

Your trusted partner for bagging lines for bulk solids.

PAYPER designs and manufactures next-generation packaging lines for bulk solids: turn-key projects including dosing, weighing, bagging, palletizing and wrapping.

PAYPER

Why choose us

The most accurate weighing systems in the bagging industry

- In-house technology specifically designed for bagging processes
- Accredited by official metrology institutions
- Lab equipment accuracy

Exhaustive knowledge of the industry

- Great knowledge of the properties of bulk solids
- A product test area measuring 800 m², fitted out to emulate real-life conditions
- Extensive experience in multiple industries

Comprehensive tailor-made solutions

- Complete layout from the very beginning
- Ongoing project monitoring and optimal communication
- Full-line assembly and test run

First-class technical service

- **Team of 50+** dedicated service engineers
- Pulsar, our digital solution for advanced service management
- Quick response through our **24/7 customer service**

Trusted by the world's leading enterprises

- We only use components from internationally recognized brands
- Leading engineering companies trust us
- **5,000+** projects delivered around the world

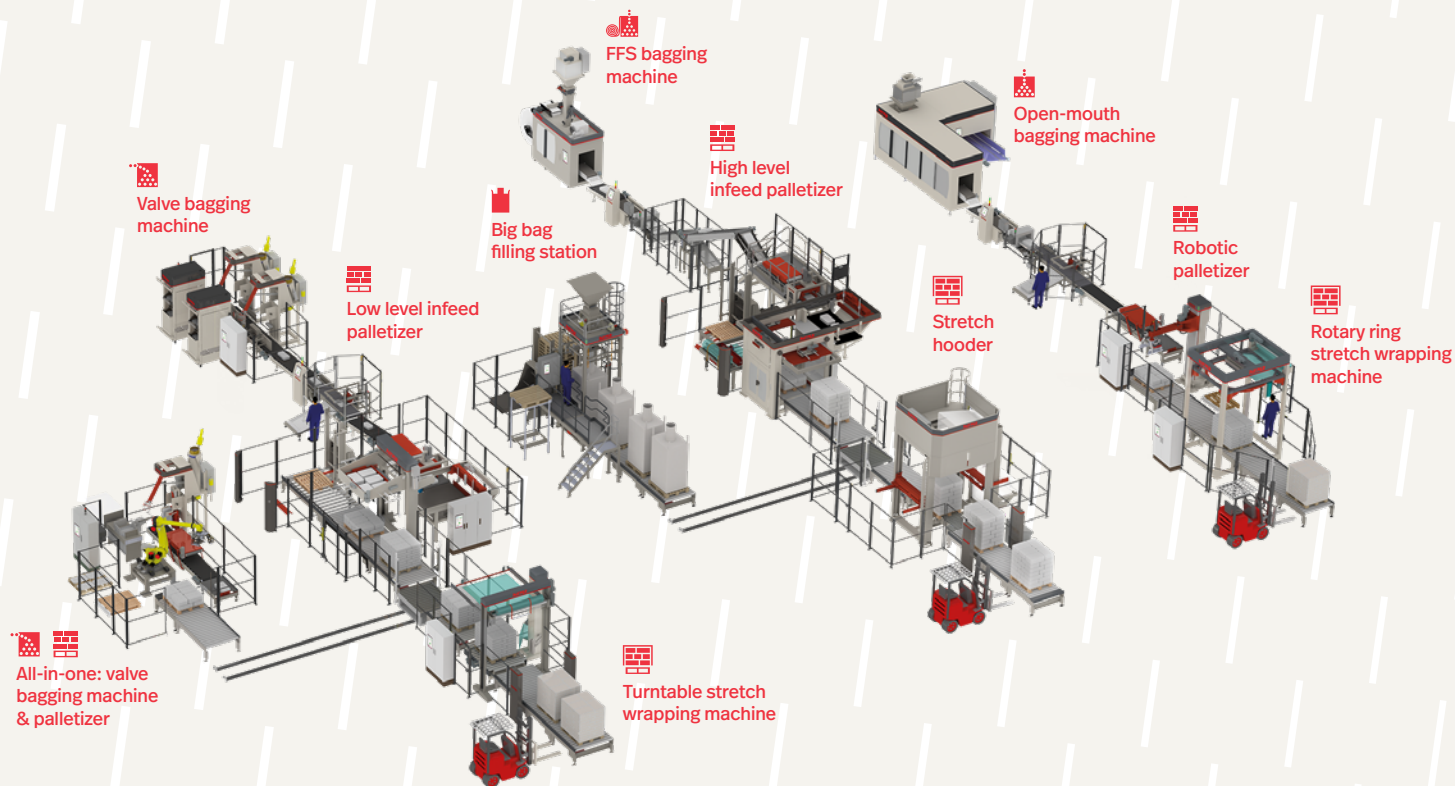

Complete solutions, from dosing to pallet protection.

			
Dosing & Weighing Highly accurate dosing and weighing systems. In-house technology specifically designed for bagging processes.	Bagging High-performance bag-filling machines for open-mouth bags, valve bags, tubular FFS bags and bulk bags.	Palletizing From single gripper head robots to high-output conventional systems. Reliable bag palletizers for any production capacity.	Pallet hooding & wrapping End-of-line solutions for maximum pallet stabilization and protection during transport and storage.

