SHUTTERBOX Shutter Systems

Shutterbox Shutter Systems are monoblock shutter systems that are applied on windows and do not exceed to the exterior surface of the building. Shutter System are being consisted of 3 box systems with different sizes to provide coverage for different areas. Shutterbox system are as follows:

155 mm Shutter Box
195 mm Shutter Box
220 mm Shutter Box

SHUTTER SYSTEMS

Shutter Systems provides protection from sun light and adds more value to the structural harmony of the building. It offers 22 different color options.

GUILLOTINE SYSTEMS

Guillotine systems are vertical sliding systems that provide flexibility to narrow areas such as kitchen and roof, as well as providing this kind of flexibility it also adds more value to the structure. Optionally the system itself can provide two separate sashes to be moved individually or it can allow sashes to be positioned as of tilt and turn system. The system is adaptable with 5mm, 20mm and 24mm window width. With 22 different colors, it provides creative solutions to your architectural and decorative needs.
