PMG OnMould RFID-Label

- PMG OnMould RFID labels guarantee a reliable, individual and durable labeling of objects
- the format is freely selectable and can be optimally adjusted to suit the application in question
- the label exhibits very good adhesive qualities at temperatures ranging from -40 °C to +135 °C (-40 °F to +275 °F)
- a transparent, scratch and wipe-proof, UV-resistant laminate film is applied to the top of the label's tough polyester base material
- they can be read out from a distance of between 0.5 m and 17 m (1.6 ft and 55 ft) using stationary and mobile RFID readers from a range of manufacturers
- especially suitable for apolar, low-energy substrates, such as PP, PE and HDPE
- freely selectable formats and inlays (HF/UHF)

Industry sectors: container labeling, pallet labeling, inventory labeling, storage rack labeling, medical or logistics sector, many other industrial applications
