Saropack expertise

All 4 One

The right technology

We focus on your goals. Together we will find the packaging machine that will make your strategy for success unbeatable. How and where can we help you?

The right film

We are introducing new technologies to the market and offer the widest range of packaging films. Film material, precisely tailored to your applications. High availability and fast logistics are core competences.

The necessary expertise

Film packaging is something that requires knowledge and expertise: our team of specialists will advise and assist you with defining and optimising solutions. Let's talk about efficiency and productivity.

Your solution for the future

With SaroGreen you can reconcile cost effectiveness and sustainability. Work with us to develop a solid and reliable sustainability concept for your film packaging.

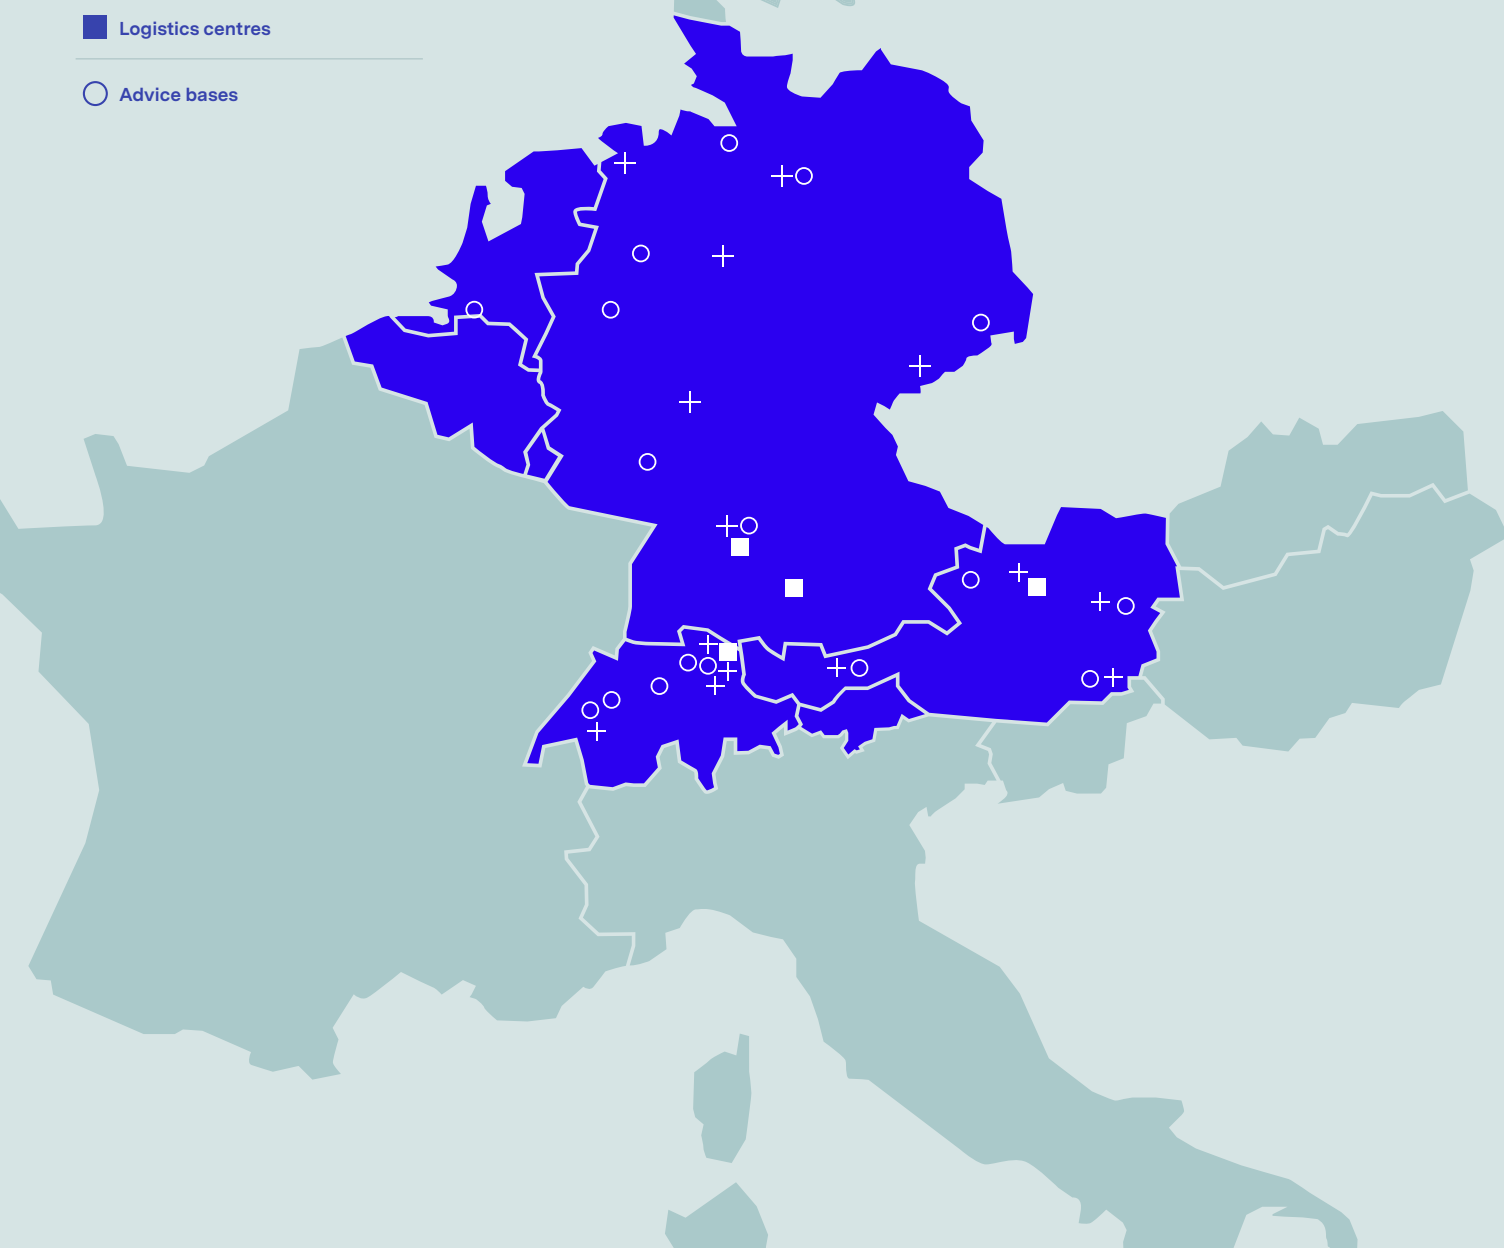

The company

We are the leading specialist for film packaging. Why? It's simple – because we have all the expertise needed to be the industry leader. Fast responses and short distances – coupled with fair and straightforward service and advice. Service quality means a lot to us, which is why we focus on a regional presence.

■ Logistics centres

○ Advice bases

Saropack Group headquarters in Rorschach on Lake Constance, Switzerland

All the threads come together at our headquarters. Customer service, project management, purchasing, technology and management work closely together. Competent and environmentally friendly action with adherence to deadlines and a strong customer focus are the standards we live by. As part of the Descommerce Group AG, we also benefit from the centralised services of a powerful group of companies. All sites therefore have integrated management systems:

Guaranteeing the safety
of packaging for food
applications

Global quality of the
highest standard

Sustainability
certification

Asperg, Ludwigsburg district, Germany

This is where our versatile films are manufactured. Cutting, perforating and printing for customers across Europe are our main areas of expertise. The site has a modern production and logistics infrastructure for maximum customer flexibility.

