

THE FORESCOUT ADVANTAGE

- ✓ Vendor & Device Agnostic
- ✓ Real-Time & Continuous
- ✓ Managed & Unmanaged Devices
- ✓ Deployment Flexibility
- ✓ Proven at Scale
- ✓ Universal Zero Trust Network Access

AWARDS

GARTNER® PEER INSIGHTS™

“Threat detection with an edge!”
IT Services, Travel and Hospitality
\$500M - \$1B USD

“ForeScout is an awesome tool to identify assets that are not in compliance!”
IT Services, Travel and Hospitality
\$500M - \$1B USD

“Entirely adaptable and incredibly flexible.”
IT, Manufacturing
\$500M - \$1B USD

The Forescout Vistaro Platform™

The Forescout Vistaro Platform™ delivers Universal Zero Trust Network Access, OT security, and continuous exposure management over all managed, unmanaged, and agentless assets across IT, OT, IoT, and IoMT environments. For more than 20 years, Fortune 100 organizations, government agencies, and large enterprises have trusted Forescout as their foundation to manage cyber risk, ensure compliance, and mitigate threats.

KEY PRODUCTS AND SOLUTIONS

Network Security	OT and CPS Security	Exposure Management
Enables zero trust by continuously monitoring all assets and enforcing least privilege access.	Protects industrial operations with real-time monitoring and threat detection.	Real-time risk scoring and vulnerability assessment across all cyber assets.
Centralized policy engine automates security controls and threat quarantine.	Maintains operational integrity while ensuring regulatory compliance.	Prioritize remediation with automated compliance and security tracking.

USE CASES

Network security OT & CPS Security Medical Device Security	Access Control Network Segmentation Exposure Management Post-Quantum Cryptographic Risk	Universal ZTNA Secure Remote Access Automated Compliance

PRIMARY DRIVERS & BUSINESS OUTCOMES*

Mitigating Growing Cybersecurity Threats	Enhanced security posture with continuous visibility and control across all connected devices reduces the risk of breaches and cyber incidents. The average cost of a breach in 2025 is ~\$5M (\$5M x 40% reduction with Forescout = \$2M in savings)
Meeting Regulatory Compliance Requirements	Simplified audit processes and automated compliance reporting reduces the time and effort needed to prepare for audits and lowers the risk of non-compliance penalties. Reduce time to remediate out of compliances devices by 99.41% (100 devices per year saves (at \$75/hr) = \$1.275M per year)
Optimizing Existing Investments	Speed up incident response and improve the effectiveness of other security tools through contextual data enrichment and increased visibility across IT, OT, IoT, and IoMT environments. Estimated 34% reduction in MTTR (~\$400 per incident reduction x 250 incidents = \$100K per year)
Improving Operational Efficiency	Streamlined security workflows and automated asset management reduce manual discovery, audit and enforcement, all of which are labor intensive. Estimated 392% ROI (~\$6.8M) over five-year period

* For demonstrative purposes, results may vary based on size and complexity of the organization. Based on an enterprise with 30,000 employees and 43,000 devices, results may vary based on size and complexity of the organization.
