

MTE FLOWPACK

stainless steel

- Flowpack packaging machine for an industrial application.
- NEW OPEN CHASSIS CONCEPT:
 - Highly modular, it can be adapted to almost any working condition.
 - Complete integration of auxiliary processes such as coding, labeling, weighing and any automatic loading process.
 - Hygienic, without waste accumulation points.
 - Exterior display of all mechanical and electronic elements. Easy access. Time savings for incident resolution, maintenance and cleaning.
- Ready to sync with other machines and devices.
- Use any heat-sealable or cold-weldable film, composite or laminated; recyclable, biodegradable and compostable.
- Ease of use, management of the machine and its accessories through a large color touch screen. Control of production and notice of preventive maintenance intervals.
- Possibility of controlling the machine from a smartphone or tablet.
