FORENOVA

NovaMDR 360°

Combat Evolving Cyber Threats

Challenges Resolved

There is capability asymmetry between your adversaries and your defense. Their tactics and capabilities are greater and more advanced than the typical defense in your organization. It is not an equal fight. They will find a way to compromise your systems and impact your business unless you can actively monitor, detect, and respond to cyber threats with a Security Operations Center (SOC).

Building your own SOC is a considerable challenge. Not only do you have to find the right people with cybersecurity expertise, but the cost of hiring and training them, and purchasing the right supporting technologies will be a large investment in terms of time, resources, and financial capital.

NovaMDR 360° solves these challenges by providing a 24/7 monitoring service for your endpoints and network. It improves your cyber resilience with industry-leading detect & respond technology that establishes a robust defense against advanced and targeted cyberattacks.

Get peace of mind and let our specialized security service unburden your IT team. We will constantly monitor your critical IT assets so that you can focus on your core business.

Cybersecurity as a Service

Proactively Combat Evolving Threats

Stay one step ahead of advanced threat actors

- With increasingly sophisticated cyber threats and the rapid growth of AI, being strategic with your cyber defense is no longer enough.
- NovaMDR's proactive defense adapts in real-time to counter ever-evolving threats using our XDR platform, GPT, and real experts.

Bridge Your Cybersecurity Expertise Gap

Empower Your Team with Our Experts

- Gain an edge with NovaMDR's team of elite cybersecurity professionals.
- We bring the expertise your business needs to confront any cyber challenge without the cost and complexity of scaling your in-house team.

Demonstrate Compliance and Get Peace of Mind

Meet Regulatory Compliance with Ease

- Meeting NIS2, KRITIS, ISO27001, and other regulatory compliance can be daunting.
- NovaMDR streamlines compliance by offering expert assistance to help you respond to threats, ensuring the coverage of all digital assets, and compliance reporting to demonstrate adherence to specific requirements.

Features	NovaMDR 360°
24/7 Threat Detection	✓
Advanced Analytics Human And Machine Intelligence	✓
Attack Surface Coverage	✓
Threat Hunting	✓
Rapid Threat Response Containment	✓
Visibility And Reporting	✓
Flexible Price Based on Scope of Work	✓

NovaMDR 360° provides 24/7 monitoring for your endpoints, networks, cloud services and identities and delivers the ultimate protection against any cyber threat. By leveraging all information from multiple sources, our expert team can use the full potential of our AI supported analytics.

NovaMDR 360° harnesses advanced GPT AI and machine This rapid detection capability is crucial for minimizing the window of opportunity for attackers, ensuring your environment remains secure against even the most elusive threats.

NovaMDR 360° Key Capabilities and Benefits

Comprehensive Protection

Sophisticated Operations

Enhanced Experience

Accurate Threat Detection

Mature IR Processes

24/7 Services Delivery

Global & Custom Use Cases + GPT AI + Qualitative Human Analysis

ForeNova Advanced Analytics Platform

Data Lake

Open API
Cloud/SaaS

NovaGuard
Endpoint Activity

NovaSensor
Network Traffic

NovaSensor
User Identities

Log Collector
Third Party Products (3PP)

NovaMDR 360° Key Advantages

COMPREHENSIVE PROTECTION

- Comprehensive signals collection
- Endpoint, network, cloud, SaaS, M365, user identities, 3PPs
- Normalized, aggregated, correlated.
- Define more use cases.
- Detect broader range of attacks.

See More. Detect More.

