The Flexible Sliding Divider

Transform your drawers into a masterpiece of organisation and efficiency.

Optimal use of space:
Why is the Sliding Divider the ideal solution for you? Because its flexible design adapts to every product's packaging size and saves up to 30% space.

Optimise space.
Save time and money.

In mere moments, our Flexible Sliding Divider system transforms disorderly drawers into a masterpiece of organisation and efficiency.

An innovation in organisation

Easy to move - perfect adaptation to your products

Easy removal of products through flexible ends

For a perfect fit, simply shorten the divider at the predetermined breaking points

Quick overview with integrated card holders for organised labelling

The Sliding Divider

Which option is the perfect solution for you?

1
Divider with Slotted Rail Holder
Benefit from a perfect overview, simple handling and easy installation.

2
Divider with Insert
The removable insert provides a clear view and allows for easy cleaning.

3
Drawer Trays
Order, overview and easy cleaning thanks to removable trays.

A place for everything
and everything in its place.

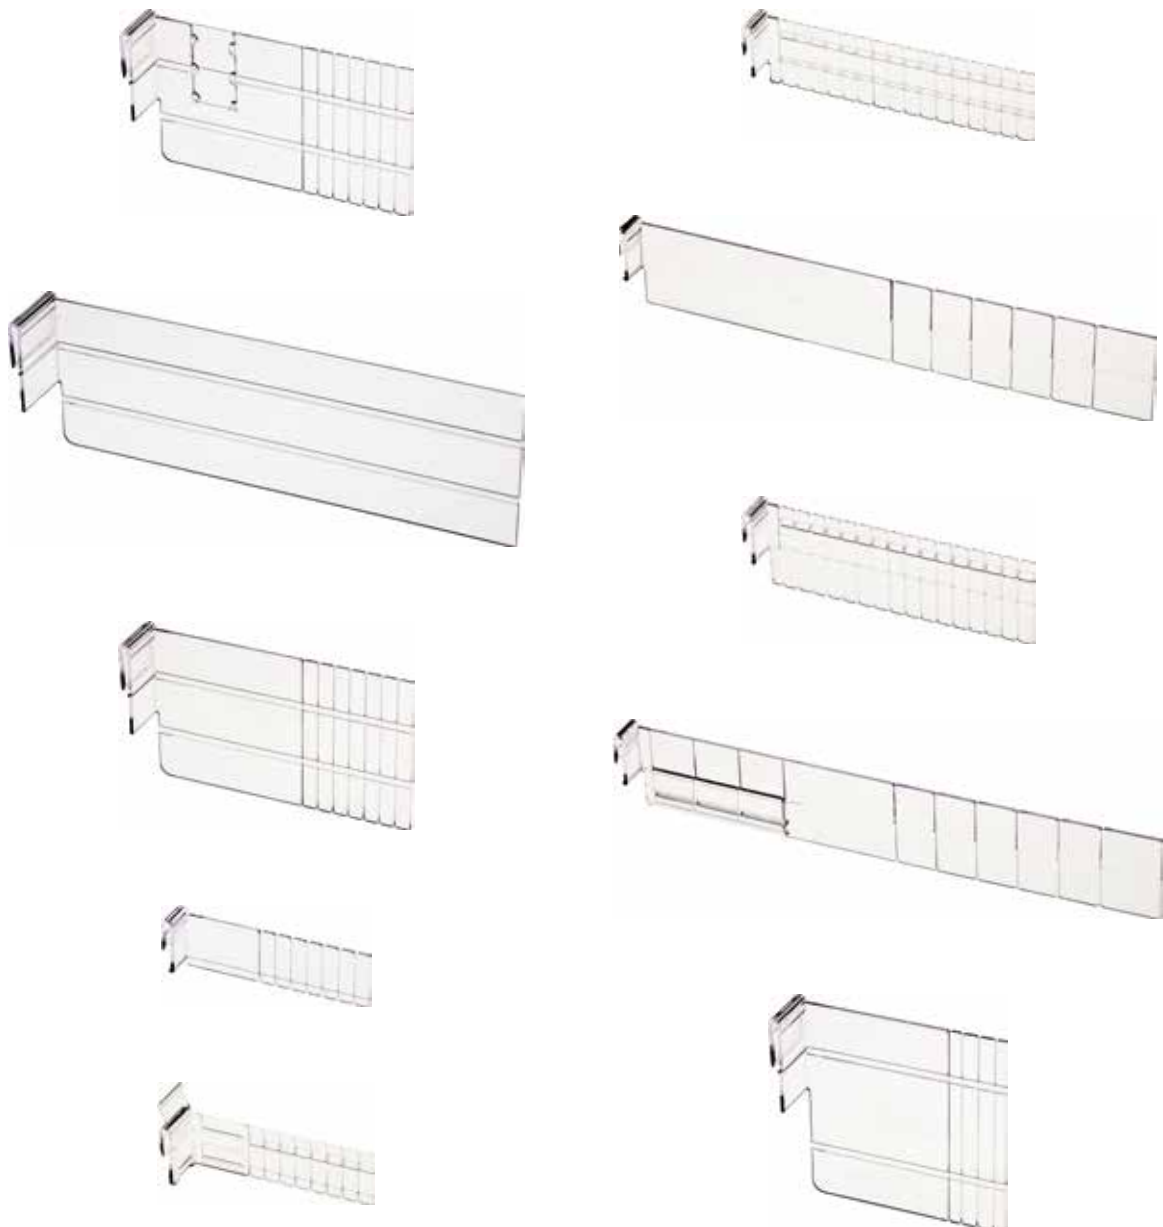

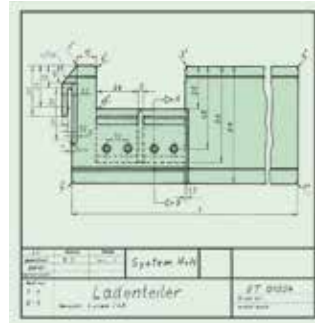

**I can see
clearly now**

Not only does the Flexible Sliding Divider make daily work with meds far more efficient, it reduces the chances of error to an absolute minimum.

H+H SYSTEM's Flexible Sliding Divider Ingeniously simple. Simply ingenious.

An ingeniously simple idea has grown into something big. After the original Sliding Divider was invented by the Hrovat family in the early 1970s, many other variations have followed. This design drawing, patented in 1973, was just the beginning!