San Giovanni Bianco, Province of Bergamo, Italy

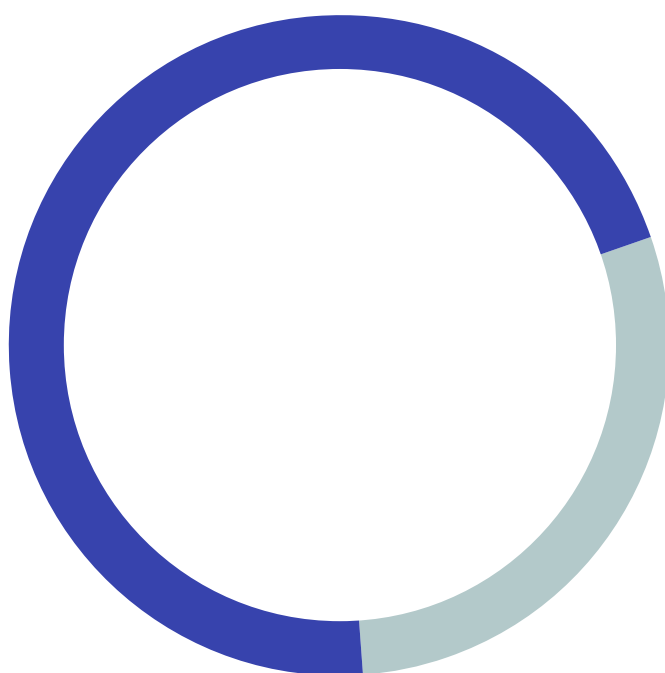

The production site in northern Italy has been a leader in the production of state-of-the-art packaging machines for many years. This is where we employ series production solutions and also develop and manufacture customised accessories tailored to your specific needs. Quality and precision are the top priorities for every product. Expertise and innovative capabilities are always included.

Superbly versatile

Our packaging solutions offer a decisive competitive advantage. Excellence for maximum performance. In every industry and sector. Let's talk and come up with the ideal solution for your needs.

Advice and service

We care for you

Repairs

Our regional technicians resolve potential problems quickly and pragmatically with their expertise. Our service crew has a wealth of knowledge about our machines.

You have access to a qualified service technician within 24 hours.

We not only repair SaroPacker systems, but also other common European film packaging machines. We keep the most common consumable parts for various brands in stock.

Spare parts

Here as well, we rely on the strength of our regional presence. Thanks to our regional warehouses, our spare parts will reach you in the shortest possible time, thereby ensuring that your machine will be up and running again quickly.

Maintenance

Our attractive maintenance packages ensure maintenance costs that you can calculate and budget for. And machines that work again. Reliably and efficiently.

Training

Knowing what you need to know: by offering continuous training and personal support, we work with you to ensure the longest possible service life for your machine.

Packaging films

Quality films are our trademark. Our product range offers flexible solutions for (almost) every application and industry. You benefit from fast availability – as well as our expertise and customised advice, both of which are part of every optimum packaging solution.

Tubular film

SaroLon Flow pack films

High-performance films, perfectly matched to the SaroPacker flow pack machines and suitable for a wide range of applications. Available with an oxygen barrier and made from renewable or recycled food-safe materials.

SaroFresh prolid sealing films

Guarantee maximum freshness and safety for food, pharmaceuticals and industrial applications. A reliable packaging solution that delivers what it promises.

SaroSleeves

These versatile shrink film cut-offs are ideal for a wide range of manual packaging applications. Used as first-opening protection, for multi-packs or on-packs, or as a round label.

SaroFilm Polyolefin fine shrink films

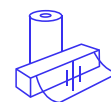

Very thin, stable and versatile film solution with top-class shrink properties for the safe and attractive packaging of products in various industries.

SaroLen Polyethylene films

Provide reliable protection during the logistics process. Their high degree of flexibility and resilience make them a cost-effective and environmentally friendly packaging solution.

