

ENGINEERED
FOR
EXCELLENCE

THE IDP STORY

For over six decades, IDP has been on a mission to redefine performance gear for tactical and outdoor professionals. With a global footprint, we have established ourselves as a leader in high-performance equipment, delivering cutting-edge solutions built for the most demanding conditions.

Our expertise lies in working with contemporary solutions such as membrane-laminated fabrics, flame-retardant textiles, and advanced seam-sealing technologies. Designed to endure extreme environments, our gear empowers users to achieve their goals with confidence.

By combining advanced engineering with an unwavering commitment to quality, we meet the rigorous demands of defense forces and outdoor adventurers alike. Our sustainable approach—utilizing Oeko Tex-certified materials and waste optimization—reflects our responsibility toward the environment. As we push the boundaries of innovation and reliability, we remain dedicated to equipping our partners for success in every mission.

WHERE PRECISION MEETS PERFORMANCE,
AND EVERY CHALLENGE IS AN OPPORTUNITY
TO EXCEL.

ENGINEERING EXCELLENCE EVERYDAY

PROVEN RELIABILITY

Decades of expertise in manufacturing for extreme conditions.

SCALABLE PRODUCTION

A robust infrastructure capable of handling bulk orders with uncompromised quality.

INNOVATION DRIVEN

Advanced material science and engineering capabilities to push the limits of performance.

PARTNERSHIP-CENTRIC APPROACH

We collaborate closely with clients to understand their unique needs, delivering beyond expectations.

