CLIP accessories

Description:

The tactical advantage of the **Clip accessories** is their miniature design, through which they protect against unintentional shot, provide hidden carrying and fix weapons behind the pants belt in convenient for the ownerplace. The accessory is put on the trigger guard and fastened with an adjustable cord on a pants belt. The practical use of «**Clip**» provides rapid removal of the handgun, in which, due to the fixation cord, the accessory is removed and provides the ability to open a fire quickly. Wherein, the special design does not allow the accessory to come off when a weapon falls out, which helps to prevent losing the gun in an emergency.

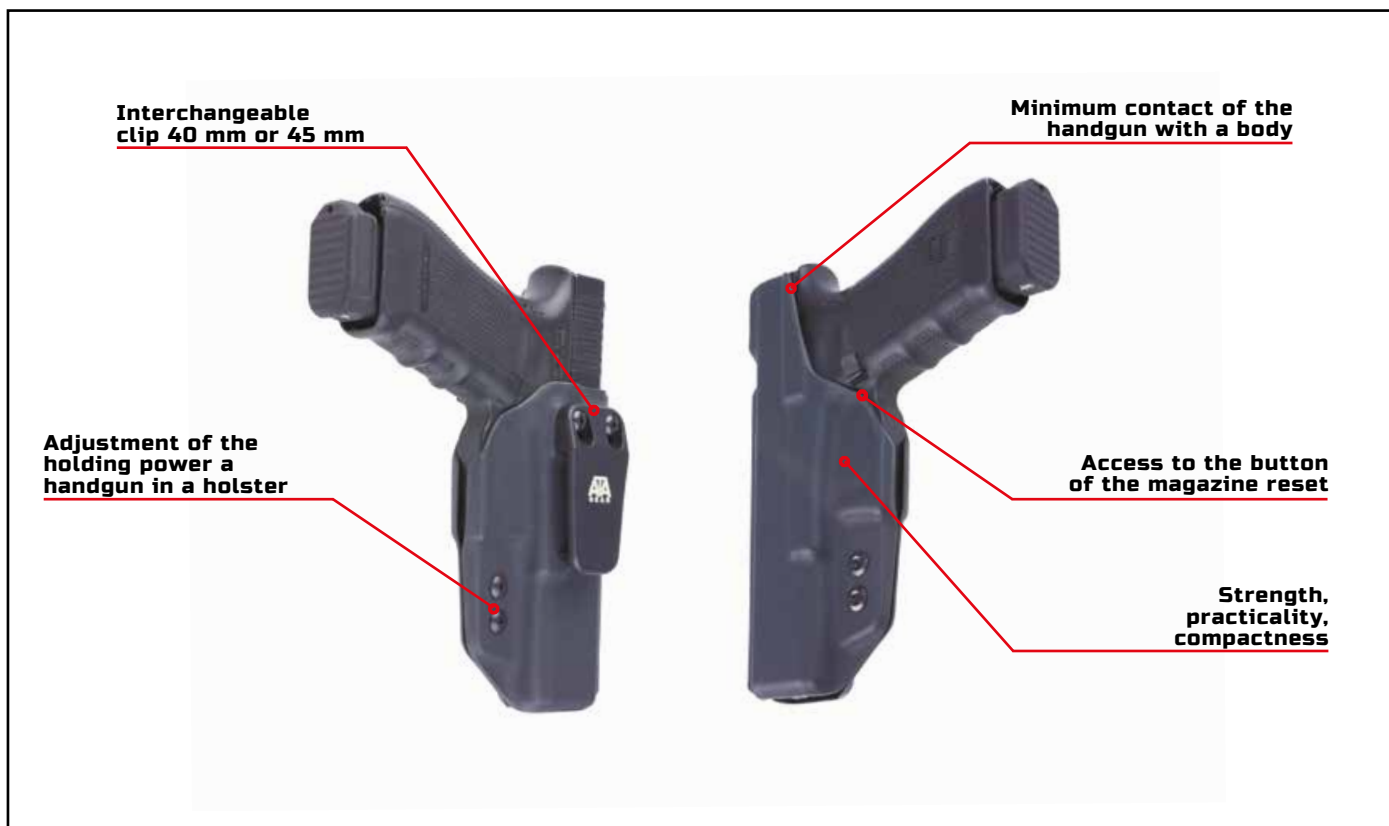

ATTENTION: the Clip accessory does not replace a full holster, as it does not protect the metal parts of the weapon from contact with the body.

Available colors:

You can find color options for this model of holster on **p. 2 – 3**

FANTOM ver. 3 holsters

Compatible accessories:

Clips ULTICLIP — designed for wearing inside pants holsters without belt and attached to clothing with a special clip. Due to its simplicity of design, clips are easy to use and very firmly attached to clothing.

Accessory RIGGER — is placed on the holster at the level of the pants belt. Belt due to the pressure on the accessory, slightly expands and presses the holster in such a way that the handle of the handgun more closely adheres to the body of the weapon's owner, thereby provides a minimum vision of the presence of a handgun on its owner's body.

Description:

Holster model **Fantom ver. 3** is an excellent solution for the most secretive inside the waistband carrying weapons even under light clothing, such as a T-shirt or tennis shirt. Thanks to its ergonomic shape and configuration features, the holster takes up very little space and is comfortable to place around the entire circumference of the owner's waist: in front, at one o'clock in the afternoon, on side. The holster is designed to adjust the holding force of the handgun in it and installation of the clips under a belt width of 40 mm or 45 mm. You can also optionally install a special **RIGGER** accessory for stronger pressing the handle of the weapon to the human body or a **ULTICLIP** for wearing a holster without pants belt.

Important! Holster model **Fantom ver. 3** is worn only inside the waistband. The manufacturer does not warrant reliability of mounts with other options for wearing a holster.

Available colors:

You can find color options for this model of holster on **p. 2 – 3**

FANTOM ver. 4 holsters

Compatible accessories:

Clips ULTICLIP — designed for wearing inside pants holsters without belt and attached to clothing with a special clip. Due to its simplicity of design, clips are easy to use and very firmly attached to clothing.

Description:

Holster model **Fantom ver. 4** is the same as **Fantom ver. 3** due to its ergonomic shape, takes very little space, convenient to place around the entire circumference of the owner's waist and provides the adjustment of power holding a handgun in a holster. Unlike **Fantom ver. 3**, **Fantom ver. 4** has the ability to adjust the angle tilt holster. The holster is attached to the belt with a hook 40 mm or 45 mm wide, and due to the installed on a holster a special **RIGGER** accessory, the handgun grip is pressed to the human body as much as possible, which allows to hide even full size handguns under light summer clothes. You can also optionally install a clip for wearing a holster without a pants belt or another model of the hook.

Important! Holster model **Fantom ver. 4** is worn only inside the waistband. The manufacturer does not warrant reliability of mounts with other options for wearing a holster.