Cling film

Cling film preserves food by extending product shelf life and providing hygienic protection. Available as practical cling film cutter boxes, refill rolls or large rolls.

Bag-in-Box

SaroBag-in-Box is our sustainable, flexible solution for liquid or paste-like food and non-food products. It protects and ensures an extended shelf life after opening, without any loss of quality – and does this for several weeks as well.

Bag-in-Box bags

Innovative packaging solution for liquid and paste-like products that ensures freshness and quality for a long time. User-friendly handling for easy filling and dispensing.

Taps and caps

Solutions for portioned dispensing, pouring, resealing and much more. Our caps and closures ensure reliable hygienic dispensing and preserve the freshness of the products.

Bags

Our range of bags offers customised solutions – from food to industrial products. High-quality materials guarantee safety and functionality. We also focus on sustainable packaging options.

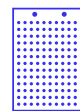

SaroBag Range of bags

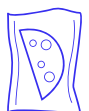

Flexible bags made from high-quality film materials. Ideal for a wide range of applications, they offer optimum protection and an attractive design.

Block-bottom and
cross-bottom bags,
acrylic coated

Perforated bag

Vacuum bags

Film packaging machines

SaroPacker machines are our trademark. Our product range offers flexible solutions for (almost) every application and industry. You benefit from fast availability – as well as our expertise and customised advice, both of which are part of every optimum packaging solution.

Flow pack machines

Offer rapid and precise packaging for all products that need to be packed in a film bag. With automated processes and precise control, they maximise the efficiency of your packaging process.

Traysealer tray sealing systems

Seal every tray and are especially suitable for food and medical products. They combine efficiency and user-friendliness and are the perfect choice for high-quality tray sealing requirements.

Manual shrink-wrapping machines

The perfect partners for shrinking and sealing films. Ideal for small to medium-scale production. User-friendly operation and outstanding packaging results.

Semi-automatic shrink-wrapping machines

Combine sealing and shrinking in a single operation. With an automatic closing function and efficient product removal, you can double output compared to manual processes.

Fully automatic shrink-wrapping machines

Packaging systems for a fully automated process – from film feeding and sealing to shrinking and removal from the machine. Ideal for large-scale production operations, they offer maximum efficiency and speed without any need for manual intervention.

Shrink tunnels

Thanks to precise temperature and air control, they deliver consistent, high-quality shrink results. Ideal for use in combination with our semi-automated or fully automated machines.

Bundle packaging machines

The ideal solution for grouping and bundling a wide range of products for various industries. They combine high speed with user-friendly control to optimise packaging processes.

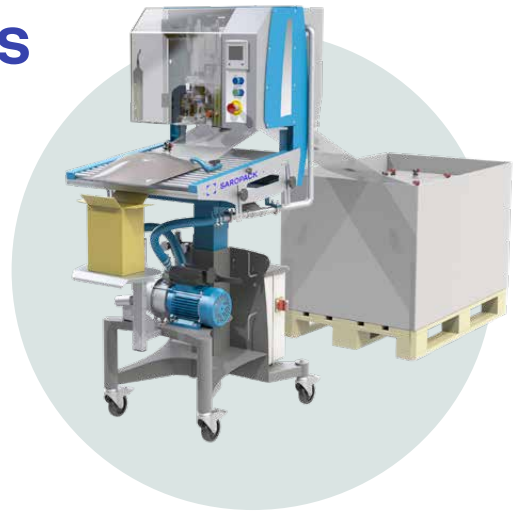

Tight packers

Ensure tight packaging of products in film – without a shrink tunnel. This saves you energy and space. Versatile and user-friendly.

Bag-in-Box filling machines

Bag-in-Box solutions from Saropack stand for efficient and hygienic filling and packaging of liquids in bags and cartons. Flexible, automated and sustainable, they are suitable for food, chemicals and other applications, and for both small and large production volumes.

