

“We believe  
consumers should be able  
to trust the products  
they receive.”

**SECURIKETT®**

# SECURITY INNOVATION WITH **GLOBAL** REACH

Securikett® offers security consultation, product integrity and digitization, tailored design and improved customer communication.

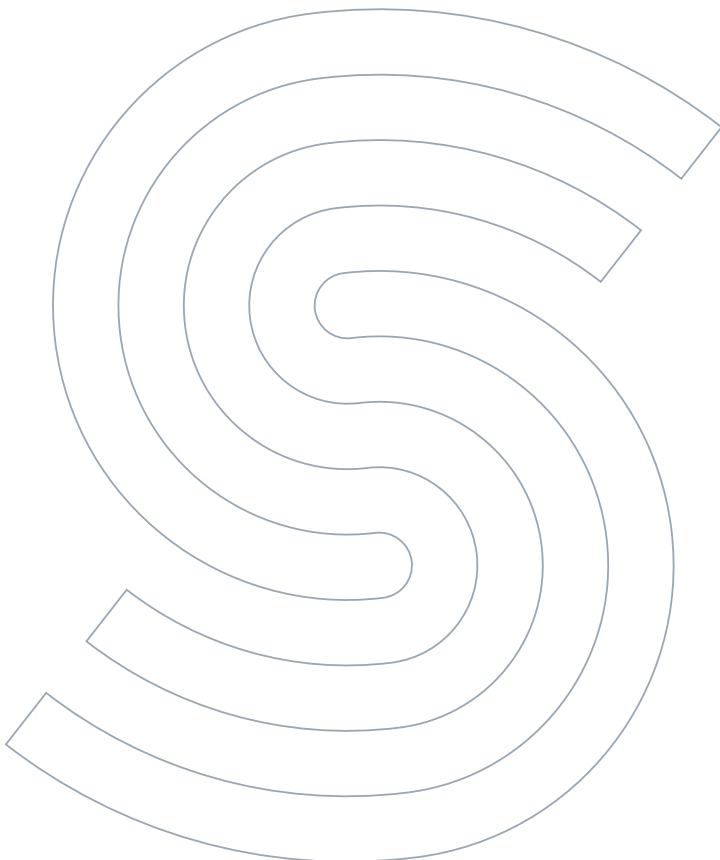

## RETHINKING **PRODUCT** AND **BRAND SECURITY**

As founders and CEOs we stand for anticipation of future needs, ongoing product innovation, proprietary technology, both in physical print products and in cloud based IT solutions.

We are passionate entrepreneurs, with generations of experience. You may trust us to make your products trustworthy.

Werner Horn  
Founder and CEO

Dr. Marietta Ulrich-Horn  
Founder and CEO

## **BUILDING CUSTOMERS' TRUST IN ORIGINAL PRODUCTS**

We ensure product authenticity to customers by directly marking the product or by labelling the packaging with security labels.

Customers can be sure that the product has not been tampered with or unauthorized re-filling has taken place.

Our proprietary tamper protection security labels and seals confirm product integrity. Due to our proprietary VOID technology labels cannot simply be transferred to a counterfeit product.

## ENHANCING PRODUCT **SECURITY** THROUGH **DIGITALIZATION**

Digitalize your products and distribution for improved security. Securikett's digital solution, CODIKETT, for UID issuing and services is developed in-house by our own team of software engineers.

The open architecture of CODIKETT modules, along with its seamless interoperability and GAMP standards in release management, make it the future proof solution for you.

Codes are applied to products for their single item identification and traceability. They are printed as 2D codes or UHF/NFC chips, and often in combination with sophisticated security labels.

## PIONEERING **PROPRIETARY TECHNOLOGY**

In our cutting edge fraud simulation studio, our experts test our R&D innovations against tampering and counterfeiting.

We are particularly proud of our continuous innovation in the area of tamper revealing VOID technologies for package safety. This progress is underpinned by the numerous patents we hold.

We have pioneered solutions that are secure and green.

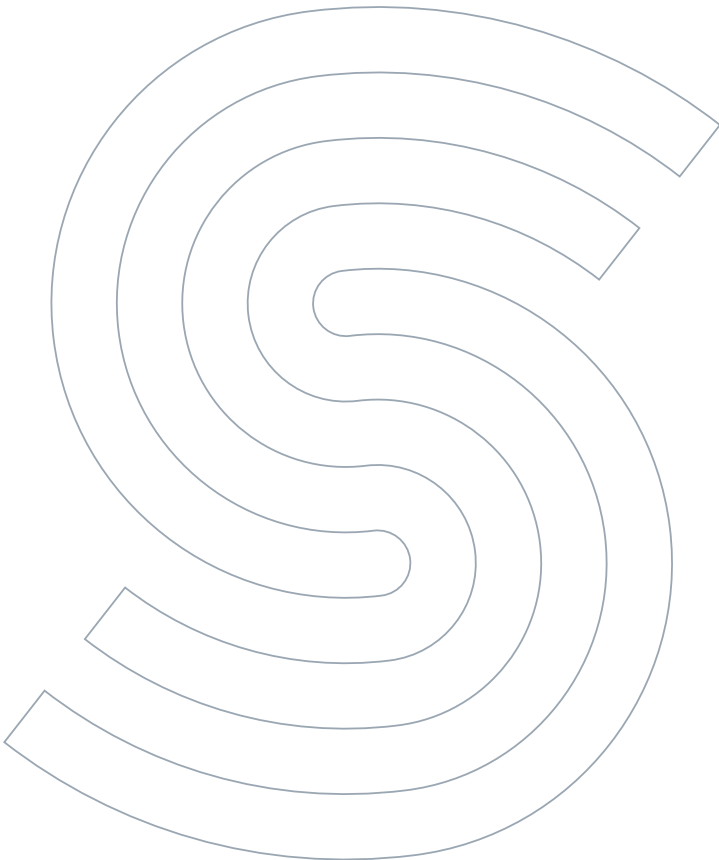

Make a difference with our recyclable products, and meet future environmental directives.

## LET'S TALK

We would be happy to discuss market trends we anticipate, or share more of our cutting-edge research from our in-house R&D team with you in detail.
