GAS

A HISTORY THAT LOOKS TO THE FUTURE

Settala Gas was founded.

Our history begins in 1966 as a storage and distribution point for LPG.

1966

1969

Creation of a qualification plant of **ecological aerosol propellants** to produce and innovate in a sustainable way.

1973

A milestone in the development of the company was then the realization of a distillation column for the **production of high purity hydrocarbons.**

1980

We are already in compliance with the Montréal protocol, an ecological green concept.

1990

New brands **PURIFRIGOR** and **PURIFAIR** national registration.

2001

The distillation unit was renewed. We are already in compliance with the Kyoto protocol.

2019

International registration for all Settala Gas Trade marks

NATURAL REFRIGERANTS and PURE GASES CORE PRODUCTS

NATURAL REFRIGERANTS

- R600a (Isobutane)
- R600 (Nbutane)
- R290 (Propane)

OTHER NATURAL REFRIGERANTS AVAILABLE

- R1270 (Propylene)
- R170 (Ethane)
- R1150 (Etilene)

REFRIGERANTS

Settala Gas has been specialized for over 40 years in the production of HC refrigerant gases with a **minimum purity of 99,5%** commercialized with the brand **PURIFRIGOR®**.

ECOLOGICAL

They **do not pollute**, they are neither water nor the soil. They are neither poisonous nor toxic or cancerous. Their GWP is equal to zero.

EFFICIENT

They **improve the performance** of refrigerating machines thus contributing to saving energy.

ECONOMICALLY ADVANTAGEOUS

They are **inexpensive** compared to other gases used in refrigeration.

Application examples:

1 Domestic application: freezers, air conditioning, drying systems

2 Supermarket cooling units and displays

3 Geothermal and industrial refrigeration systems and cooling rooms

4 Refrigerated containers and transports

PURE HC

Thanks to filtration and distillation systems of the most developed kind and more than 40 years of experience in the production of **pure hydrocarbons**, we are able to develop the product according to your needs, with the purity you request and the packaging you prefer.

The range of pure hydrocarbon gases is available in purities from 99.5% to 99.999%.

Pure and **medical** grade hydrocarbons

Application examples:

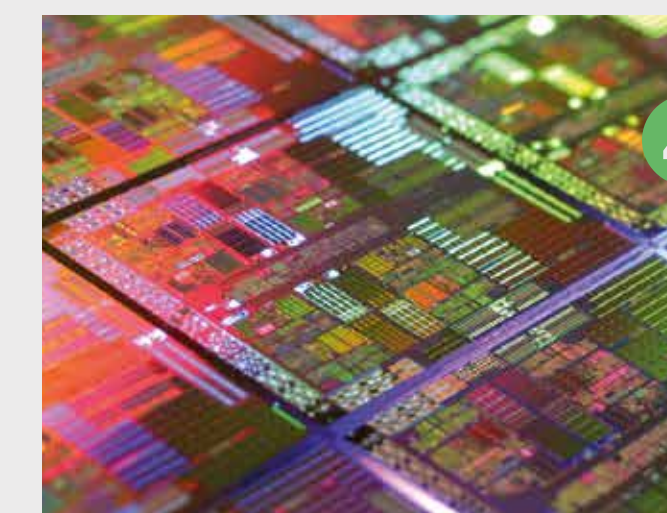

1 Calibration of laboratory instruments

2 Medical and scientific research application

3 Industrial diamonds' production

4 Semiconductor production

DISTRIBUTION

"When distribution means customer satisfaction"

SETTALA GAS products are distributed by specialized, standard certified **ADR norm Tank Trucks and portable cylinders.**

To guarantee product quality Settala Gas offers a **purging service for all kind of cylinders and isotanks,** either by cold and hot vacuum.

With more then 5.000 pcs on stock we can always satisfy our Costumers request!

Currently Settala Gas provides the following cylinder sizes:

- 1L
- 24L
- 12L
- 59.5L
- 80L
- 118L
- 240L
- 500L
- 930L
- 1000L

- 50LHP
cylinders for
compressed gases
(methane, ethane
and ethylene)

Even for this cylinder type Settala Gas can offer the installation of dip tube as well as other commonly used valves such as: UNI - BS - DIN – CGA. The quantity supplied in cylinders ranges from 500g to 500kg per cylinder, depending on the product and 2 ton to 21 ton for the product supplied in bulk road tanker or isotank.

OUR TEAM

We are people, men and women who firmly believe in a common objective and who work every day with engagement and passion to reach that objective.

We are the heart of a company that has a human face, for which it is vitally important to create a trusting relationship with those who use this products.

We are always by your side, don't forget it!

OUR VISION

We believe that producing ecological hydrocarbons and increasing their usage in a sustainable way can be possible. It is a constant challenge for us to ensure that natural resources are used in a responsible way and that research and experimentation are constantly conducted. Our ethical and environmental commitment leads to our goal of becoming a landmark in the market for what concerns new ecological ways of utilizing pure hydrocarbon gases. As a matter of fact, we aim to produce and distribute our products in a way that is coherent with the dissemination of our mission which is to succeed in using products that are environmentally friendly and that can create clear skies. This way, the earth will look beautiful, even tomorrow.