Available colors:

You can find color options for this model of holster on **p. 2 – 3**

HIT FACTOR holsters

Belt loops 40 mm

Belt loops 45 mm

Description:

Holsters model **Hit Factor** are the «golden mean» for professionals and gun enthusiasts. The holster design provides its comfortable external placement on the pants belt and provides to owner the easy access to the gun when snatching it in an emergency. Due to its technical characteristics in the holster can be adjusted the holding power of the weapon, and its shape provides a fit of a handgun to the body when wearing light outerwear, such as jackets or light jackets. Holster supplied with mounts on a pants belt 40 mm and 45 mm wide. Depending on the customer's wishes, you can install the mounts under the belt width of 35 mm, 40 mm, 45 mm and 50 mm. On the holster, you can be fixed quick-detachable mounts and many other mounts to the various short-barreled weapon systems that currently exist.

Available colors:

You can find color options for this model of holster on **p. 2 – 3**

Variants of holster mounts:

Quick E-Loop — made of plastic (manufactured by Blade-Tech, USA), are intended for out-of-belt wearing a holster under the width of the belt 40 mm. Unlike standart mounts, has a lower profile and allow to detach quickly the holster from the belt.

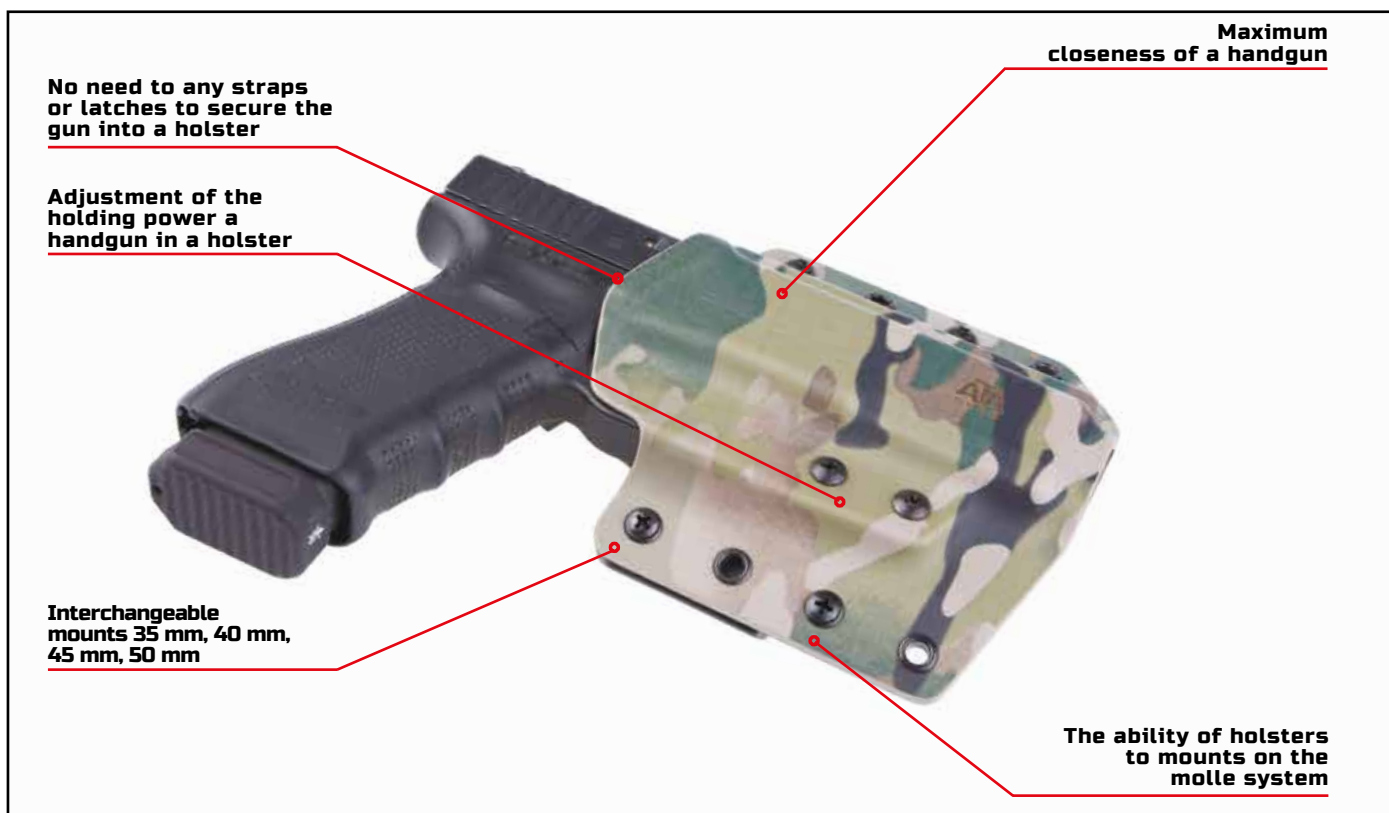

Molle-Set — made of Cordura and reinforced with a plastic plate, is designed for attaching products to the MOLLE system and the Tactical Belt Warrior. The Molle-Set is secured to the product with two screws. It allows for quick and secure installation of the product onto the MOLLE system and the Tactical Belt Warrior.

RANGER holsters

Belt loops 40 mm

Belt loops 45 mm

Molle-set

Description:

Holsters of the **Ranger** model are made taking into account the increased requirements to reliability and universality, they are lightweight and are primarily intended for military and special police officers units. Unlike the **Hit Factor** model, the bottom of the holster is completely closed in the **Ranger** model, which prevents the entry of sand, dirt and other foreign objects. Holster design provides adjustment of the holding force of the handgun in the holster. Due to its shape, the holster with the gun does not protrude and can reliably fit on any unloading system equipped with a **Molle** net, tactical belts of various types. The holster is delivered with the mounts on a pants belt 40 mm and 45 mm wide. According to the customer's request, it is possible to install mounts under the belt width 35 mm, 40 mm, 45 mm and 50 mm. Also can be fixed quick-detachable mounts and many other mounts to the various handgun systems that currently exist.

Available colors:

