

INDEVIS SHORT PROFILE

indevis IT-Consulting and Solutions GmbH, certified with the international standard ISO/IEC 27001, has been providing IT security, datacenter and network solutions to companies of all sizes and in diverse sectors since as early as 1999. In doing so, indivis fully meets the demands and requirements set out by the economic sector and public authorities and higher education institutions. As one of Germany's leading Managed Security Service Providers (MSSP), indivis is the ideal partner to all kind of organizations in the fields of IT security, network and datacenter technology.

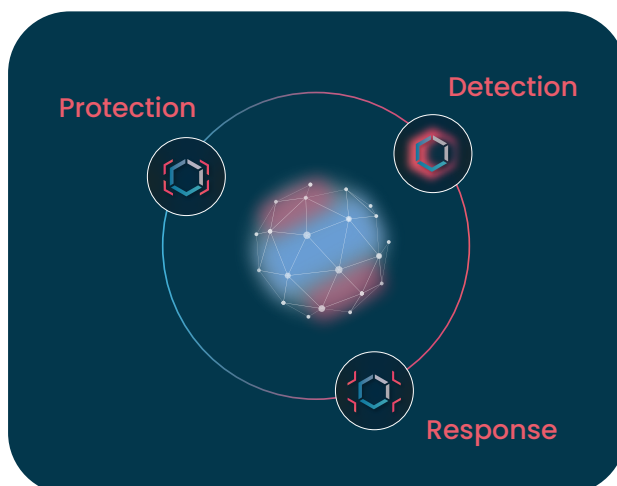

indevis regards itself as a partner to our customers with the goal of offering solutions for secure networks, taking on complicated network functions and reducing IT complexity with intelligent solutions. All of this is safeguarded by professional management and support services.

indevis is not only represented in Munich and the surrounding area: Our employees are active at locations throughout Germany.

MANAGED SECURITY SERVICES

Managed security services are an interesting and intelligent alternative to inhouse operation of IT security and network solutions. With this option, specific IT security and network services are rendered from our data centers or are relocated to the indivis data centers, where they are professionally managed and supported by certified experts. We have been providing our clients IT security and network services with the highest levels of security since 1999 with our managed security services.

VENDOR PARTNERS:

ISO/IEC 27001 CERTIFICATION

The TÜV SÜD has certified the information security management system (ISMS) of indevis GmbH according to the international standard ISO / IEC 27001. The certification covers all IT systems and processes required for the provision of the Managed Security Services as well as the two datacenters, including the network and communication links provided to clients.

Indevis GmbH aims to provide managed security services and outsourcing services at the highest level at all times. That is why we decided to be certified in accordance with the international standard ISO / IEC 27001, which enables us to deal with the topic of IT security in a particularly practice-oriented manner and to continue to continuously increase the level of security.

CONSULTING & PROJECT SERVICES

Our experienced consulting team analyzes your requirements together with your representatives, and recommends appropriate solutions and measures – independent of vendor, if so required.

For Palo Alto Networks customers we offer security analyses, health checks and configuration audits. We have different service packages to meet your range of requirements that ensure that you derive the greatest benefits from the implementation.

If you would like to know the status of your management system, or are planning the introduction of an information security management system (ISMS) according to ISO27001 or the TISAX® standard (developed for the automotive industry), our IT compliance consultants offer specialist advice. Of course, we also support you in preparing for an upcoming TISAX® audit.

TECHNICAL SUPPORT

indevis offers extensive support services compliant with the ITIL standard for our products and solutions. We are at your side with our competent indevis technical support service whenever you have a technical issue. Each incident is assigned a trouble ticket for documentation and tracking. The latest processing status of an incident can be retrieved at any time using the ticket number.

TRAINING & WORKSHOPS

Our training course programs are always coordinated in alignment with the customer's requirements. We offer hands-on training at the client's site or at our indevis premises. Vendor instruction and training courses at the licensed training center with certification upon course completion are the final touches to our offering.