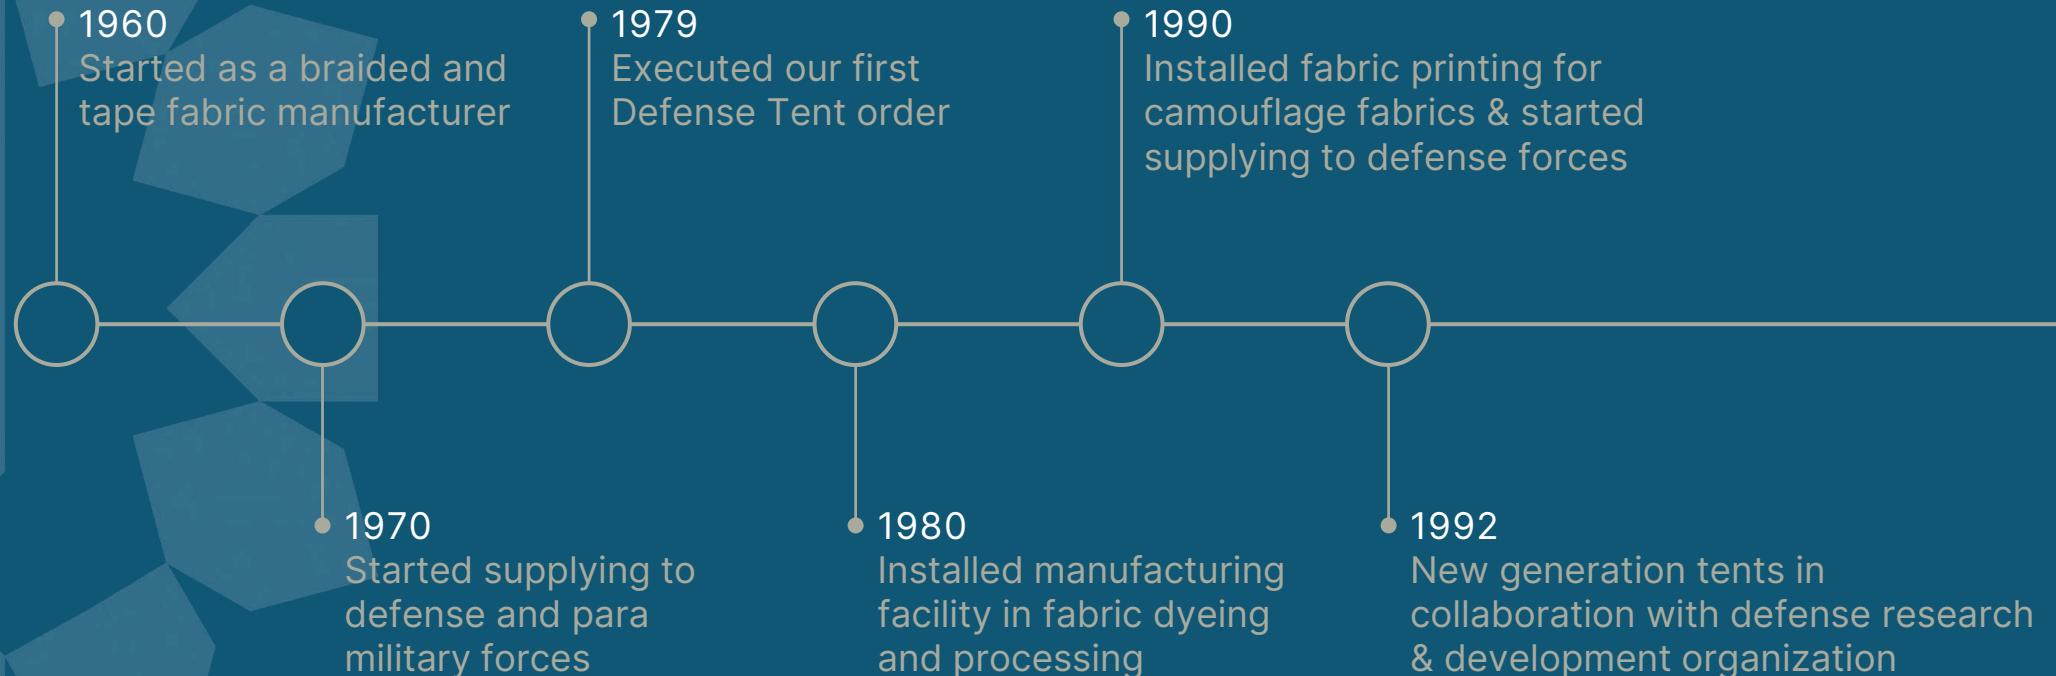

SCALE &
GLOBAL
IMPACT *

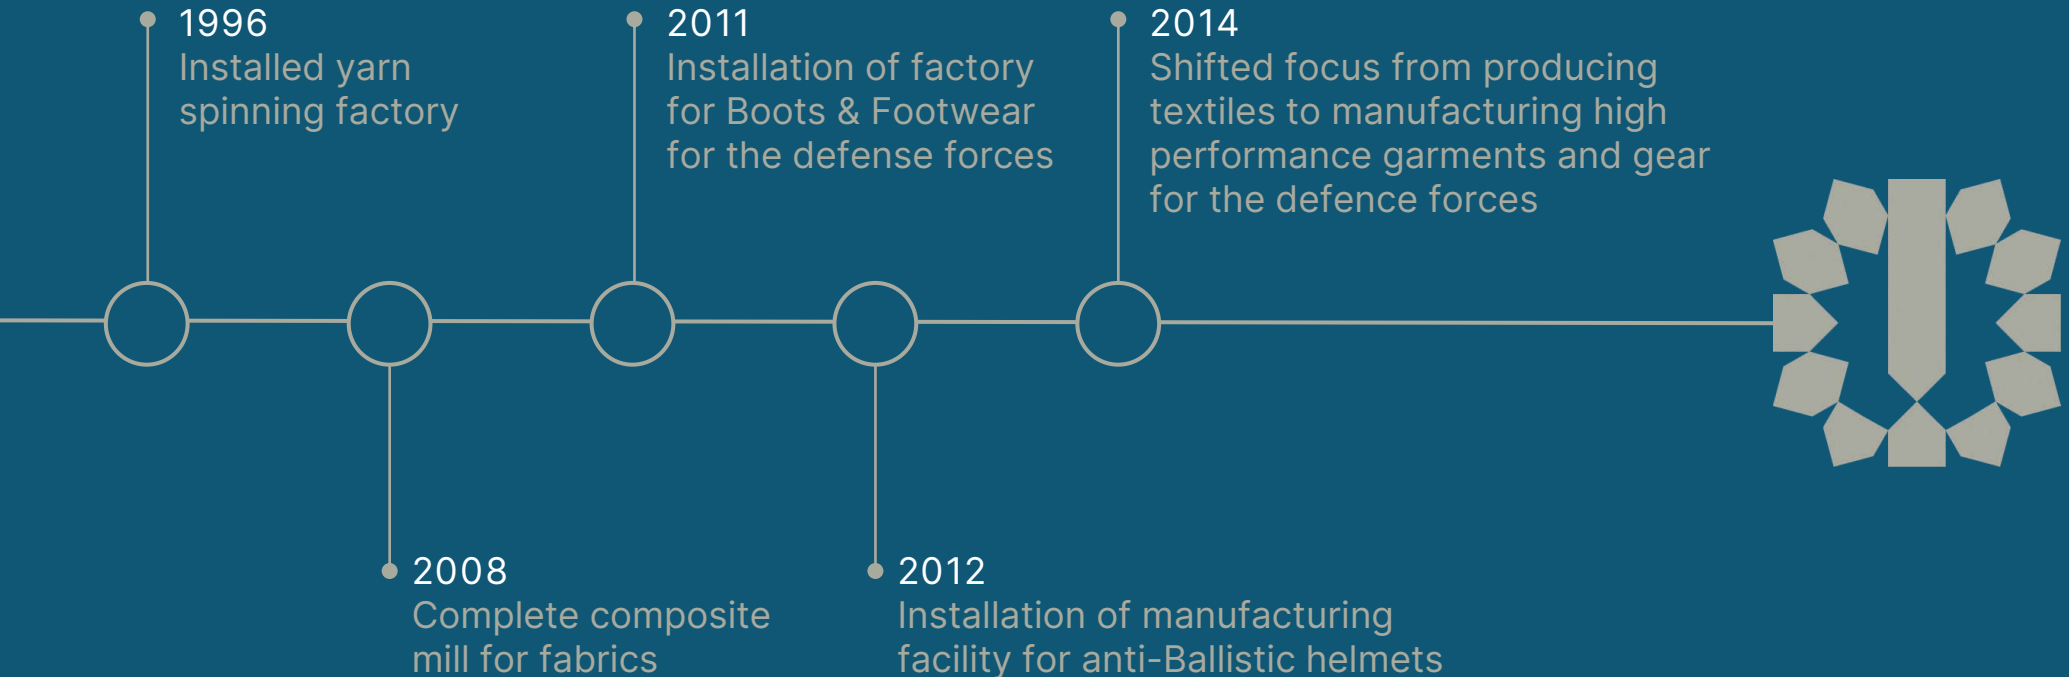

A TIMELINE OF EXCELLENCE

For over six decades, IDP has been at the forefront of crafting high-performance tactical and outdoor gear. Our journey is a testament of quality, resilience and an unwavering commitment to excellence.

From humble beginnings to becoming a global partner for defence forces and renowned brands, we've continuously evolved—pushing the limits of durability and reliability.

We have the capacity to handle large-scale bulk orders while maintaining our commitment to quality and on-time delivery.

Our streamlined production processes, supported by state-of-the-art manufacturing facilities and advanced materials like membrane-laminated fabrics and UV-resistant textiles, ensure durability at every stage leading to lower life cycle resource demands.

FROM
VISION
TO
REALITY

OUR PROCESS

Transparency is at the core of our process. Clients have full visibility into every stage of manufacturing, because we believe in building not just gear, but trust.

Requirement Analysis

We closely analysing client-provided tech packs to understand the goals and challenges

Material Selection

Materials are carefully chosen based on requirements and environmental conditions

Prototyping & End User Trials (EUT)

Prototypes undergo extensive testing and real-world trials for validation

Final Specifications & Batch Production

Once approved, we scale production with precision & consistency to meet bulk order requirements

Stringent Quality Checks

At every stage of production, rigorous quality control ensures global standards and client expectations

PRECISION
IN
EVERY
DETAIL

BREAKTHROUGH TECHNOLOGIES

By integrating cutting-edge technologies and advanced material sciences, we engineer gear that redefines durability, adaptability, and performance.