You can find color options for this model of holster on **p. 2 – 3**

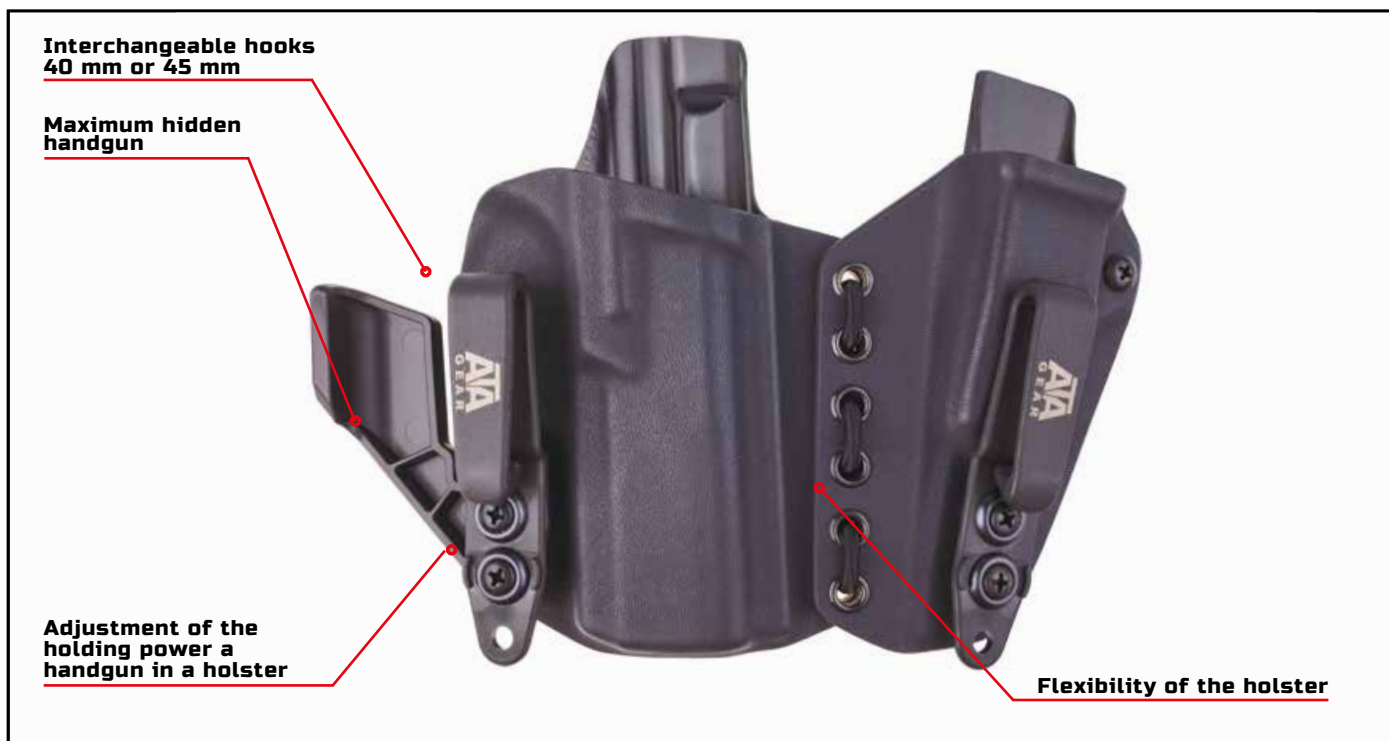

Variants of holster mounts:

Quick E-Loop — made of plastic (manufactured by Blade-Tech, USA), are intended for out-of-belt wearing a holster under the width of the belt 40 mm. Unlike standard mounts, have a lower profile and allow quick-detachable the holster from the belt.

CIVILIAN DEFENDER VER. 2 holsters

Description:

The holster of the **Civilian Defender ver.2** model has a soft bundle between the holster and the pouch, which allows you to tightly press the handgun against the body of the operator for a more secretive carrying weapons. The angle of the weapon in relation to the magazine provides the shortest extraction path when replaced, and it makes the holster very practical in conditions of real fire contact. Holster is located in inguinal area, because of which it provides the fastest access to the weapons and the magazine. The holster is attached to the belt with 2 hooks measuring 40 mm or 45 mm, and due to a special holster mounted accessory **RIGGER** the handgun grip is pressed against the human body as much as possible, which allows you to hide under the light summer clothes, even full size handgun. Holster design provides for holding force adjustment handgun and additional magazine holster.

Available colors:

You can find color options for this model of holster on **p. 2 – 3**

ALPHA SPORT VER. 2 holsters

Compatible accessories:

TEK LOK (manufactured by Blade-Tech, USA) is a proven in practice quick-detachable belt mounts. It can be attached virtually to any product and is very popular in use with holsters, pouches, scabbards and many other accessories. Can be mounted in various configurations according to specific hinge, rivet or bolt functions.

Description:

ALPHA Sport ver. 2 holsters are designed for sports purposes or for competitions according to the IPSC / IPSC, in their creation, the experience of many leading shooters and requirements international IPSC rules, are taken into account. Due to its design, the holster has the ability to adjust the angle tilt weapons in three planes, which makes it possible to adjust the holster according to the wishes of the shooter. The holster provides the ability to adjust the holding force of the gun, and a special pillow for the back of the lowering platform reliably fixes a holster during formation of a grip of the handgun by a shooter. The basic mounting option is designed for a sports belt up to 45 mm wide. For installation a holster for wider belts must be used with **TEK LOK**. Depending on the customer's wishes, for convenience of transportation, you can optionally install a special quick-release mechanism, which makes it easy to detach the holster from the belt.

Available colors:

You can find color options for this model of holster on **p. 2 – 3**

ON DUTY holsters

**The opportunity of
clamp installation**

**Adjustment of the
holding power a
handgun in a holster**

**Attaching the
platform to the leg
with a strap**

Description:

ON Duty holsters are specially designed for military and special police units. A feature of this model is its versatility. Shooter, based on the set in front of him tasks and using additional accessories, can easily place a holster on his belt with the help of a belt fastening or a special belt clip of the “paddle” type, lower this holster for convenience of pulling out the handgun, and also attach it to the **warrior belt, plate carrier** interface at an angle of 90 degrees or attach to the hip platform. For the convenience of changing position of the handgun provides the installation of a quick-detachable holster mount. The advantage holsters undoubtedly will appreciate special forces, since on the molle system, the holster mount takes up only two rows of slings and gives more extra space for other accessories on the molle.

The holster comes standard with a paddle mount.

Available colors:

You can find color options for this model of holster on **p. 2 – 3**

Variants of holster accessories:

HIP STRAP — made of rubberized cordura tape due to it does not slip on the hip and securely fixed. Installs on DD / OS GEN2 and eliminates holster detonation during quick tearing the handgun.

WRS LEVEL 2 MECHANISM W/HOOD KIT - made of plastic, mounted on a holster for additional fixation of the handgun. The presence of a spring in the design of the button allows you quickly pull the gun out of its holster.

TEK LOK (manufactured by Blade-Tech, USA) - made of plastic, it's proven in practice quick-detachable mount for a belt. It can be attached virtually to any product and is very popular in use with holsters, pouches, scabbards and many other accessories.

MOLLE GEN 3 MOUNTS (production of the company Blade-Tech, USA) - made of plastic, designed for attaching products to the molle system and tactical Belt Warrior.

DD/OS GEN2 (manufactured by Blade-Tech, USA) - made of plastic, its advantage is the ability to mount directly to the belt without additional accessories and the ability of further attaching the platform to the leg with a strap.

THE LOWERFIX LOWERING PLATFORM - designed specifically for attachment to narrow tactical belts such as Tactical Belt. The holster can be easily attached and detached from the lowering platform thanks to a quick-release mechanism. The platform is made of aluminium and coated with a special protective layer of CERACOTE paint.

KYDEX THIGH PLATFORM - kydex thigh platform combines lightness, strength and comfort wearing on the leg, and special fastexes allow to remove it quickly from the leg. It has a height adjustment for the platform.

TMMS 2 OUTER - 1 INNER KIT LARGE (production Blade-Tech company, USA) – special quick-detachable mounts allow very quickly and easy change the location of the holster, and a special mount securely locks the holster on the platform. Thanks large sizes ideal for full size handguns holsters and handguns with tactical flashlights.

Holsters series DESIGN

Description:

DESIGN series holsters are developed on the basis of existing models of holsters. According to the customer's wishes it is possible to create a different color combination of kydex, with the image, which emphasizes the individuality of the weapon's operator, making it very noticeable in competitions and other social events. It is also possible to apply a logo, which demonstrates the belonging of the shooter to the group or organization. The option of applying a single-color or multi-colored image is possible.

