

ClusterLion SAP

Stress less with always-on availability for SAP Services

SAP is the backbone of many companies, and always-on availability is necessary to ensure productivity and business continuity. ClusterLion for SAP removes the need for complex clusters, shared storage, and other sophisticated infrastructure, reducing cost and complexity.

Key functionalities

All-in-One Solution:

Easy to setup, configure, and maintain.

Zero Downtime:

Ensure other services function correctly after a switchover.

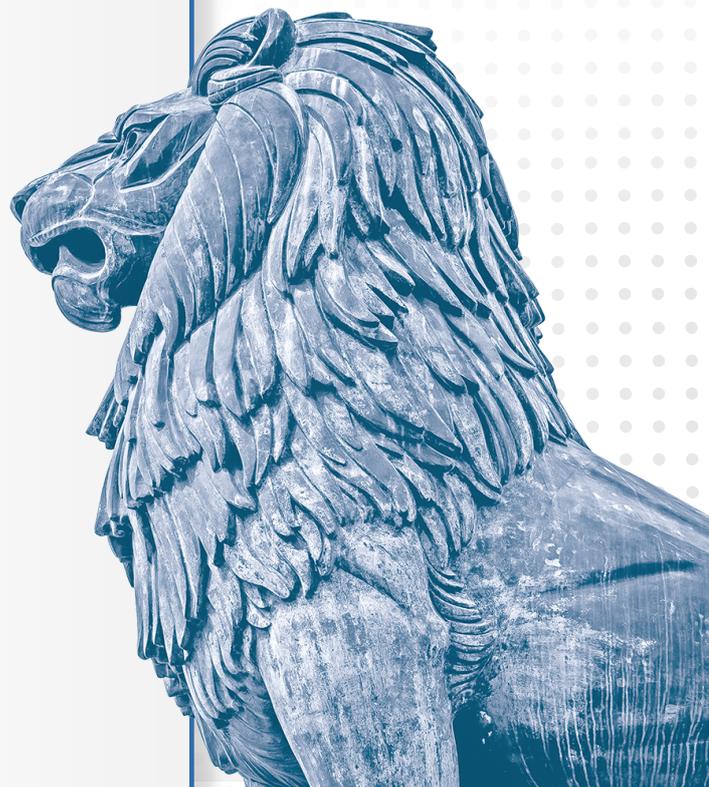

Avoid Split-Brain Complications:

Shut down the affected site and trigger failover to the unaffected site.

Maximum Security:

Guarantees only status information is transmitted to the cloud – not user data.

Instant Notifications:

Be alerted via email and a full-feature, secure REST API if a failure occurs.

Switchover:

Ensures automatic switchover on network failure.

Overview

Rapid and detailed overview in the event of a failure.

Dashboard:

Displays current status and historical event logs.

Avoid downtime & maximize productivity and revenue!

ClusterLion for SAP is hardware agnostic and supports any virtual and on-premise setup including VMware, IBM Power-VM as well as bare-metal servers from Lenovo, Cisco, Dell, HPE and more.
