About ASRock Industrial

ASRock Industrial Computer Corporation, a subsidiary of ASRock Inc. under Pegatron Group, was established in 2018 and specializes in industrial motherboards, embedded systems, and robust edge AIoT platforms. Committed to delivering secure and open edge AI computing solutions, the company leverages strengths in edge AI computing, industrial cybersecurity, and open architecture to serve manufacturing, commercial, and retail applications worldwide.

As a global leader in industrial computing, ASRock Industrial is IEC 62443-certified and collaborates closely with leading partners, including AMD, FIDO, Intel, NVIDIA, OPAF, and UAO to advance innovation at the edge. Driven by the vision to co-create an intelligent world, ASRock Industrial continues to advance smart applications across CARES verticals – Commerce, Automation, Robotics, Entertainment, and Security.
