Meet MTG & Connect with Us

Leading the way in advanced encryption technologies “Made in Germany”, MTG delivers trusted security solutions for organizations. With the MTG ERS® platform, the management of cryptographic keys and digital identities is simplified for organizations in both the private and public sectors.

Comprehensive by design, the portfolio includes CLM, PKI, KMS, and HSM integration from leading manufacturers – available as cloud, managed, or on-premises solutions.

Pioneering post-quantum cryptography, MTG combines research with standardization expertise. The results are translated into market-ready solutions that protect sensitive data and electronic signatures against quantum computers in the long term. MTG is certified according to ISO 27001 and ISO 9001.
