

Attic MDR

24/7 security and response to suspicious activities in your Microsoft 365

Microsoft 365 security is only effective if you notice and investigate suspicious behavior.

Cybersecurity is not just about having the right tools, but also about effective incident handling when an alarm goes off. Regulations such as NIS2 require companies to demonstrate that they detect cyberattacks and respond quickly. Attic takes care of this. We monitor your Microsoft 365 environment 24/7 and follow up on alerts for you.

With Managed Detection & Response (MDR) we respond directly to suspicious activities.

You have a team that monitors your digital workplace 24/7 for cyber threats. This way we proactively prevent damage by hackers, such as:

- 🚨 Creating hidden admin accounts for persistent access
- 🚨 Disabling log files to erase their tracks
- 🚨 Sending fake invoices to your customers
- 🚨 Copying your business data to their own servers
- 🚨 Launching ransomware attacks from your system

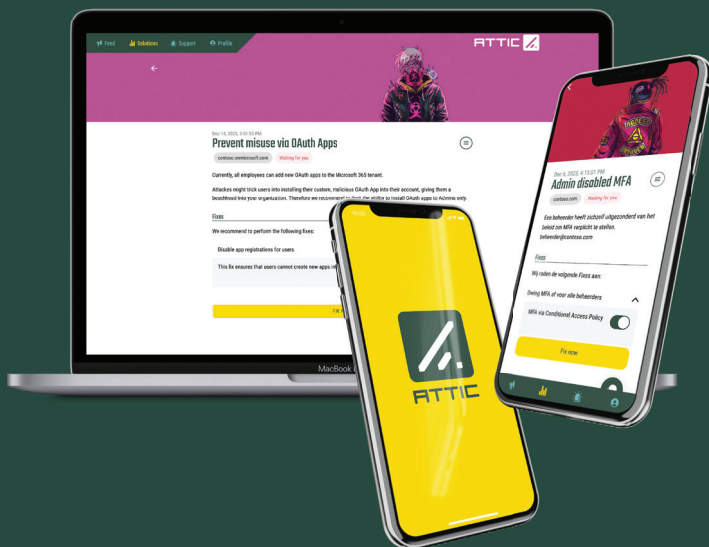

Fortunately, this does not have to happen if your login security is in order.

Attic MDR monitors your digital workplace 24/7 and intervenes immediately.

Attic MDR continuously and largely automatically checks whether suspicious activities are taking place in your Microsoft 365 environment, the cloud, and on devices such as laptops, desktops, and smartphones.

Do we see something suspicious? We act directly and automatically to stop the hackers. This prevents criminals from causing financial damage and lasting reputational harm.

What protection is included in Attic MDR?

Protection against phishing

- ✓ Real-time detection of fake Microsoft365 login pages
- ✓ Warning with red alert screen on fake pages
- ✓ Authenticity seal on genuine Microsoft365 login pages
- ✓ Push notification in the app when a colleague visits a fake page

Protection against login attempts by hackers

- ✓ Monitoring of all Microsoft365 login activities
- ✓ Detection of suspicious login attempts (who, where, how often)
- ✓ Push notification of suspicious login activities

Online security awareness training

- ✓ Focused on recognizing risks

Automatic security control updates

- ✓ Daily check of Microsoft365 security settings
- ✓ Automatic fixes for security problems
- ✓ Checks based on international security standards (CIS)
- ✓ Monitoring to ensure security settings remain correct
- ✓ Monitoring of all Microsoft365 login activities
- ✓ Detection of suspicious login attempts (who, where, how often)
- ✓ Push notification of suspicious login activities

24/7 monitoring & incident handling

- ✓ Real-time monitoring of your cloud, devices, emails, files, Teams, admin activities, and suspicious network connections
- ✓ Immediate automated action as soon as something suspicious happens
- ✓ Long-term storage of logs for forensic investigation
- ✓ Support for mandatory NIS2 compliance

Attic App

- ✓ Receive notifications and authorize fixes wherever you are

€ 300 /month

Incl. 100 users, +€1 per extra user

Cybersecurity made in Europe

Data protection, regulatory compliance, and cultural alignment.

Affordable security through automation:

Efficiency and scale without high costs.

Attic LAB

Developed by hackers and engineers, focused on automation and research.

Focused on Microsoft 365

Maximum protection for the platform against (BEC, data leaks, extortion).

Who is Attic MDR suitable for?

- SMEs with a Microsoft 365 environment
- SMEs without their own IT department
- SMEs concerned about hackers, phishing, payment fraud, and ransomware
- SMEs wanting insight into who logs in when
- SMEs that want to detect suspicious login attempts

WE ARE
ATTIC SECURITY

A product-driven security company for SMEs.
Founded by hackers and engineers.

We are rewriting the rules of cybersecurity operations. No jargon, no clutter, just smart and scalable protection where it is needed most.