Manual filling machines

Easy-to-operate machines for small and medium production batches of Bag-in-Box bags of up to 20 litres and stand-up pouches of up to 3 litres volume. Filling is made possible by gravity.

Semi-automated filling machines

For filling Bag-in-Box bags of up to 20 litres and stand-up pouches of up to 5 litres volume. For all types of liquids and semi-liquids in both the food and non-food sectors.

Automated filling machines

Efficient, fully automated filling machines for high filling performance and all bag and pouch versions. Ideally, these machines should be integrated into a packaging line.

In-line automated filling machines

Work with us to create the entire line: with upstream box erector, box closing machines and other end-of-line systems.

Bag sealers

Our bag sealers offer precise, reliable solutions for hermetically sealing bags. They combine robustness and easy operation with state-of-the-art technology. Ideal for food, industrial products and more. Efficient, durable and flexible – for various materials and applications.

Hand-operated sealers and welding tongs

Magnetic table-top sealing machines with foot control

Continuous sealing machines and accessories

Industrial sealers and industrial vacuum sealers

SaroGreen – future-packed solutions

We make packaging fit for the future: SaroGreen is our formula for success when it comes to the innovative film packaging of tomorrow. It is recyclable and efficient, and it conserves resources. We work together and take responsibility – for a better world.

**SARO
GREEN**

01

Our films are recyclable

Recycling is effective climate protection. It all starts with product design. The raw materials we use are fully recyclable.

02

Our films are only as thick as necessary

We get the best out of every packaging material. Thinner but more stable is the solution. For maximum reliability. For maximum food freshness. Nothing more and nothing less. The environment and your consumers say thank you!

03

Our films are made from renewable raw materials

With our films, you can reconcile cost effectiveness and sustainability and commit to innovative plastics made from renewable or recycled raw materials.

04

Our films are CO2-balanced

Offset your calculated CO2 impact in specific climate protection projects. We support myclimate with certified projects in Switzerland, Germany and Austria.