At the service of your industry

We use our experience, technology and knowledge to serve your industry.

 BUILDING	 PETROCHEMICAL INDUSTRY	 PET FOOD	 HUMAN FOOD	 AGRICULTURE
 MINING	 CHEMICAL INDUSTRY	 AQUA FEED	 ANIMAL FEED	 FERTILISER INDUSTRY

We stand for

ACCURACY.

The most accurate weighing system in the bagging industry

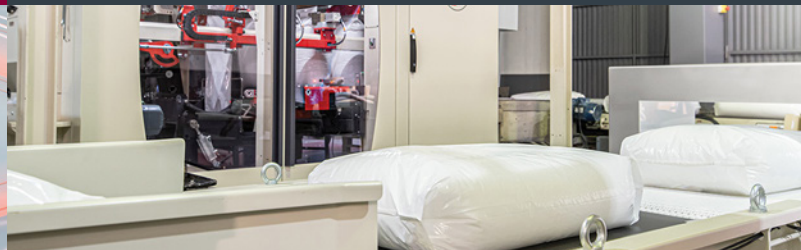

MSX: Specifically designed for the bagging process, ensuring maximum accuracy at high bagging speeds..

CONTROL.

Full production control at your fingertips

The new all-in-one digital solution, Pulsar, for advanced production management and service.

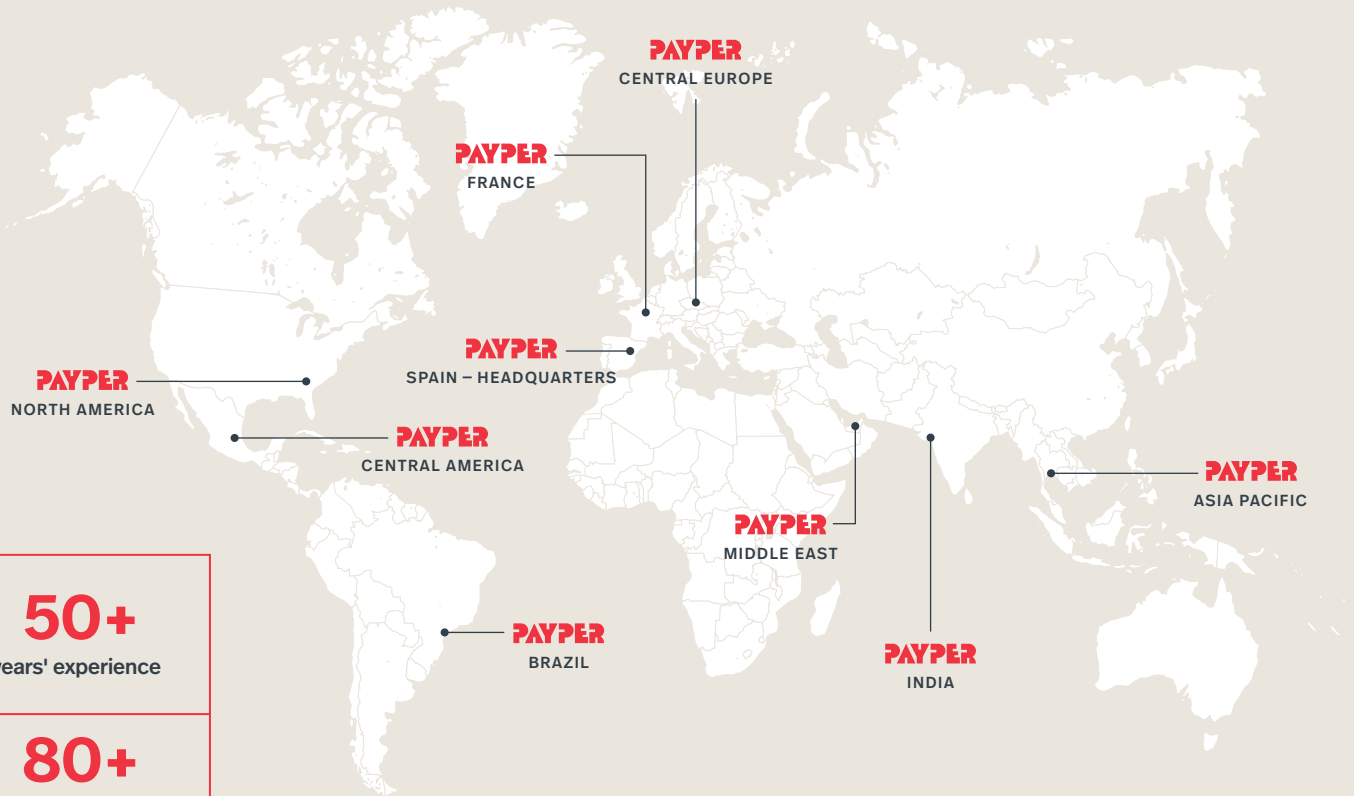

PERFORMANCE.

Optimize the performance of your production line

We design and manufacture high-performance bagging lines for the world's leading companies.