ULTRASONIC SEAM SEALING

Seams with Zero needle holes for applications requiring zero tolerance for Air/Water penetration.

STITCH SEAM SEALING

Mandatory garmenting requirement to ensure water/air ingress prevention in products exposed to the elements.

BAR TACKING & PATTERN MAKING

Strengthens stress points and improves durability of the precision crafted designs.

SINGLE & MULTI NEEDLE FRAME QUILTING

Provides flexibility between high volume quilting production and versatility of quilting designs.

VULCANISATION PROCESSES

Enhances material strength of natural/synthetic rubber-based products for better elasticity and resistance to weathering/surfactants exposure.

THERMACORE: INNOVATIVE INSULATION

ThermaCore is a proprietary synthetic insulation designed for optimal warmth, moisture resistance, and quick drying. Mimicking the loft of natural down, its microfiber blend traps heat efficiently, while the quick drying ensures faster reversion to thermal insulation performance.

Lightweight & compressible, ThermaCore is the ultimate choice for outdoor adventures.

ADVANCED MATERIALS FOR ENHANCED DURABILITY

We refine and optimize them to amplify functionality, and user experience. Our material advancements enable gear that performs reliably across the harshest conditions.

Inherent Flame
Retardant Fibers

Breathable
Membranes

3-Layer Laminated Fabrics

OUR
DUAL
EXPERTISE

ENGINEERED FOR EXCELLENCE

At IDP, we engineer high-performance gear for two demanding sectors; Tactical & Outdoor. Whether it's mission-critical military applications or rugged outdoor expeditions, our products are built to perform under the harshest conditions.

TACTICAL

From high-performance uniforms to modular tactical loadouts, our solutions align with the specialized needs of global defense forces, security agencies, and special ops teams.

OUTDOOR

Inspired by our expertise in tactical products, our outdoor gear is engineered for functionality and durability, ensuring peak performance. From extreme weather protection to lightweight solutions for mobility, we provide products designed to exceed the expectations of leading outdoor brands.

 IDP
TACTICAL

IDP Tactical gear is engineered for military and defense professionals who operate in high-risk environments. Our designs ensure protection, agility, and adaptability in extreme and unpredictable conditions.

Mission-Ready Durability

Gear that withstands the toughest terrains, impacts, and weather conditions.

Advanced Protection

Extreme weather protection, flame-retardant, and stealth technologies for uncompromised safety.

Ergonomic Performance

Engineered for mobility, comfort, and long-hour endurance.

Custom-Built for Operations

Configurable solutions tailored to unique tactical needs.

RUCKSACKS RANGE

Built for heavy-duty use, these spacious rucksacks offer superior comfort and durability for extended outdoor expeditions.

Available Sizes:

- 90 Liters Assault Pack with detachable day pack
- 70 Liters Patrol Pack with light weight alloy load frame
- 40 Liters Assault Pack with multi MOLLE system for load configuration flexibility

Key Features:

Durable Construction

Comfortable Carry System

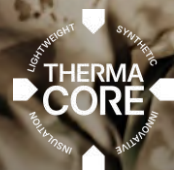

Water Resistant

Hydration Compatible

Testing Standards:

SLEEPING BAG RANGE

PROTECTION
UP TO
-50°C

Engineered for the harshest conditions, these bags prioritize warmth and protection in sub-zero temperatures, ensuring survival in the most demanding environments.

Available Bags:

Lightweight Patrol Sleeping Bag
3-Season Modular Sleeping Bag System
Extreme Cold Weather Sleeping Bag

Key Features:

Lightweight, Water-resistant Shell

Full-length Zipper

Mummy-style Design

ThermaCore Insulation

Testing Standards:

INSULATED JACKETS & TROUSERS

Engineered to provide warmth and flexibility, these garments are built for the most demanding cold-weather environments, this system prioritizes warmth and protection without sacrificing mobility.

