-  **Registered company with the MAPA.**
With a perfect score!
-  **100% humanized service on WhatsApp!**
-  **Free guidance with our Animal Scientist.**
-  **BEST PRICE on the market.**

Technology

With a million-dollar investment in technology and infrastructure, Dog Natural Food has established itself in the market by producing and selling 100% natural food for dogs. We use different technologies in our production:

- Sous-vide for frozen diets, which involves vacuum cooking at controlled temperatures, ensuring texture, flavor, and preserving the nutrients of the food.
- Autoclave for non-frozen diets, a high-pressure cooking technology that retains nutrients and fully sterilizes the food, making it safe for up to 1 year while sealed.

Thousands of customers served monthly! Join numerous tutors who have chosen the best that technology can offer in the production of Natural Food for dogs.

"My pet has been using natural food from Dog Natural Food for 6 years. I highly recommend it! They provide tasty food with the right nutrients and vitamins for your pet. Not to mention the convenience!" Consumer review on Google.

Why do we have the best price?

A Dog Natural Food is a manufacturer! This gives us autonomy and important strategic advantages:

- We negotiate directly with suppliers, ensuring the best prices.
- We invest in technological solutions to optimize processes and reduce costs.
- We save on storage and logistics, as we control the entire chain.
- We reduce operational expenses while maintaining efficiency at each stage.

All of this allows us to offer the best market price without compromising the high quality of our natural food.

Additionally, the entire process – from production to quality control and traceability – is done internally, ensuring more food safety and trust for you and your pet.

This commitment to excellence has made us a registered brand with MAPA, with the highest rating in evaluation!

High-tech equipment used for the manufacturing of Dog Natural Food products.

The Natural Feeding from DOG has several benefits!

In addition to being healthier, natural food does not contain colorings, preservatives, and has more than 70% moisture. Furthermore, it can be fully customized to meet your dog's specific needs!

DOG's natural food can also assist in the treatment and improvement of conditions such as:

Acid tear

Evolução de @ciscao_maltes, após alguns meses se alimentando com Dog Natural Food.
