

Organisation is everything

H+H SYSTEM

Organisation is everything

Life is a continuous process of change. It may not always be about keeping things tidy, but organisation makes people's lives easier, more efficient and safer. A good organisation system is necessary.

Those who keep things tidy
are in command of time and space.

in the hospital

Kur-Apotheke

Founded in 1973 by pharmacists Heimo and Horst Hrovat, H+H SYSTEM, based in Strobl in Austria, is now a globally operating company. Dissatisfied with existing systems for organising and storing medicines, they came up with the idea of developing and patenting their very own system. Cut to the present day, and you have a business exporting a comprehensive and flexible range of dividers to more

Mag. pharm. Heimo Hrovat

than 60 countries. Today you will find H+H SYSTEM's flexible sliding divider in hospitals, laboratories, nursing homes and pharmacies – in short, wherever medicines and small parts need to be organised in a hygienic and clearly arranged manner. With Heimo Hrovat Jr. at the helm, the company boasting facilities in Austria as well as the United States has grown to more than 50 employees.

Finding practical solutions to everyday problems

One for all
The sliding divider at the centre.
In all areas.

The diagram of the first sliding divider, patented in 1973. The basic design has not changed. Items can be sorted quickly, located safely, and the inventory is always clearly arranged.
H+H SYSTEM saves time and space.

On top of things
by keeping things tidy

Divider with slotted rail holder
Clear view, easy to operate, straight-forward assembly.

The divider with slotted rail holder can be fitted into any drawer at various heights.

Divider with insert
The removable insert provides a clear view and allows for easy cleaning.

Whether aluminium or plastic, the frames of the divider with insert are a perfect fit.

The sliding divider in drawers
Anything is possible

Any width. Any height. Any depth.
H+H SYSTEM's flexible divider
saves up to 30 % space.

Patented solution
The sliding divider is
compatible with any product.

AluCool® single drawer

The high conductivity of aluminium ensures optimum temperature distribution throughout the refrigerator.

AluCool® drawer for blood bags

Perfect cooling and full view of the blood bags in the cooling area.

Plastic drawer

H+H SYSTEM harnesses all the material benefits of plastic to manufacture grey, clear or coloured drawers in a wide range of hues.

H+H SYSTEM as an experienced specialist in the refrigerator sector

Flexible organisation for every refrigerator

H+H SYSTEM comes into its own in sensitive areas: high-quality materials, handcrafted for optimum storage and safety.

Drawer block and single drawer

A perfect interplay of two systems for any refrigerator.

Dividers in any refrigerator
For medicines, blood and plasma

H+H SYSTEM

Everything in its place

The modular tray system
Indispensable in hospitals

H+H FlexModul®

The all-time favourite among the modular tray system. A combination of tray and basket.

H+H FlexTray

Hygienic and leak-proof. Ideally suited for containers with liquids.

H+H FlexBasket

Minimal dust accumulation and weight, ideal ventilation as an added benefit.

H+H Wire Basket

Made of high-quality stainless steel or white Rilsan coating.

Modular tray systems that meet ISO and DIN standards
Flexible and perfectly designed

H+H FLEXMODUL®

Extraordinary versatility
Even here, the sliding divider saves up to 30 % space.

Perfect view, perfect handling and perfect working. Whether on the shelf, in the cart or in the cupboard. Offering a whole host of labelling options.

Infinite possibilities The individual storage system

Made from high-grade aluminium. Combined with the H+H FlexModul and accessories such as shelves, lids, sterilisation and heavy-duty drawers, a simple shelf becomes an extremely flexible work and storage system.

H+H FLEXSHELF®

Create the ultimate storage and logistics environment.

From shelf to all-rounder
Storing, preparing, working

H+H FLEX SHELF®

*Assemble exactly to
your preference*

The shelf divider
Everything in the right place

Divider with shelf rail
Open at the front for easy, space-saving access to items.

Divider with angled shelf front
Attached to the front, the system prevents items from falling out.

Divider with clear plastic rail U3
Clear plastic rail with sliding dividers is easy to remove to facilitate quick cleaning.

Divider for the self-service and behind-the-counter area
Completely removable, clear display, immediately obvious when minimum stock level has been reached.

H+H SYSTEM as a leading shelf specialist For storage and display purposes

Optimal overview everywhere
Each shelf can be organised individually.

Prevents products from tipping over or falling out. Clearly sorted and arranged, with a wide range of labelling options, the H+H SYSTEM shelf divider offers an unobstructed view and easy access not only to customers but also to storage room staff.

Card holders in various formats
For modular trays and drawers.

Branding
Create your company logo using logo
inserts.

Cards for all card holders
Either labelled manually or printed with
barcode.

Labelling rail
Cards and labels can be organised
in a clearly-arranged manner.

Finding instead of searching Labelling and logistics for all storage systems
