CYBER RISK MANAGEMENT

We dynamically protect our clients by identifying, analyzing, predicting & preventing cyber threats in real time using advanced security analytics and sophisticated risk and threat management technology.

We deliver an umbrella of comprehensive integrated risk and threat management services

allowing our clients to manage their risks and significantly improve the mean time to detect and respond to cyberattacks via a holistic cyber defense approach.

Maintain the highest level of performance on three core cyber security capabilities:

- **Visibility.** Remove complexity and gain the visibility and situational awareness needed to improve prevention or containment across all security risk areas.
- **Readiness.** Orchestrate, automate and streamline security operations to ultimately improve operational readiness and performance levels.
- **Resilience.** Build operational capability to identify, prevent, detect, respond to threats and swiftly recover to the intended secure state.

Combine both Threat Detection and Response (MDR) and Managed Risk and Controls (MRC) services

to resolve technology fragmentation and process disconnects, while incorporating the business perspective into the decision-making process.

MANAGED DETECTION AND RESPONSE - MDR

Internationally recognized turnkey threat detection and response service that helps organizations to **manage operational risk and significantly reduce the mean time to detect and respond** to cyberattacks. At Obrela, we identify, predict and prevent cyber threats in real time. As a service;. Personalised;. On demand.

MDR CORE

Designed to provide organizations with continuous monitoring, detection, and response capabilities at the endpoint level.

MDR INFRA

Ensures comprehensive protection against advanced cyber threats and attacks that target critical infrastructure components.

MDR CLOUD

Allows protection for 24x7 Managed Detection and Response for your Microsoft Cloud Ecosystem. With machine learning, at its core MDR Cloud ensures that data are parsed and monitored on a real-time basis.

MDR VESSELS

Purpose-built to address maritime cybersecurity challenges by providing a comprehensive cybersecurity solution that covers both Vessel IT and OT systems.

MDR OT

Offers extended detection and response (XDR) that is rapidly deployed and works with diverse endpoints, IoT, OT, and industrial control system (ICS) devices.

MDR BRAND

Proactively identify and mitigate online threats to a company's brand and intellectual property by leveraging a combination of advanced technologies, threat intelligence and human expertise.

MANAGED RISK AND CONTROLS - MRC

An umbrella of solutions that enable clients to **effectively manage and orchestrate various aspects of cybersecurity** such as governance, risk, compliance, and operations. Our comprehensive approach delivers real-time, risk-aligned cybersecurity providing clients with a cohesive and integrated solution.

MRC FOR PRIVACY

Designed to help organizations effectively manage their privacy and data protection obligations.

MRC FOR POLICY

Dedicated to enhancing organizations' security posture through comprehensive policy management.

MRC FOR CYBER RISK

Empowers clients in identifying, evaluating, and managing their cyber risks.

MRC FOR EXPOSURE

Offers a comprehensive vulnerability and exposure management solution, effectively safeguarding organizations from potential threats.

MRC FOR SUPPLY CHAIN

Provides organizations with the confidence to mitigate risks, safeguard sensitive information, and maintain uninterrupted operations.

MRC FOR COMPLIANCE

Provides organizations with comprehensive solutions for assessing their current compliance status with selected frameworks and assisting with implications and remediation actions.

MRC FOR CYBER RESILIENCE

Empowers clients with a comprehensive and proactive approach in managing cyber resilience and business continuity risks.

THE SWORDFISH® PLATFORM AN “ERP” FOR CYBER

SWORDFISH FOR MDR:

SWORDFISH® Platform (PAAS) serves as the provisioning and delivery layer of our services. Obrela uses SWORDFISH® for MDR to deliver comprehensive MDR services to its clients. This powerful solution acts as a central layer that enables the efficient coordination of security operations to address risk management, supply chain security, and access management.

MODULES: CyberOps, SOCStreams, SRM, EMC

SWORDFISH FOR MRC:

Obrela's SWORDFISH® cloud-native platform provides organizations with a centralized and real-time view of their security, compliance, privacy, and business risks. The platform can cover different aspects of security, privacy, and risk, and enable data and workflow fusion for a comprehensive risk management approach. It can be attuned to the versatile and dynamically changing needs of enterprises as an integrated cyber risk management platform that orchestrates controls in the diverse facets of cybersecurity operations.

MODULES: Privacy, Policy, Compliance, Supply Chain Security, Exposure, Cyber Risk, Incident, Cyber Resilience, Digital Universe Risk Analytics, Service Management

Obrela's integrated Cyber Risk Management Platform **orchestrates controls in the diverse facets of cybersecurity operations and consolidates security related data** under a single data lake, enabling **real-time analytics and supporting informed decisions.**

ADDITIONAL SOLUTIONS

MANAGED CYBER DEFENSE

Empowering your resilience with managed defense services. In an ever-evolving cyber landscape, fortifying your organization's cybersecurity defenses is not just a priority; It's a necessity. Obrela stands as your unwavering guardian, offering a powerful arsenal of Managed Defense Services to bolster your digital fortress.

