags resistant, planar and airtight, our clients can achieve the maximum filling speed and a perfect palletization.

BEST PAPER AVAILABLE

We use the best papers available on the world market, choosing products with the most appropriate features for the specific use of the bags. Our core business is the production of bags, not the production of the paper, and in the name of this activity we dedicate all our energy and resources.

QUALITY & SERVICE

We submit the whole process of our production, from the choice of raw materials to the transport of our products, to strict quality controls. We have a quality system certified for over 25 years, we guarantee quick answers, excellent service, and made on measure solutions.

EXCELLENT PRINTS

We transform the bag into an efficient marketing tool thanks to the latest generation flexographic technology. Today more and more the packaging plays a significant role at the purchase decision. Very high speed and precision equipment allow us to print up to 10 colours, create runs of any size, increasing the print quality and minimizing waste and machines set-up.

INNOVATIONS

We are always looking for innovative and green solutions for the complete satisfaction of our customers, working in harmony with our stakeholders, using technology and raw materials more efficient and compatible with the environment and work safety.

SUSTAINABLE FUTURE

The attention to the environment that already in 1948 had guided us toward a new product, cleaner, fully and easily recyclable, derived from renewable resources, has grown over the years and we are proud to continue our daily work with a special emphasis on environment and safety. Today with our choices we can make, and we want to make, environmentally-friendly hvdecisions for a sustainable future: our paper sacks offer a unique full package of state-of-the-art performance that is equally in line with customer's packaging needs and environmental sustainability.
