

Fensterbau Frontale 2026: Nice and elero present cutting-edge innovations for sun shading and smart living

*From a new range of radio transmitters to fully integrated home management solutions -
Nice makes everyday life infinitely more convenient, comfortable and sustainable.*

Oderzo (Italy), Schlierbach (Germany) - September 2026 - Breaking ground with pioneering advancements in sun shading and smart home technologies, [Nice](#), a global provider of home management solutions, and elero - Sun Shading Solutions, its German business unit, are taking centre stage at **Fensterbau Frontale 2026**. The world's leading trade fair for windows, doors and façades will take place from **24 to 27 March** at the **Nuremberg Exhibition Centre**, setting the perfect backdrop for unveiling the Group's latest innovations from both entities to an eager audience of industry specialists.

Innovative Drives and Transmitters for Sun Shading Solutions

Among the highlights are the remarkable features of the elero drives, boasting innovations such as the **super-quiet whisper mode** and the **silent soft brake** of the **RoIMotion series**, as well as the **intelligent obstacle detection**, which automatically stops the drives to prevent damage if the roller shutter encounters an obstacle while moving or freezes. The drive manufacturer will be presenting its extensive, high-quality product portfolio for every application - from textile sun protection to external venetian blinds and roller shutters with emergency manual operation. When it comes to transmitters, the spotlight is on the new **elero Son series**, in which **elegance meets functionality** thanks to their thoughtful design. The Son transmitters feature large, raised buttons for comfortable operation, and depending on the model, the slider function allows for precise light and blinds control. Intuitive and easy to program, the mini, wall, and hand-held transmitters come in two elegant colours - white and silver - and have a magnetic wall bracket.

Home Management Solutions Ecosystem

Fensterbau will also be the stage for **Yubii Home Pro** – cornerstone of the Nice smart home ecosystem. Able to control simultaneously over 200 connected devices for a smart, secure and sustainable environment, this gateway **redefines the user-home interaction**, enabling the creation of tailored scenarios across various domains such as access control, security system automation, climate regulation, lighting, sun shading solutions, and appliances.

Offering compatibility with more than 10,000 devices thanks to Zigbee and Z-wave integrated protocols, it stands out as a multifunctional hub **giving customers the choice of integrating into the system their products of preference**, unlocking limitless living scenarios. The system is wireless and therefore suitable for every home, allowing for the flexibility of using it starting from a room into the whole home.

Yubii Home Pro is accessible remotely through the new **Yubii Home App**, recognized with an innovation award at R+T 2024. **Intuitive and user-friendly**, it offers a modern and rewarding user experience. Users can easily and quickly control blinds, gates and garage doors, lighting,

temperature, and security systems with a single touch, and real-time consumption data provided by the **Energy Assistant** contributes to promoting cost savings and sustainable living.

The app also brings significant **improvements for installers in terms of intuitiveness, convenience, and optimization of time and resources**, allowing them to set and configure scenarios with a tap on their smartphones without the need for a PC. Step-by-step guides and product photos facilitate easy and quick installation.

Nice

Nice was founded in the early 1990s and is a leading global provider of home management solutions. The group's comprehensive offering includes integrated automation solutions for gates, garage doors, solar shading, parking systems, wireless alarm systems and building security for residential, commercial and industrial buildings, as well as smart and connected devices and systems for residential and commercial applications, security and access control, artificial intelligence (AI), health and wellness, control and audio/video. Nice has created and initiated a strategic plan for the expansion and development of its product portfolio and connected platforms. Nice will continue to offer a wide range of customisable, user-friendly options for the end user and aims to strengthen and expand in markets with high growth potential. With more than 15 research and development centres and 13 factories on five continents, Nice employs more than 2,800 people with in-depth expertise and diverse cultural backgrounds, serving partners and customers in over 100 countries worldwide.

Nice's quality and the innovative strength of its home management solutions are recognised worldwide: At the R+T Innovation Awards 2024, the company received two internationally renowned awards in the categories "Drive and control systems for roller shutters and sun protection systems" and "Building automation" and at ISE 2024 it was honoured with three Top New Technology Awards. Nice had previously won 8 prestigious industry awards at the CEDIA Expo in Denver (USA), while at EI Live! Europe in Farnborough (UK) with the Smart Building Awards for "Best Dedicated Touch Screen Controller and Best Software Version for Home Management OS 8.8", leading to its worldwide recognition as one of the best home management software. In Italy, Nice was recognised as Best Managed Company by Deloitte Private.