Available Products:

All Season Tactical Jackets & Trousers
Extreme Cold Weather Jackets & Trousers

Key Features:

ThermaCore Insulation

Compatible With Body Armor

Storm Flap Zippers

Large, Insulated Hood With Fur Ruff

Testing Standards:

FIREFIGHTING OVERALL

Heavy-duty overall designed to provide maximum protection & mobility for firefighters operating in extreme conditions. Made with flame-resistant materials and featuring a range of design elements for optimal performance and safety.

Available Products:
Fire Retardant Full Zipper Suit

Key Features:

Flame & Heat Resistant Material

Flame Resistant Heavy-duty Front Zipper

Optional Attachment Points

Ergonomic Design

Water-resistant & Breathable

Added Adjustable Suspenders

Testing Standards:

RAINWEAR JACKETS & PONCHOS

Designed to keep you dry in the harshest weather, these rainwear options offer full protection without compromising mobility.

Available Products:

Tactical Rain Jacket
Tactical Rain Poncho

Key Features:

Adjustable Hood With A Stiffend Brim

Zippered Underarm Vents

Adjustable Cuffs

Durable, Water Repellent DWR Coating

Testing Standards:

MVTR

Moisture Vapor Transmission Rate

A green and yellow multi-spectral camouflage tent is pitched in a dense forest. The tent's pattern blends with the surrounding trees and foliage. Sunlight filters through the tall, thin trees in the background, creating a misty atmosphere.

MULTI - SPECTRAL CAMOUFLAGE NETS

Advanced camouflage systems engineered to conceal military assets from detection in modern warfare scenarios. Provides superior concealment compared to traditional camouflage effective against thermal imaging, radar, and near-infrared sensors.

Available Types:

Multi-Spectral Camouflage Nets
Synthetic Camouflage Nets

Key Features:

Visual Camouflage

Radar Cross-Section Reduction

Thermal Signature Reduction

Near-Infrared (NIR) Signature Reduction

Testing Standards:

MIL PRF

53134

IDP
OUTDOOR

IDP Outdoor is designed for adventurers, explorers, and outdoor professionals who demand gear that performs in any terrain, any climate, any challenge. Whether it's mountaineering, hiking, or extreme weather expeditions, our products are built to protect, enhance performance, and maximize comfort.

Weatherproof Protection

Waterproof, windproof, and insulated designs for all climates.

Adaptive Fit & Comfort

Ergonomic designs for unrestricted movement. From technical outerwear to specialized expedition gear, IDP Outdoor caters to adventure brands, outdoor retailers, and global explorers who seek the best in performance and durability.

Lightweight Strength

Advanced materials for high durability without excess weight.

RUCKSACKS RANGE

Lightweight, ergonomic backpacks with load-bearing frames, designed for durability and optimal weight distribution in high-altitude treks.

Available Sizes:

90 Liters Assault Pack

70 Liters Patrol Pack

40 Liters Assault Pack

Key Features:

Adjustable Load Distribution Shoulder Straps

Rain Cover included

Durable nylon fabric with water resistant coating

Multiple Compartments & Pockets

Testing Standards:

SLEEPING BAG RANGE

PROTECTION
UP TO
-50°C

Lightweight, ergonomic backpacks with load-bearing frames, designed for durability and optimal weight distribution in high-altitude treks.

Available Bags:

Trek Lite Sleeping Bag
Explorer 3-Season Sleeping Bag
Arctic Survivor Sleeping Bag

Key Features:

Lightweight, water-resistant shell

Oversized Insulated Hood

Mummy-style design

ThermaCore Insulation

Testing Standards:

JACKET & TROUSER RANGE

A versatile, high-performance insulated jackets & trousers designed for a wide range of outdoor activities and conditions.

Available Products:

Alpine Pro Insulated Jacket
Summit Series Insulated Parka

Key Features:

ThermaCore Insulation

Multiple Pockets

Waterproof, Windproof Nylon Fabric | DWR Finish

YKK® zippers

Testing Standards:

HIGH-ALTITUDE RAINWEAR

Designed to keep you dry in the harshest weather, these rainwear options offer full protection without compromising mobility.