SERVICES: Managed NG Firewall, Managed WAF, Managed Database Protection and Audit Control, Managed Identity Access, and Security Design and Integration Services, Value-added services and SLA Elements

ADVISORY SERVICES

Obrela's portfolio includes a wide range of advisory services, led by a team of highly skilled and certified cybersecurity experts. These services are designed to enhance an organization's resilience to cyber threats, leveraging our global expertise and a strong focus on business objectives.

SERVICES: Risk Assessment, Compliance Assessment, SOC Capability and Maturity Assessment, Red Teaming, Penetration Testing, Vulnerability Assessment

TESTIMONIALS

"Obrela services and solutions enable financial institutions to manage information risk through an enterprise-wide, cyber security risk management, compliance and governance program, so as to more effectively address the protection of critical assets, infrastructure and data."

BANKING & FINANCE

"Obrela's Services combine collective intelligence practices and methods with leading edge security analytics and sophisticated risk management technology to identify, analyze, predict and prevent cyber-security threats in real time."

TELECOMMUNICATIONS

"Obrela Services consist of a comprehensive suite of Cyber Security and Compliance solutions for Retail and Consumer companies to help them secure their infrastructure, their data and their clients against an emerging threat landscape and maintain compliance with laws and regulations."

RETAIL

OBRELA LABS

DON'T JUST RESPOND ON THREATS, PREDICT THEM!

At the forefront of our cybersecurity research, Obrela Labs has been an integral part of our evolution.

Building resilient cyberdefenses requires deep knowledge of the offensive tactics. With that knowledge we expel threats. With that understanding we transformed the industry's approach detecting, dissecting and countering attacks and emerging attack vectors.

The offensive capability of Obrela Labs combined with the proactive approach of MRC and the defensive nature of MDR provides a comprehensive approach to improving the security posture of an organization. We take pride in our role as catalysts for innovation, sponsoring and leading open-source security projects, and actively contributing to the global security community. Our dedication extends to providing real-world solutions for evolving threats, ensuring that your organization stays one step ahead of potential adversaries.

WHAT WE STAND FOR

Our values are embedded within our fabric of our existence, make us who we are and acting as our guiding principle.

We promote hard work and passion for what we do

We believe that hard work works, that freedom matters and that great achievements come with perseverance and passion.

We nourish individual talent and collaboration & provide growth leadership

We recognize that the company's success depends on our people and value openness, collaboration, leadership, positive morale, diverse ideas, and a shared vision.

We create an environment for job fulfillment & enrichment

We do what we like the most. From our physical space to our sense of humor, we share a work-hard, enjoy-it-to-the-max attitude. We want our people to work at what they like most. We constantly try to tap to and enhance their skills and their capabilities and match them with their interests and entertainment

We cultivate intrapreneurship and innovation

We encourage our people to be intrapreneurial. We believe that to disrupt you need to innovate at all levels. We welcome and push change and challenge the status quo. Often, this requires us to challenge each other, our approach and ourselves.

We operate with the strictest code of ethics and integrity

We operate under the strictest code of ethics and integrity. We keep our word and operate within a strict moral code. We define realistic expectations with each other and with our clients, partners and shareholders; and we deliver to those expectations.

We exercise sound judgment and discretion

We act with sound judgment, maturity, and strong discretion. We decide based on a) company's best of interests and b) using common sense. Always.

WE KEEP YOUR BUSINESS IN BUSINESS

We provide an umbrella of cybersecurity expertise to complement your team and fill in any knowledge gaps.

What We Do

Make businesses resilient by deploying a real-time cybersecurity system over an ever-expanding digital universe.

How We Do It

With full-stack threat detection, aligned to business risk, powered by the SWORDFISH® platform, and driven by expertise more relentless than any threat.

Why We Do It

No matter the threats that may loom over our customers, we provide an umbrella of security that protects every person, every thing, and every goal their business has.

WHY OBRELA

No matter how far your business reaches or how complex it grows, Obrela provides real-time, risk aligned cybersecurity that covers it all.

RISK OVER THREATS How Risk becomes Reward

Manage Risks Not Only Threats

Empowered by our SWORDFISH® Platform we remove complexity, and we provide instant visibility and situational awareness focusing on operational risks and outcomes that directly impact client's business objectives

PREDICTABILITY OVER UNCERTAINTY

Because Unpredictable doesn't have to mean Uncertain

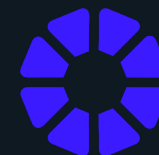

Predict Don't Just Detect

With a centralized view that spans your business and its risks, we prioritize the most important issues in real time, so you make focused decisions and work with predictability in the face of uncertainty.

VISIBILITY OVER YOUR DIGITAL UNIVERSE See More. Stop More. Do More.

Cyber Security As A Service Model

A model which relieves customers from technology risks, lengthy on-boarding and excessive upfront investments. Based on a SECaaS model we give our clients a unique service-led experience based on outcomes with predictable pricing and no hidden costs
