A 3D architectural rendering of a brick building courtyard. The building is a multi-story red brick structure with several rows of windows. The ground floor features a series of arched windows. In the foreground, there is a paved courtyard area with a cobblestone pattern. A man in a yellow jacket is sitting on a dark, rectangular, low-profile bench. Next to him is a modern, circular, flat-topped table on a single leg. To the right, another similar table is visible. A woman in a white coat is standing near the corner of the building. The sky is blue with some clouds.
