

ABOUT

PW Metallbau

Precision, Passion, and Silo Quality

With decades of expertise in silo construction and process engineering, PW Metallbau GmbH & Co. KG is a trusted name in the design and production of innovative storage and blending solutions. Headquartered in Meckenbeuren, Germany, our family-owned company is proudly serves diverse industries, including petrochemicals, food, plastics, and many more.

Our Products:

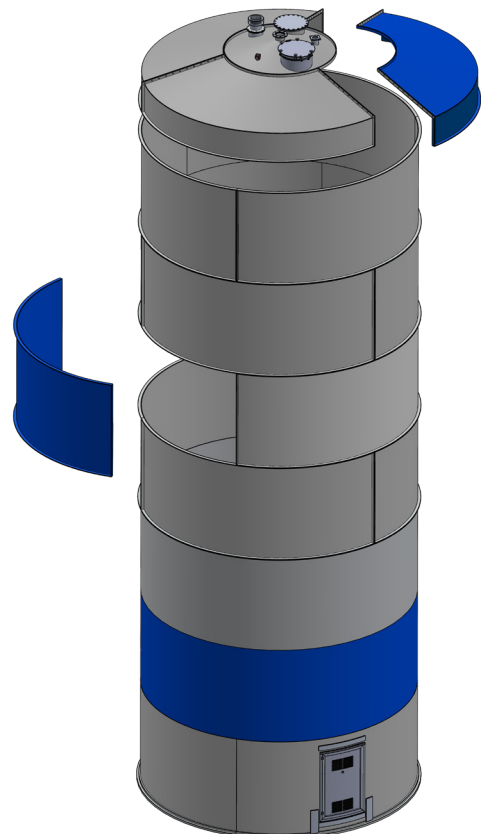

- Seal-welded panel silos
- Blending silos – pipe- / central pipe- / cone blender
- Standard silos – in aluminum and stainless steel
- Pressure vessels
- Hoppers – process hoppers designed for different applications

Seal-welded Panel Silos

Storage capacity up to 1,500m³

Our seal-welded panel silos offer large storage capacities and long-lasting durability. With volumes of up to 1,500m³/ 53,000ft³, these silos are ideal for storing bulk materials in industries such as the petrochemicals, synthetics, paper, and recycling industry. Customizable to meet specific needs, they are the backbone of efficient material handling operations.

- **LARGE VOLUMES**
- **SEAL-WELDED**
- **EASY TO TRANSPORT**
- **QUICK INSTALLATION**
- **CUSTOMIZABLE**

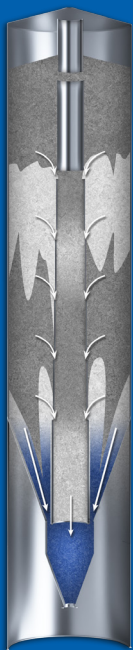

Blending Silos

Tailored mixing solutions

For consistent and homogeneous mixing, our PW blending silos are second to none. Whether it is pipe, central pipe, or cone blender configurations, our systems are designed to achieve the best possible blending results while maintaining high efficiency.

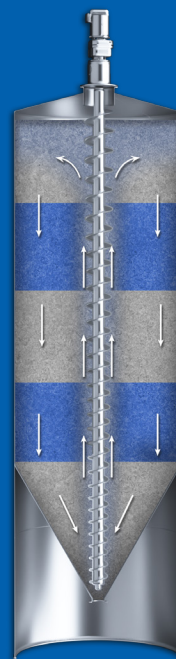

- **DESIGNED FOR VARIOUS PRODUCTS**
- **CUSTOMIZABLE**
- **CONTINUOUS PRODUCT QUALITY**
- **HOMOGENEOUS MIXING**

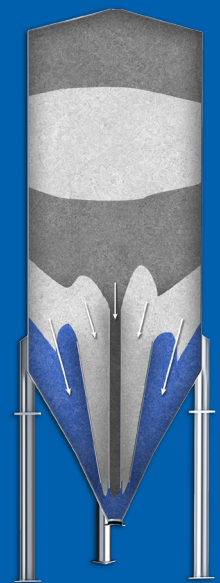

central pipe blender

pipe blender

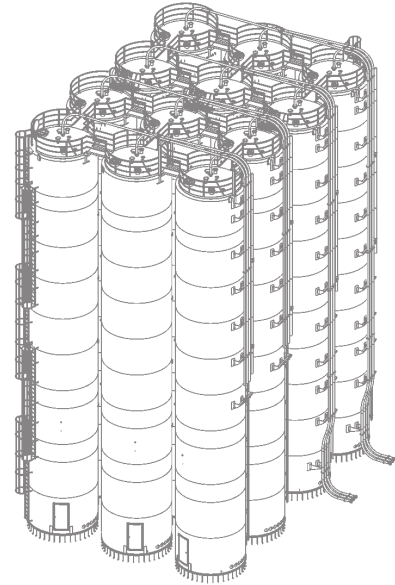

screw blender

cone blender

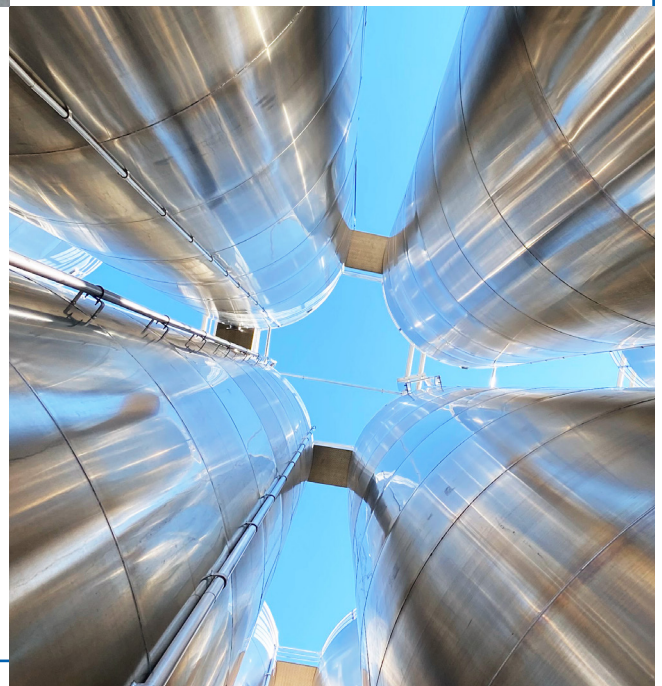

Standard Silos

Aluminum and stainless steel solutions

- **LONG-TERM RELIABILITY**
- **CUSTOMIZABLE**
- **POWDERS, GRANULATES OR LIQUIDS**
- **HYGIENIC DESIGN**

Our PW standard silos, available in both aluminum and stainless steel, combine robust design with versatility. Perfectly suited for storing powders, granules, or liquids, these silos are tailored to handle a range of requirements, from food-grade hygienic standards to corrosion-resistant storage for chemicals.