- Anytime access to experts
- Extension of your team

24/7 Coverage

- **Pre-Attack:** Assess risks, reinforce existing measures, reduce exposures.
- **During-Attack:** Experts assisted by GPT AI for faster, improved triage, detection, and deep investigation.
- **During-Attack:** Active rapid response and 99% containment commitment
- **Post-Attack:** Support root cause analysis and enhance Pre-Attack

Complete Attack Lifecycle Protection

SOPHISTICATED SECURITY OPERATIONS

Incident Containment in Seconds

- Tight integration with NovaGuard
- Containment capability with other EDR tools and firewalls

Improved Advanced Analytics

- Noise reduction avoids alert fatigue.
- GPT-aided analysts discover advanced /multistage 0-day attacks

Platform Development Teams

- ForeNova Labs Threat Intelligence
- Research and Development
- IT Systems Operations

Security Operations Roles

- Supports and extends your IT team.
- Security Analysts, Security Specialists, Customer Success Managers

ENHANCED EXPERIENCE

GPT Augmented Analyst Experience

- Deeper incident insights
- Natural language interactions
- Improved customer engagement

Fewer Distractions

- Incident Accuracy: 99%
- SLA Achievement: 100%
- Operational Visibility: Real-time via portal, weekly, monthly reports

⚙️ Powered by ForeNova Technology

NovaMDR 360° is powered by advanced security software that we constantly improve and develop. We combine the latest threat intelligence, machine learning, and AI to ensure high detection rates even for unknown cyberattacks on your network & endpoints.

NovaMDR 360°can improve cyber resilience with advanced features like Micro-Segmentation, Hot Patching & Ransomware Honeypots. This functionality can significantly reduce your attack surface and provide reliable protection against a wide range of threats.

NovaMDR 360° includes SIEM-Light functionality. We can ingest data from third party devices via major standard protocols (syslog, kafka, winlogbeat, snmp trap). This may help to achieve compliance and simplifies the complexity typically associated with traditional SIEM systems, making it more accessible and less resource-intensive for your IT team.

🛡️ Integrate for Rapid Response Actions

NovaMDR has pre-built response integration capabilities based on other major security solutions and can quickly integrate with any other existing solution via its flexible modern API.

Interent — Firewall — *Response Playbooks* — Endpoints
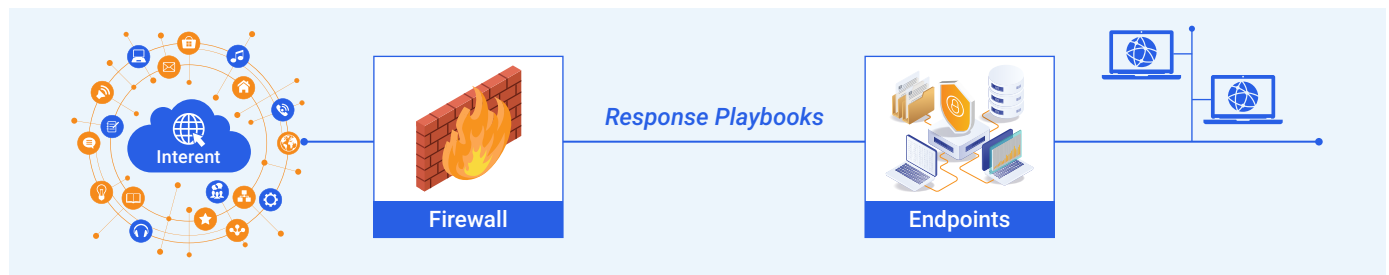

💡 Why SMEs buy from ForeNova?

Seamless Cybersecurity Integration & Cost Efficiency

NovaMDR integrates effortlessly with your current infrastructure, enhancing its capabilities without new investments.

NovaMDR is designed to complement and enhance your existing security infrastructure, allowing you to leverage your current investments fully. Our solution integrates smoothly, ensuring you're protected from day one.

Cost-Effective Tailored Solutions From a Dynamic Innovator

Our proprietary technology streamlines SOC operations, minimizing the need for extensive personnel and enabling us to offer our top-tier cybersecurity solutions at a competitive price point.

Our OEM partner is a large pure-play security vendor, enabling ForeNova to quickly bring innovative capabilities and technological advancements to market.

Unmatched Threat Detection Through Advanced Analytics

NovaMDR's analytics engines collect and correlate data with far greater efficacy than conventional SIEM solutions. Harnessing the power of AI and machine learning, coupled with our seasoned cybersecurity experts, we ensure meticulous monitoring and analysis across your digital environment. This empowers us to detect even the most evasive threats with unparalleled accuracy and speed and at lower costs.