Available colors:

You can find color options for this model of holster on **p. 2 – 3**

Handgun mag-pouches POUCH ver. 1

The ability to join two pouches together

Adjustment retention forces of a magazine in a pouch

Interchangeable mounts 35 mm, 40 mm, 45 mm, 50 mm

Variants of holster mounts:

Quick E-Loop — made of plastic (manufactured by Blade-Tech, USA), are intended for out-of-belt wearing a holster under the width of the belt 40 mm. Unlike standard mounts, have a lower profile and allow quick-detachable the holster from the belt.

Molle-Set — made of Cordura and reinforced with a plastic plate, is designed for attaching products to the MOLLE system and the Tactical Belt Warrior. The Molle-Set is secured to the product with two screws. It allows for quick and secure installation of the product onto the MOLLE system and the Tactical Belt Warrior.

Description:

The pouches of the **Pouch ver. 1** model, due to the absence of any straps and latches, have an additional tactical advantage in magazine retrieval speed. They are suitable in using for operators of military units, special police units, civilian shooters. The basic version of fastenings is on a pants belt 40 mm wide. Depending on the customer's wishes, fixtures can be installed under a belt width of 35 mm, 40 mm, 45 mm and 50 mm or install special mounts on the MOLLE system. The design of the pouch provides for the adjustment of the holding power of the magazine. You can be fixed quick-detachable mounts and many other mounts to the various short-barreled weapon systems that currently exist.

Available colors:

You can find color options for this model of pouch on **p. 2 – 3**

Handgun mag-pouches POUCH ver. 2

Description:

Unlike the **Pouch ver.1** model, the **Pouch ver.2** model is quick-detachable and attaches to the pants belt with clips for belt width 40 mm or 45 mm. The design of the pouch provides the magazine holding force adjustment. The pouch can be placed internally and externally, magazines can be installed by cartridges forward and backward. Due to the absence of any straps and clamps, pouches give an additional tactical advantage in store retrieval speed. They are suitable for using by operators of military units, special police units, civilian shooters.

Available colors:

You can find color options for this model of pouch on **p. 2 – 3**

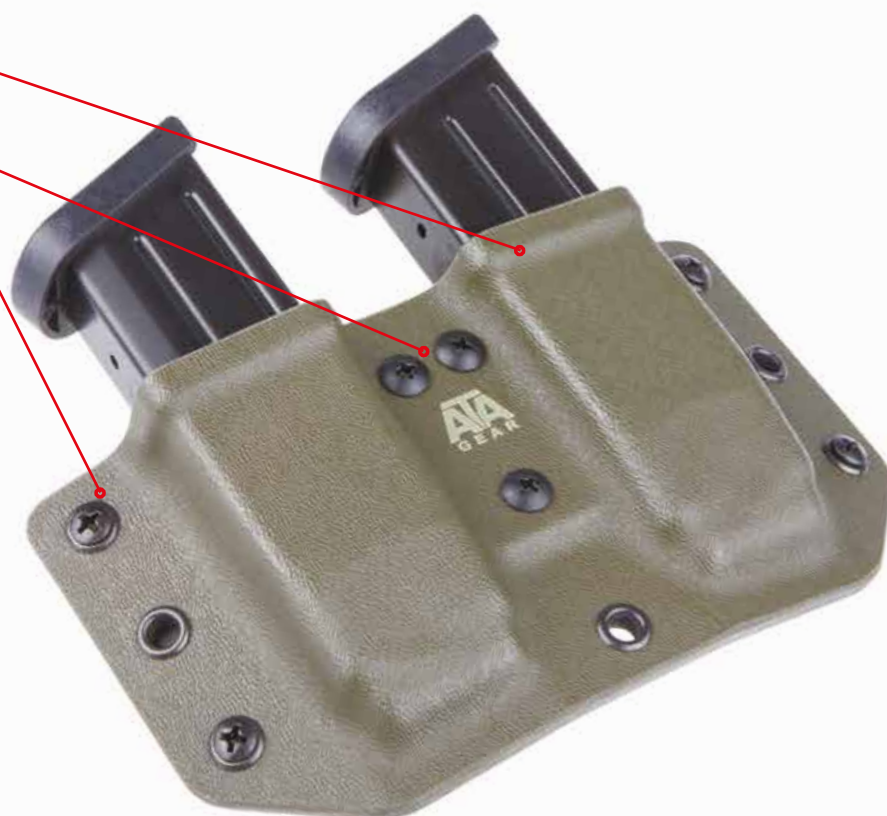

Handgun mag-pouches DOUBLE POUCH ver. 1

Maximum fit to the body

**Adjustment power
of holding each
magazine in a pouch**

**Interchangeable
mounts 35 mm, 40 mm,

Variants of holster mounts:

Quick E-Loop — made of plastic (manufactured by Blade-Tech, USA), are intended for out-of-belt wearing a holster under the width of the belt 40 mm. Unlike standard mounts, have a lower profile and allow to detach quickly the holster from the belt.

Molle-Set — made of Cordura and reinforced with a plastic plate, is designed for attaching products to the MOLLE system and the Tactical Belt Warrior. The Molle-Set is secured to the product with two screws. It allows for quick and secure installation of the product onto the MOLLE system and the Tactical Belt Warrior.

Description:

The line of pouches **Double pouch ver.1** was created based on the experience of using weapons in real conditions in order to satisfy the request for practical placement of two spare magazines with the possibility their quickest extraction and change. The double pouch is attached to the pants belt and is more compact and comfortable than two single pouches, and the location of the magazines in **Double pouch ver.1** provides easy replacement by a shorter path. Density of magazine retention in the pouch is individually adjustable. Basic version of mounts are on a pants belt 40 mm wide. Depending on the the customer's wishes, you can install the mounts under the belt width of 35 mm, 40 mm, 45 mm and 50 mm.

Available colors:

You can find color options for this model of pouch on **p. 2 – 3**

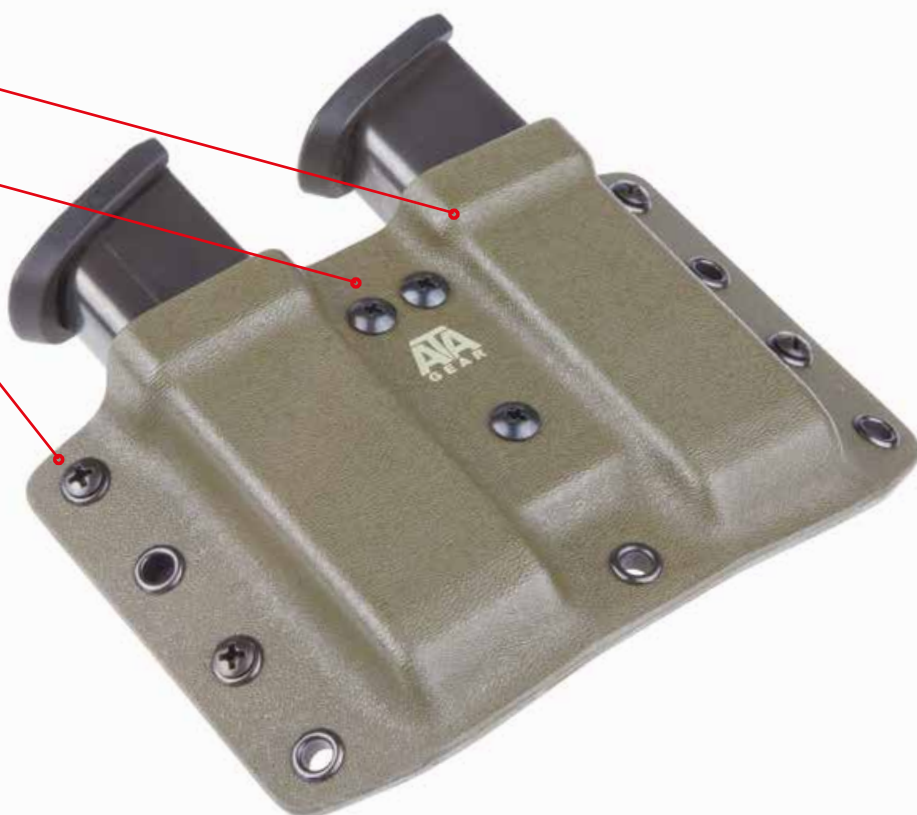

Handgun mag-pouches DOUBLE POUCH ver. 2

Maximum fit to the body

**Adjustment power
of holding each
magazine in a pouch**

**Interchangeable
mounts 35 mm, 40 mm,
45 mm, 50 mm**

Belt loops 40 mm

Belt loops 45 mm

Molle-set

Variants of holster mounts:

Quick E-Loop — made of plastic (manufactured by Blade-Tech, USA), are intended for out-of-belt wearing a holster under the width of the belt 40 mm. Unlike standard mounts, have a lower profile and allow quick-detachable the holster from the belt.

Description:

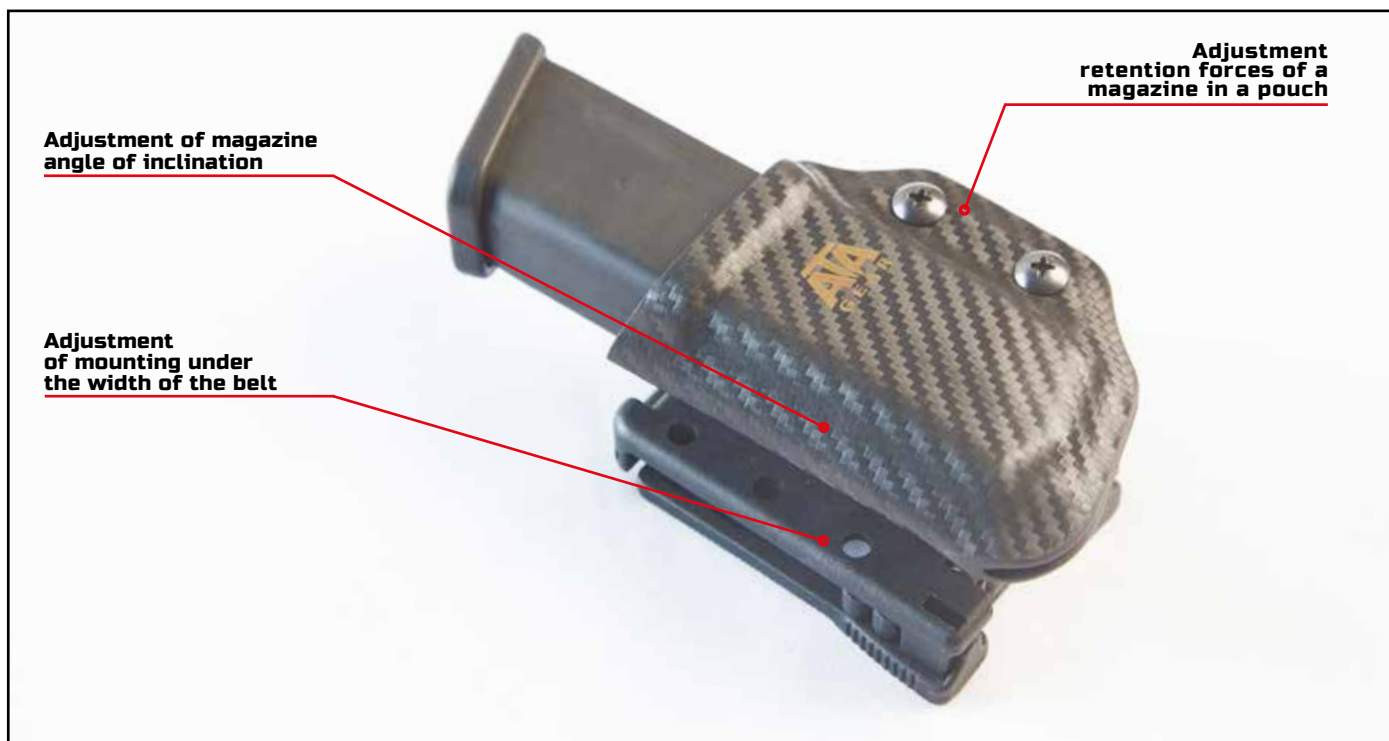

The line of pouches of the **Double pouch ver. 2** was created for military units. To ensure reliable retention, in the pouch **Double pouch ver. 2** has deeper fitting of magazines. The double pouch is attached to the pants belt and is more compact and comfortable than two single pouches, while the location of the magazines in **Double pouch ver. 2** provides easy replacement by a shorter path. The density retention of magazines in the pouch is individually regulated. The basic package of the pouch includes mounts on a pants belt 40 mm and 45 mm wide, as well as mounts on a molle system. Depending on the customer's wishes, it is possible to install mounts for belt widths of 35 mm and 50 mm.

Available colors:

You can find color options for this model of pouch on **p. 2 – 3**

Handgun mag-pouches POUCH SPORT

Description:

Sport series of pouch are designed for sporting purposes or for competitions in the IPSC / IPSC. When creating them, the experience of many leading shooters and requirements of international IPSC rules were taken into account. Due to its design, the pouch has the ability to smoothly adjust the angle of the magazin in the range of 180 degrees. The design of the pouch provides for the adjustment of the holding power of the magazine. To the pants belt is fastened by a TEK-LOK accessory manufactured by Blade-Tech, USA. Also on the pouch it is possible to install a magnet to hold an additional store.

Available colors:

You can find color options for this model of pouch on **p. 2 – 3**

AK / AR ver. 1 (rifles) mag-pouches

Compatible Accessories:

Quick E-Loop — made of plastic (manufactured by Blade-Tech, USA), are intended for out-of-belt wearing a holster under the width of the belt 40 mm. Unlike standard mounts, has a lower profile and allow to detach quickly the holster from the belt.

Molle-Set — made of Cordura and reinforced with a plastic plate, is designed for attaching products to the MOLLE system and the Tactical Belt Warrior. The Molle-Set is secured to the product with two screws. It allows for quick and secure installation of the product onto the MOLLE system and the Tactical Belt Warrior.

