

EXTENDED THREAT INTELLIGENCE

Cyber Threats Hit Our Radar Before They Hit Your Business.

Data breaches have surged nearly 475% over the last decade. In an era of rampant identity-based attacks, a single leaked credential is often all an adversary needs to gain access and wreak havoc. SOCRadar's Extended Threat Intelligence (XTI) platform proactively detects threats outside the security firewall, allowing you to quickly mitigate risks and neutralize attack campaigns before they get off the ground.

Extended Cybersecurity for External Cyber Threats.

See Why CISOs and Security Leaders Choose the SOCRadar XTI Platform.

Timely & Accurate Threat Detection

Filter out the noise to find compromised credentials and stolen data before it leads to losses and damages.

Comprehensive Dark Web Visibility

Monitor brand mentions and detect leaked data across 10k+ dark web forums, chat networks, and hidden criminal marketplaces.

Actionable Intelligence with Context

Receive high-fidelity, asset-specific IOCs validated by AI and human analysts, ensuring your team focuses on what matters most.

Safeguard Your Brand From Abuse

Protect your customers by accurately detecting and removing impersonating phishing domains, accounts, and rogue mobile applications via our in-house takedown service.

Agentic AI Force Multiplier

Empower your security team with AI agents and workflows that deliver dynamic insights, automate routine tasks, and orchestrate cross-domain tools to efficiently augment your workforce and scale defensive action.

Supply Chain Vigilance

Proactively monitor and assess third-party risk to scout vulnerabilities and prevent "island-hopping" attacks originating from your vendor ecosystem.

Holistic, natively integrated SaaS platform built for scale

Simple and flexible pricing model with risk-free freemium options

Seamlessly integrates with security stack (SIEM, SOAR, EDR, etc.)

4.7 out of 5 stars

Get a FREE Dark Web Risk Scan.
See what other cybersecurity providers may have missed.

Join our community of over 200K businesses that have used SOCRadar's Free Dark Web Report to identify data leaks and exposures.

Try it now.

Unified End-to-End Defense.

Discover the XTI Platform's five core modules:

Attack Surface Management

Discover assets and map your external attack surface with frequent scans.

Use cases

- Asset Discovery, Monitoring & Inventory Management
- External Network Security Monitoring
- Vulnerability Identification
- Shadow IT Risk Mitigation

Features

- Active & Passive Vulnerability Scanning
- SSL & Mail Server Security Checks
- Website Security Checks
- CISA Key & Ransomware Checks

Brand Protection

Secure your brand's reputation against impersonating phishing domains, data breaches/leaks and social media risks.

Use cases

- Phishing Monitoring & Remediation
- Surface Web Monitoring
- Social Media Monitoring
- Fraud Monitoring
- IP & Brand Abuse Protection

Features

- Agentic Phishing Detection
- OCR & Logo Matching
- Advanced Phishing Domain Analysis
- Managed, One-Click Takedowns (domains, accounts, apps, etc.)

Cyber Threat Intelligence

Proactively hunt and investigate threats across the surface, deep web and dark web.

Use cases

- Identity & Access Intelligence
- Threat Hunting & Search
- Vulnerability Intelligence
- Threat Actor & Ransomware Intelligence
- Threat Feeds & Indicators of Compromise (IOCs)
- Threat Hunting Rules (SIGMA & YARA)

Features

- In-App Threat Hunting Browser
- Subscriptions for Automated Domain/Vulnerability Monitoring
- Threat Actor & Ransomware Mapping to MITRE ATT&CK Framework
- Malware Analysis
- GitHub and Bucket Leak Detection
- Bi-Directional API

Advanced Dark Web Monitoring

Monitor the Dark Web for data breaches, botnets, and ransomware activities that threaten your business, customers, and compliance status.

Use cases

- Black Market Lead Monitoring
- Hacker Discussions Monitoring (Telegram, Discord, etc.)
- Breach Data & Exposures (credentials, PII, secrets, credit cards, etc.)
- Insider Threats Monitoring
- VIP & Executive Protection

Features

- Dark Web Search Engine
- Stealer Log, Malware & Botnet Database
- Stolen Credit Card Tracking
- Credits-based Dark Web Data Recovery & Negotiation

Supply Chain Intelligence

Continuously monitor and assess your entire third-party partner ecosystem to ensure supply chain security.

Use cases

- Supply Chain Risk & Security Posture
- Third-Party Vulnerability & Breach Tracking
- Global Supply Chain Intelligence

Features

- Vendor Risk Profiling & Assessments
- Dynamic Vendor Risk Scoring (Popularity & Data-driven score with 133+ checks across 13 subcategories)
- Vendor Threat Trends, Reports & Dashboards
