# enabling a {trusted} future

with safety, cybersecurity and sustainability

# Airbus Protect brings together outstanding expertise in safety, cybersecurity and sustainability. We are a European leader in risk management.

Airbus Protect is a new entity created in July 2022 bringing together more than 35 years of experience.

Our aim is to offer end-to-end advisory, consulting services, training programmes and software solutions.

Pairing expertise built through large-scale projects with the latest insights from our own research programmes, we support customers, partners and their ecosystems across various industrial domains.

## Our Customers

Our mission is to contribute to making our clients' businesses and products safe, secure and sustainable. We enable our clients to concentrate on growing their businesses and building a trusted future.