Description:

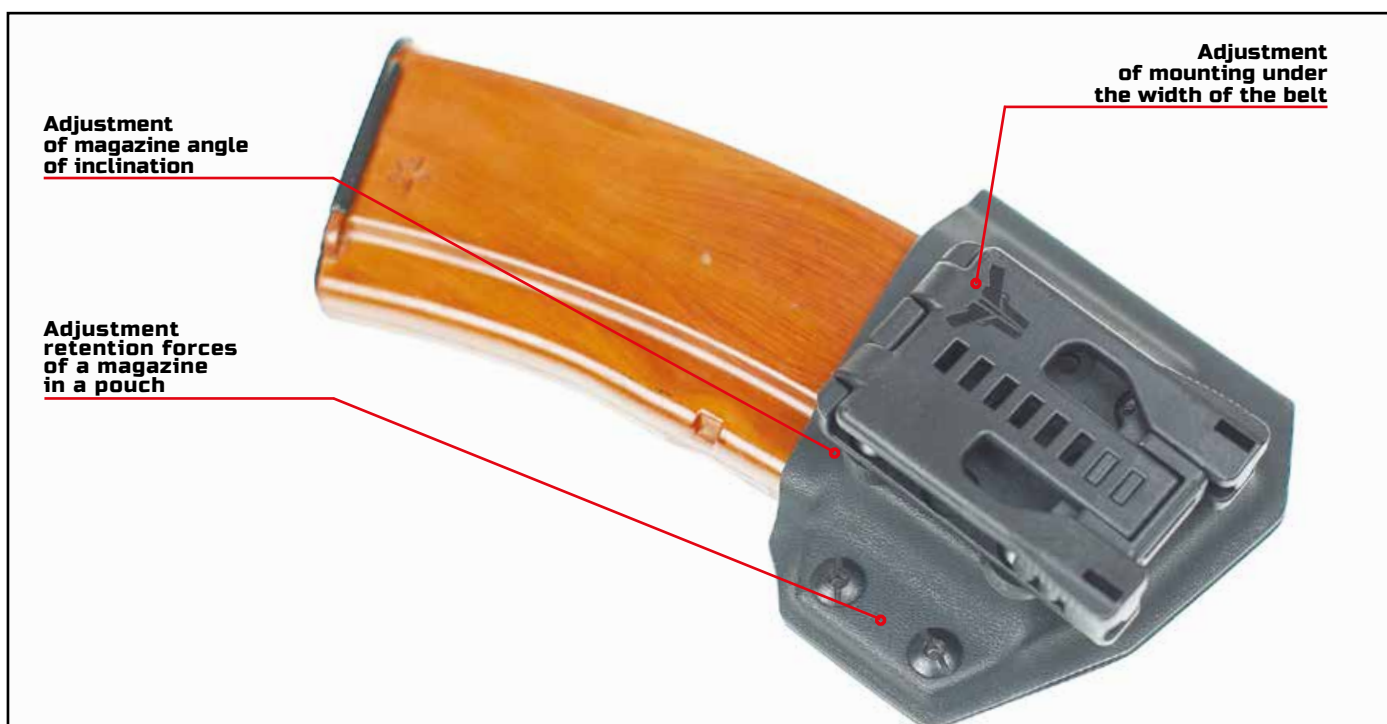

The line of pouches «**POUCH v. 1 (rifles) for AK, AR-15 magazines**» was created on the basis of the need for covert wearing of the magazine under outer clothing. Due to the minimum profile of the pouch, the magazine practically does not stick out from under a T-shirt or a jacket. The pouch is attached to the pants belt using 40 mm belt loops. The retention density of magazines in the pouch is individually regulated. Depending on the customer's wishes, it is possible to install mounts on a belt of 35 mm, 40 mm, 45 mm or 50 mm wide. Pouches «**POUCH v. 1 (rifles) for AK, AR-15 magazines**» due to their minimum profile, are ideal for bodyguards who need the covert placement of additional weapon stores.

Available colors:

You can find color options for this model of pouch on **p. 2 – 3**

AK / AR ver. 7 / ver. 8 mag-pouches

Pouch ver.7 for AK / AR-15 magazines

Pouch ver.8 for AK / AR-15 magazines

Description:

The line of pouches, **POUCH ver. 7, for AK and AR-15 magazines**, was created based on experience gained from real-world weapon usage to meet the demand for practical placement of spare magazines for automatic weapons, enabling their quick extraction and replacement. The pouch is secured to the pants belt using the **Tek-Lok system**. The retention pressure of magazines within the pouch is individually adjustable. **POUCH ver. 7 pouches for AK and AR-15 magazines**, with their convex shape from the pants belt, are ideal for competitions and other sporting events.

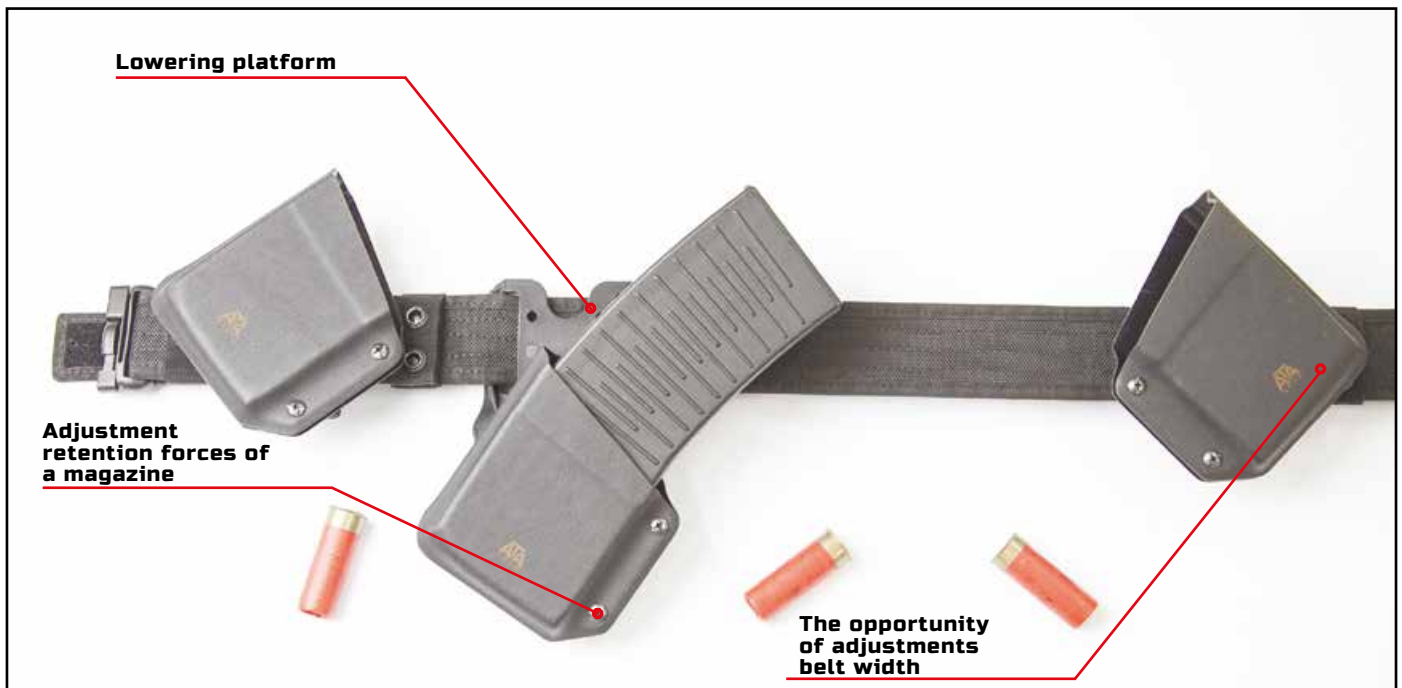

The line of pouches, **POUCH ver. 8, for AK and AR-15 magazines**, like the line of pouches **POUCH ver. 7 for AK and AR-15 magazines**, was created based on experience gained from real-world weapon usage to meet the demand for practical placement of spare magazines for automatic weapons, enabling their quick extraction and replacement. The pouch is attached to the Belt Warrior using **MOLLE Gen 3 mounts**. The retention pressure of magazines within the pouch is individually adjustable. **POUCH ver. 8 pouches for AK and AR-15 magazines** are ideal for special forces.

