

What our customers say and what we built

Many of my staff don't have German as their first language.

Nursing director

Language barriers cost quality

Documentation in 10+ languages

Grammar corrected automatically

Speak in native language, file in German

Manual documentation is stealing time I should be spending with my patients.

Care worker

Admin crowds out real care

Structured documentation via transcription

Agent writes directly into the existing system

Shift handover generated automatically

I arrive at the patient's and loose time trying to find everything I need

Care worker

No context before the visit

Audio briefing on the way to the patient

All details available through conversation with Flow

The SIS intake interview takes alot of time and then you spend just as long at the computer.

Nursing director

Intake is double the work

Record the initial care conversation

AI generates the SIS automatically from it

Relatives are constantly calling to ask how their mother is doing.

Facility manager

Families consume capacity

Automated daily family updates + Chatbot

GDPR-compliant, end-to-end encrypted

What our Agent does

Care reports

Opens the patient record, fills the report form, saves. Structured from free speech.

Vital signs

Extracts BP, pulse, temperature, blood sugar, SpO2 from voice. Enters all fields.

Service documentation

Maps spoken care activities to billing codes. Enters times. Confirms service records.

Medication tracking

Confirms administered meds in the system. Logs blood sugar + insulin doses.

Task completion

Marks care plan items as done. Logs deviations with reason when tasks are skipped.

Shift handover

Auto-generates a structured summary from the entire shift. Ready for the next team.

Risk intelligence

Flow scores every visit, flags every change and recommends care level upgrades

Voice navigation

Managers navigate the full system by voice. Retrieve patient info, open any screen, search.

Monthly billing

3,247 service records verified. Gaps flagged. Manager confirms exceptions. 5 min, not 4 hours.
