

BOUNCE CLOUD

Soft bouncing
and swinging

EUROTRAMP®

TÜV-
certified according
to the playground
standard
DIN EN 1176 with
GS seal

The key
features at
a glance:

→ Safe bouncing on steel-reinforced rubber membrane surface

- Safe and carefree use for everyone thanks to reduced performance and therefore lower fall height.
- Vandalism-resistant and durable.

→ Easy installation and minimal groundwork required

- Suitable for unsealed and sealed surfaces.
- Ideal for pedestrian zones, nursery and school playgrounds, courtyards, play areas, exercise facilities, underground car parks/roofs, public open spaces, indoor areas and many other contexts.

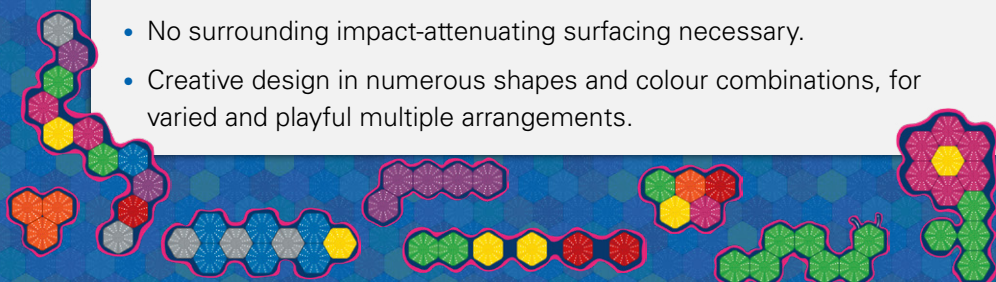

→ Temporary use or permanent installation

- Create a highlight on the market square and afterwards hand over, for example to a kindergarten.

→ Bring movement and fun in any environment

- Optimal space utilization.
- No surrounding impact-attenuating surfacing necessary.
- Creative design in numerous shapes and colour combinations, for varied and playful multiple arrangements.

Colours & more

Available in 8 colours:

On request:

- Adapt the BounceClouds colours to your company's corporate design.
- Put your brand at the centre of the action – with a customised sticker.

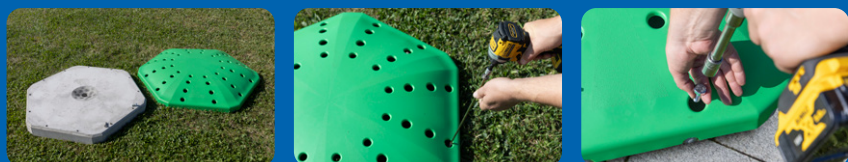

Assembly & transport

Three easy installation options:

- On unsealed surfaces: optionally available with a concrete foundation – longer service life with minimal groundwork.
- Can also be anchored in the ground with screw pegs for temporary use.
- Also mountable on sealed surfaces, from paving and tiled surfaces to concrete or asphalt – simple screw fastening.

Stackable:

- for straightforward transport and easy storage.