Available Products:

Trailblazer Rain Jacket
Mountain Guard Pro Rain Jacket

Key Features:

Adjustable hood with a stiff brim

Elasticated Cuffs & Adjustable Hem

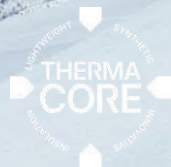

Multiple Waterproof Pockets

Water Repellent DWR Coating

Testing Standards:

BASELAYER THERMALS

Moisture-wicking, antibacterial fabrics that keep you dry and protected, ideal for long wear in cold environments.

Available Products:

Lightweight Base-layer Top & Bottom
Midweight Base-layer Top & Bottom

Key Features:

Lightweight Polyester Fabric

Flatlock & Overlock (Serge) Seams

Ergonomic Fit

Raglan sleeves

Testing Standards:

TAILORED
TO
MEET YOUR
NEEDS

CUSTOMIZATION

At IDP, we understand that no two missions or outdoor expeditions are the same, which is why we offer highly adaptable, client-specific gear solutions that align with unique operational and performance requirements. Whether it's adjusting materials, refining product dimensions, or integrating advanced functional enhancements, our customization ensure that every product is tailored for maximum efficiency & reliability.

DIMENSION & FIT

Custom sizing and ergonomic designs to ensure the perfect fit for diverse applications.

RAW MATERIAL SELECTION

From ultra-lightweight, high-strength fabrics to flame-retardant and waterproof materials, we source and refine the best to match exact client needs.

FUNCTIONAL ADD-ONS

Integrated modular attachments, reinforced stress points, advanced insulation, and other enhancements that elevate performance.

A satellite view of Earth from space, showing the Middle East and surrounding regions. The Earth's curvature is visible on the left, with a bright light source (the sun) creating a lens flare effect over the Persian Gulf. The landmasses are shown in shades of brown and green, while the oceans are dark blue. City lights are visible as yellow and orange specks, particularly in the Middle East and East Africa.

OUR CORE VALUES

At IDP, our values are the foundation of everything we create. From cutting-edge technology to responsible manufacturing, we push the limits to build gear that performs, protects, and prevails in real-world conditions.

We innovate boldly, commit fully, perform relentlessly, and build sustainably—so our partners and their gear never fail when it matters most.

INNOVATION

Our relentless focus on precision and attention to detail ensures that every product is tailored to meet the exact needs of our clients, reflecting a deep commitment to their success.

PERFORMANCE

We leverage cutting-edge materials, advanced production technologies, and rigorous research to manufacture products that redefine industry benchmarks in durability, functionality, and quality.

DEDICATION

Engineered for reliability, our gear is built to perform in the toughest conditions, empowering defence forces and outdoor brands with solutions they can depend on in every environment.

STRATEGIC VISION & FUTURE OUTLOOK

At IDP, our mission is to be the trusted manufacturing partner for defense services and leading outdoor brands. With a legacy of resilience and precision, we specialize in designing, manufacturing, and delivering high-performance gear that empowers professionals and meets the challenges of today and tomorrow.

THE FUTURE OF GEAR

We are dedicated to advance engineering, and production technologies to create gear that meets evolving demands. From integrating smart textiles to refining performance-driven fabrics, our focus remains on pushing the boundaries.

EXPANDING GLOBAL REACH

With a growing network of industry-leading partners, we are expanding our footprint to serve more brands across the world. By strengthening our manufacturing capabilities and optimizing supply chains, we ensure seamless delivery and support.

LONG-TERM CLIENT PARTNERSHIP

We are committed to providing tailored solutions that align with client needs, adapting to market shifts, and maintaining the highest standards of quality and reliability.

A SUSTAINABLE TOMORROW

As we evolve, we are investing in eco-conscious materials, waste-reducing manufacturing processes, and responsible sourcing practices to create gear that not only performs but also respects the planet.