TOURNIQUET POUCHES

Pouch Ver. 1

Pouch Ver. 2

Pouch Ver.1 with belt loops 40, 45 mm

Pouch Ver.1 with molle-set

Pouch Ver.2 with clip

Pouch Ver.2 with Tek-Lok

Pouch Ver.2 with molle-set

Description:

Ver. 1 — this model was created for employees of the physical security and is intended for wearing on a pants belt. Due to the mounts installed on the sides of the pouch, practically does not stick out and has got a minimum profile. Influxes in the top of the pouch, almost completely close the tourniquet, so when removing the turnstile from the pouch protects the operator's clothing from damages.

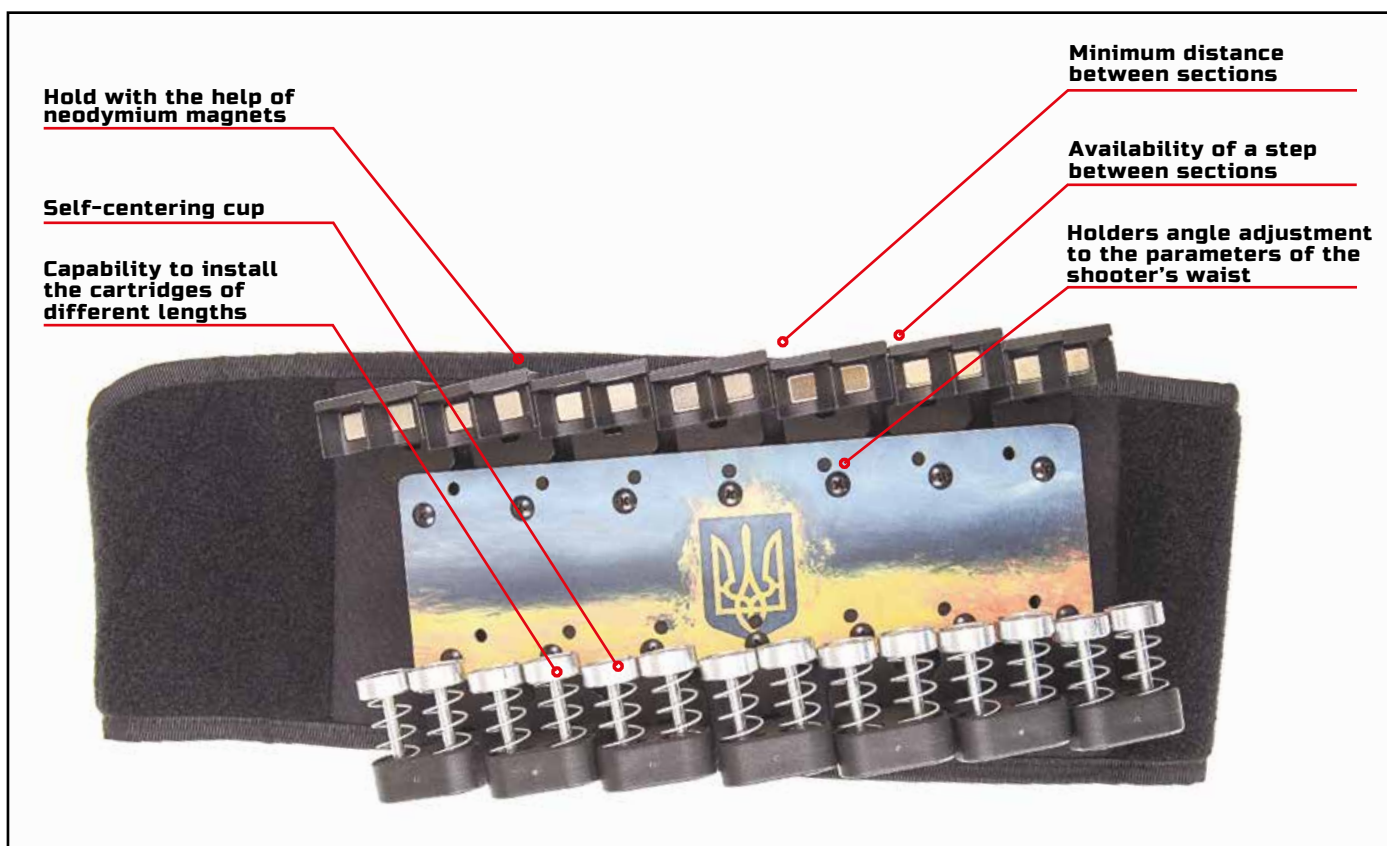

Ver. 2 — this model is designed for military people and reliably protects the tourniquet from damages, while retaining the ability easy and quickly remove it from the pouch. Due to the unified mounts, on the pouch can be installed various accessories, which allow you to mount them on the molle system, pants belt and other places.

HOLDERS FOR THE CARTRIDGES 12 GAUGE

Description:

Holders are designed for high-speed loading of 2 or 4 cartridges 12 gauge, and produced, considering the experience and recommendations of the leading shooters-athletes of Ukraine, for sports purposes.

Due to its design, the product has the ability to work with cartridges of any length without the need for additionally adjustment of the distance between the upper and lower plates, which makes it possible due to availability of springs in the design of holders. Movable parts of **holders** are made of metal, static parts are made of molded plastic, which provides a long term operation of the product at high force.

The lower cups for cartridge holding are designed so that removal of cartridges can be carry out both from the upper mounts and from the lower ones.

Holders exist in versions for both left or right control arms. Holder configuration provides that the cartridges are placed in a row at an angle, so that when they are gripped, they are found in the hand at different heights relative to each other. That is, when gripping four cartridges, the thumb is placed on cartridge below. This arrangement helps to prevent wringing of cartridges during gun loading.

1 section of holders is intended for 4 cartridges. Holders consist of blocks in which can be 7 sections (contains 28 cartridges), 4 sections (16 cartridges) and 2 sections (8 cartridges). The holder block is attached to the belt with screws.

Sections in blocks are attached to each other with a help of a kydex plate. Structurally, the plate connects sections with one another in such way that the cartridges relative to each other are located at a minimum distance, which allows to remove 4 cartridges from two sections with one grip. There are 2 rows of holes on the kydex plate which help to adjust the angle of bending of holder block to the parameters of the shooter's waist.

