

FOR IMMEDIATE RELEASE

Nuremberg, Germany – Minag Industry, the Brazilian powerhouse in grooming technology, returns to Interzoo 2026 for its second consecutive participation. As the company celebrates 40 years of industrial heritage, it highlights a flagship of efficiency and safety: **the Compact Cabinet Dryer**.

Proven Reliability: The Compact Cabinet Dryer

A staple in Brazilian pet salons for over five years, the Minag Compact Cabinet Dryer has a proven track record of safety and performance. Designed, manufactured, and assembled entirely in Brazil, this equipment represents the pinnacle of our "Built to Last" philosophy.

Key Benefits for the Global Market:

- **100% Hands-Free Drying:** Delivers a complete, uniform dry without the need for manual handling, ensuring all moisture points are eliminated—even in hard-to-reach areas.
- **Pet Well-being:** Provides a stress-free environment for the animal. By eliminating constant manipulation, it respects the pet's limits and ensures a calmer grooming experience.
- **Maximum Productivity & Ergonomics:** Allows the groomer to optimize their workflow. While the Cabinet Dryer performs the heavy lifting, the professional is free to focus on other tasks, reducing physical strain and maximizing salon turnover.
- **Brazilian Engineering & Support:** As a 100% Brazilian project, every unit is backed by four decades of manufacturing expertise and direct factory support.

Equipped with high-efficiency **WEG** motors.

Celebrating 40 Years of Innovation (1986–2026)

"Our return to Interzoo is the perfect stage to show how our 40 years of experience translate into solutions like our Cabinet Dryer—equipment that hasn't just been launched, but has been tested and approved by the demanding Brazilian market for years," states the Minag board.
