SPECIAL PIE TECHNOLOGY

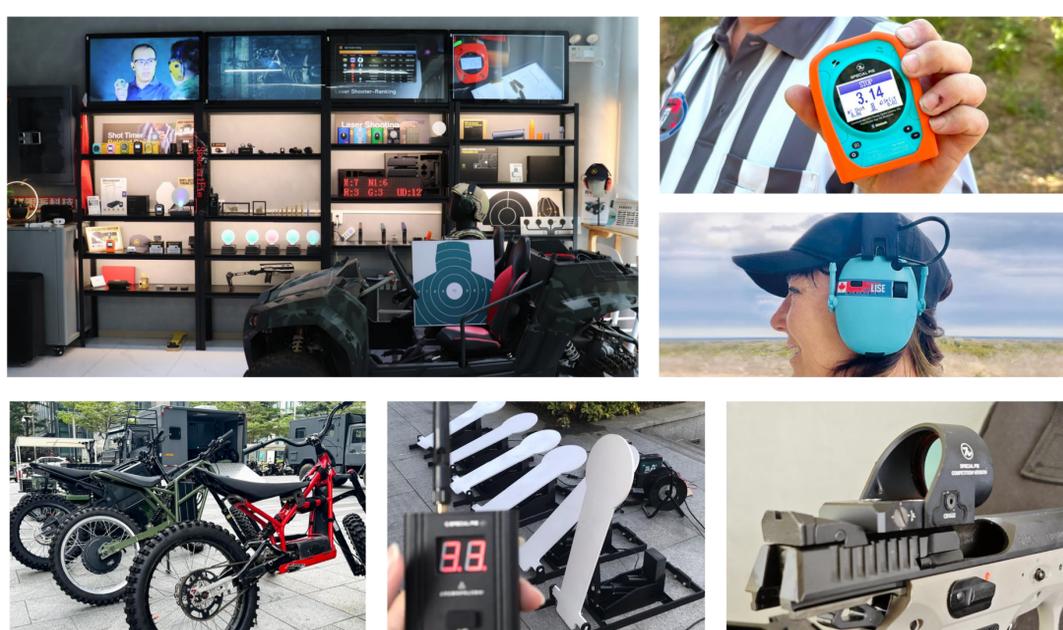

Specia Pie Technology is a leading global developer and manufacturer of shooting training devices for military, law enforcement, shooting competitions and shooting enthusiasts around the world. We have 4 main product series: shot timer and related devices, laser shooting training system, shooting gear and smart range equipment.

LEARN MORE

Each solution leverages advanced technology to foster a safe, professional, and immersive shooting training environment, enhancing marksmanship skills effectively. In particular, our simulation training devices include long-range shooting training systems, firearm simulators, laser-sensing targets, and interactive projection-based laser shooting training systems.

In the laser shooting training systems series, we offer laser bullets, firearm simulators, laser shooting targets, and interactive projection laser shooting training systems. These technology-driven products help improve marksmanship faster than any other alternative.

We are a technology-driven company, and half of our employees are technicians, so when there are problems with the product, we can quickly provide solutions. We have 3 professional shooters in our team, so we are dedicated ourselves to making what the shooters exactly need. We have our own factory, so we can guarantee product quality and order delivery time.

Official Partner of IPSC&IROA

Special Pie is honored to be the official sponsor and equipment provider for IPSC level 4 and level 5 championships around the world. From 2018 IPSC Action Air World Shoot to 2025 IPSC Handgun World Shoot, our technology has been trusted and used throughout the entire competition—reflecting our dedication to precision, innovation, and the spirit of shooting sports.

Recognized on the Global Stage

Special Pie actively participates in major international exhibitions such as SHOT Show (USA), IWA OutdoorClassics (Germany), and other professional defense and shooting expos worldwide. Through these official events, we continuously connect with global partners, stay ahead of market trends, and showcase our commitment to advancing modern shooting training solutions.