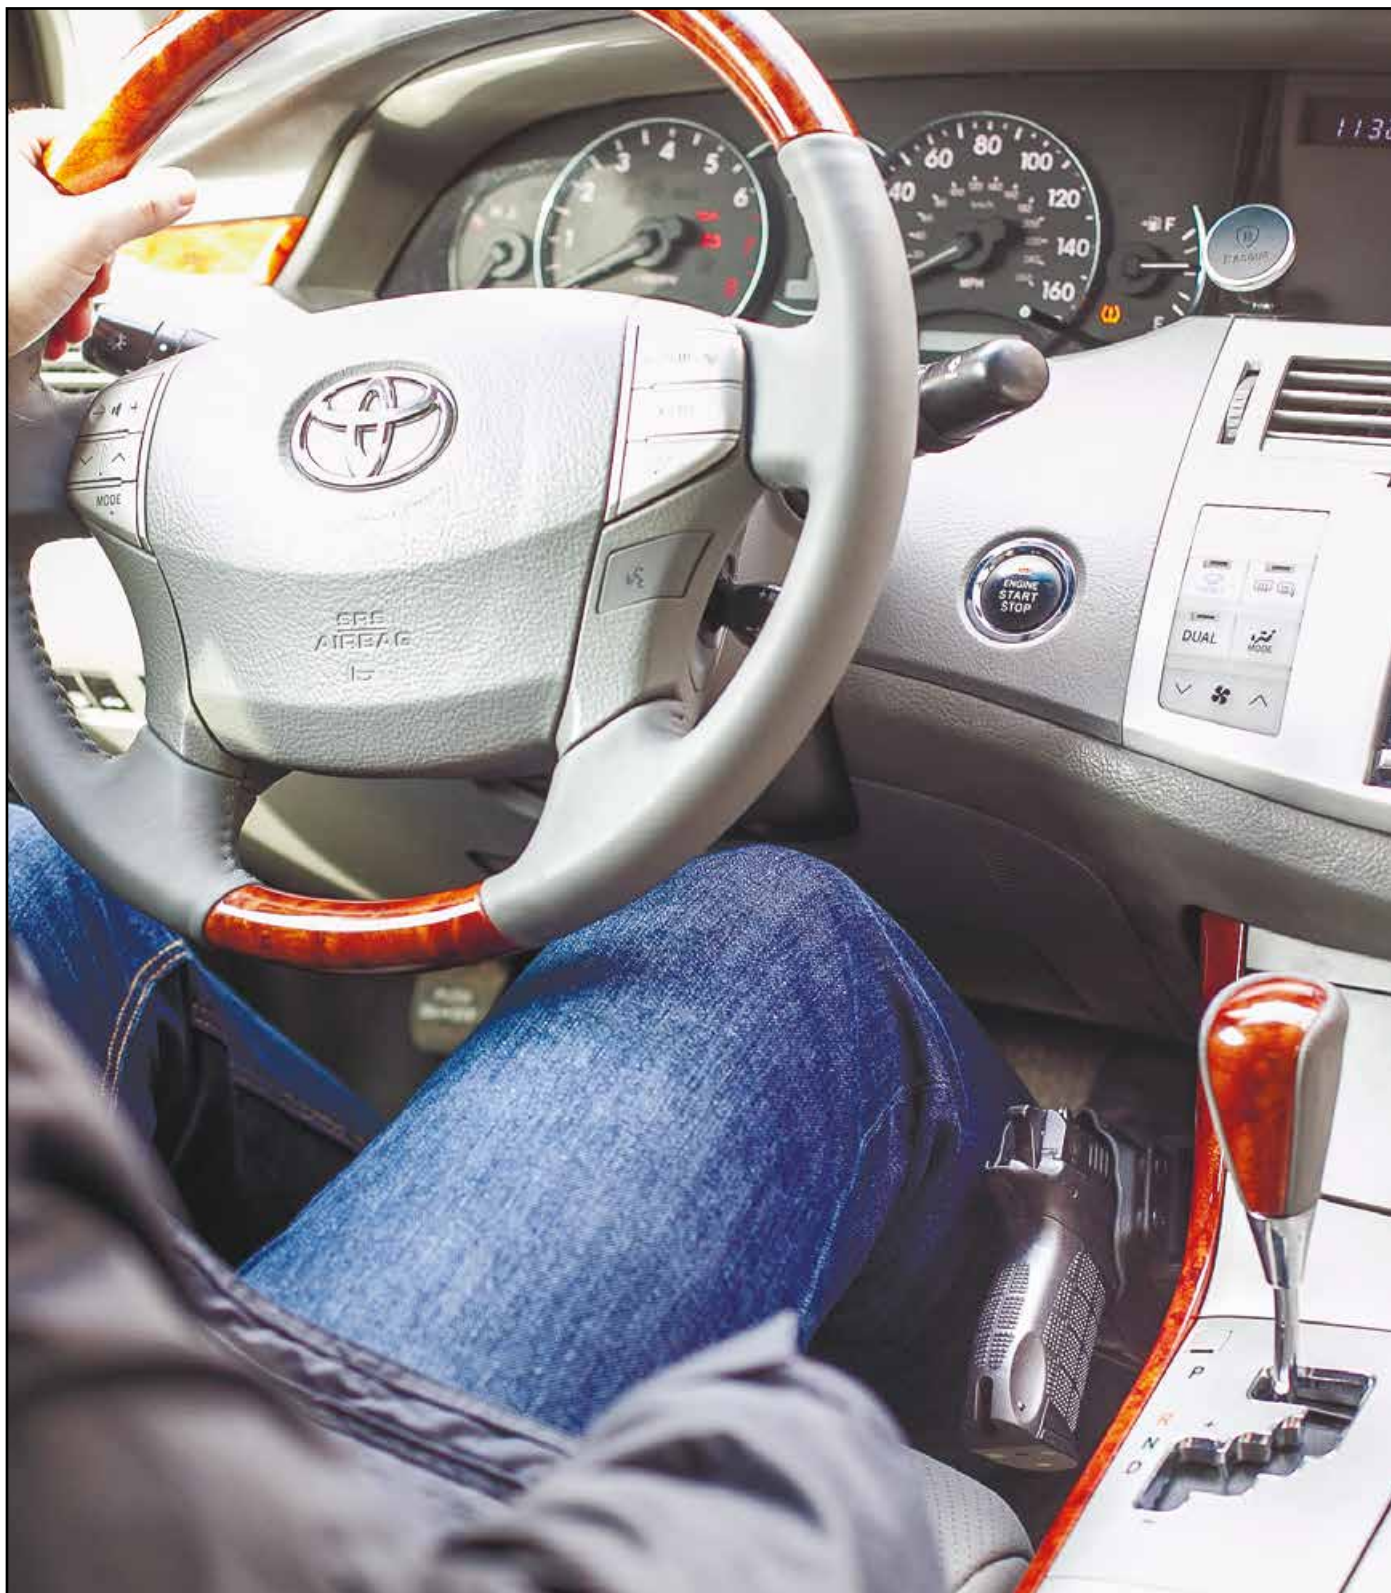

The top row of holes corresponds to the smallest waist «S» - up to 80 cm.

The bottom row of holes corresponds to «L» - 80 cm or more.

Available colors:

You can find color options for kydex plate on p. 2 – 3