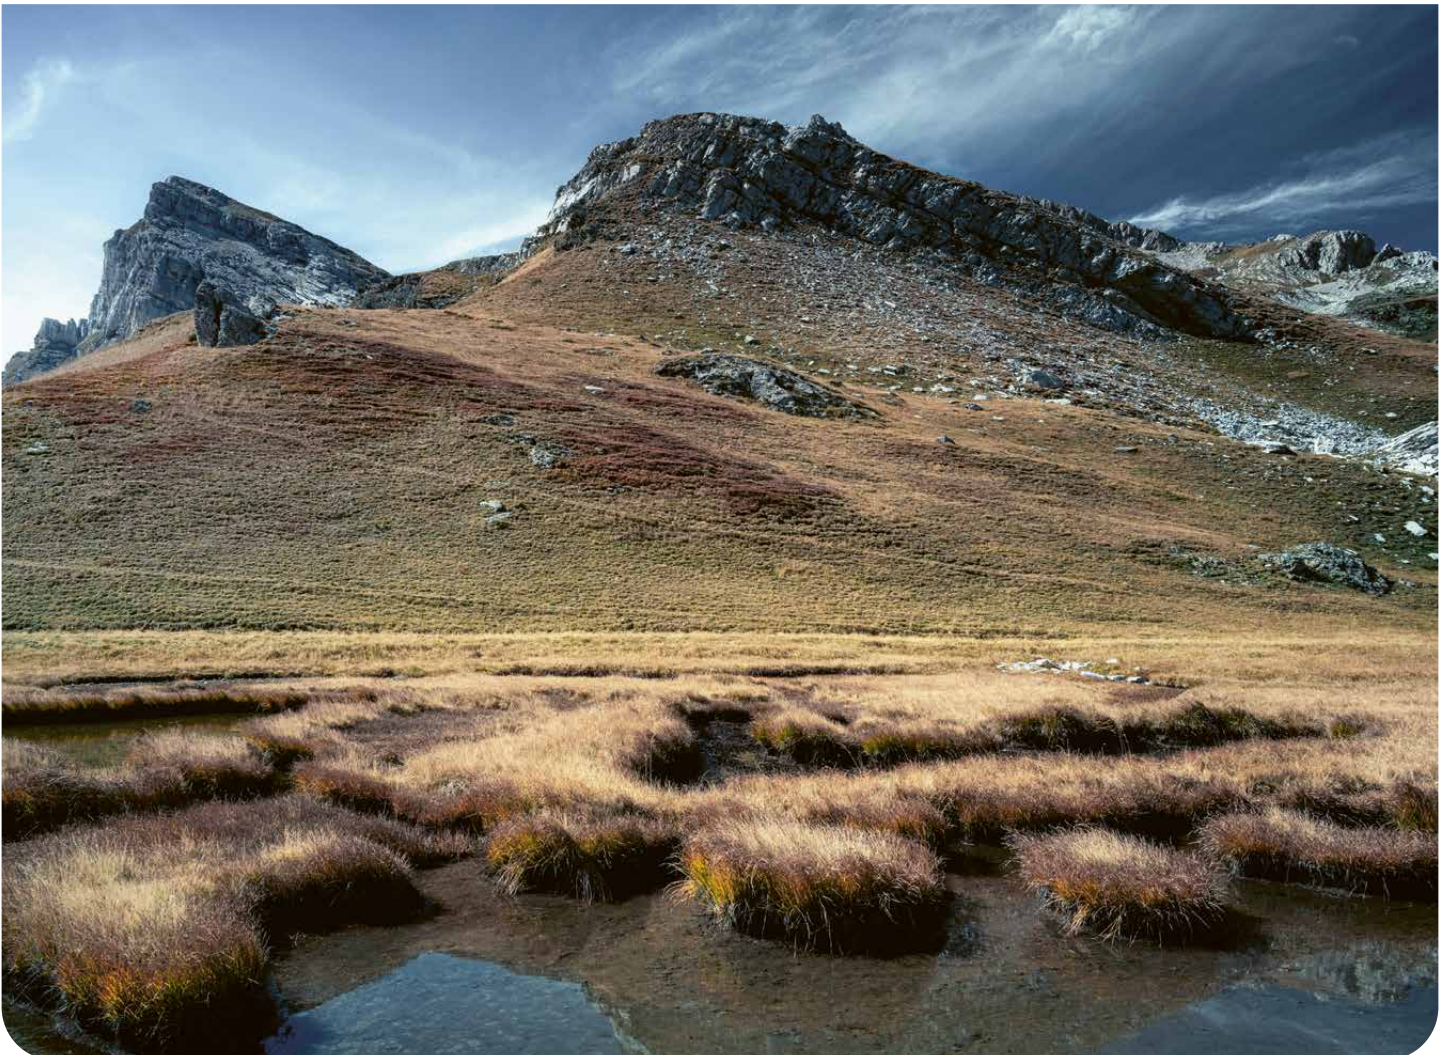

We take responsibility

Packaging should offer clear benefits and value and also be continuously optimised in accordance with the latest standards. Our top priority is to make packaging as environmentally friendly and resource efficient as possible. We are aware of our responsibility here – as a company and as part of society. After all, it is important that future generations should also be able to live in a vibrant and healthy world.

Climate protection projects Our contribution

Renaturalisation of raised bog conservation areas in the Alps
through certified climate protection projects

Saropack is investing in the future

Active climate protection

Saropack comprehensively determines and analyses its own CO2 impact and offsets it completely by investing in certified myclimate climate protection projects. In this way, we are making an active contribution to climate protection.

Our promise to you

Quality is created through commitment, appreciation and attentiveness. Our quality management starts with our internal processes and how we treat our employees. Our approach here creates trust and forms the foundation for our products, and our solid company that is geared towards the future.