1

The Sliding Divider with Slotted Rail Holder

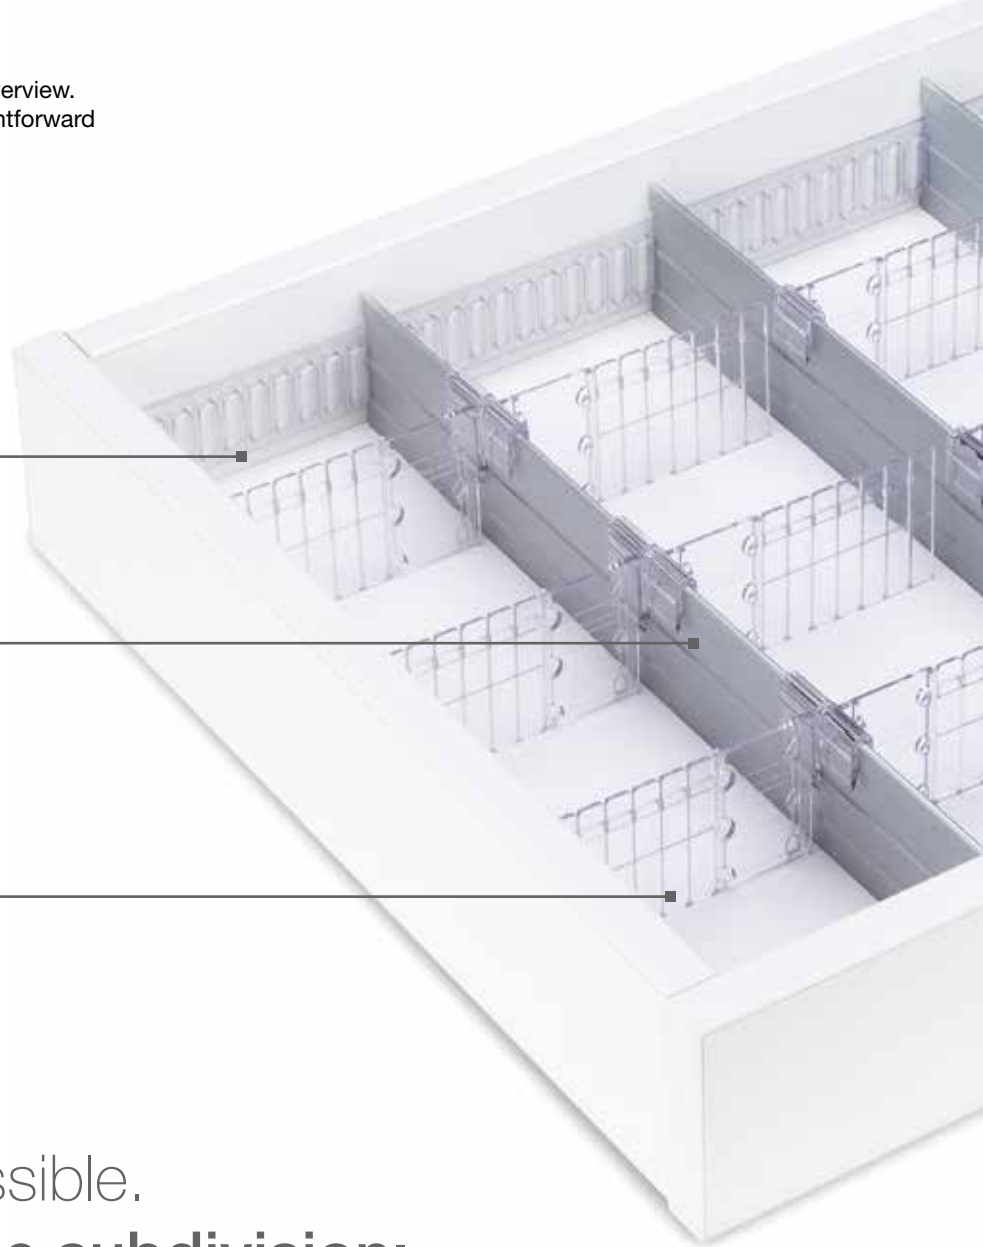

Benefit from a better overview.
Easy to operate. Straightforward
assembly.

The perfect overview
in just three easy steps:

Step 1: Slotted Rail Holder
Simply stick the Slotted Rail
Holder to the inside of the drawer.

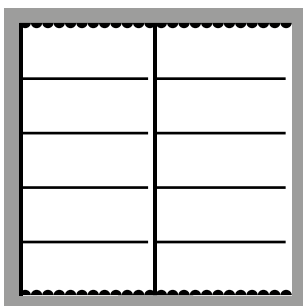

Step 2: Aluminium Rail
Slide the Aluminium Rail into the
Slotted Rail Holder. H+H SYSTEM
provides rails of all lengths to suit
any drawer dimensions.

Step 3: Sliding Divider
Adjust the Sliding Divider to the
desired length by snapping it off at
the predetermined breaking point.
Optimise clarity with our labelling
system.

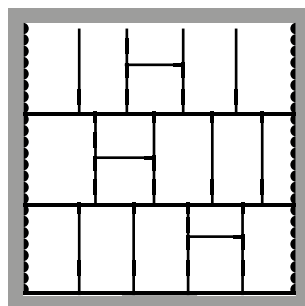

Nothing is impossible.

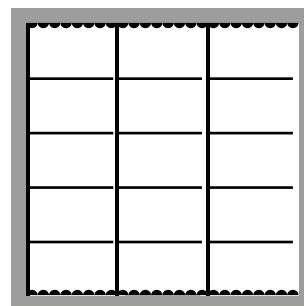

Examples of the subdivision:

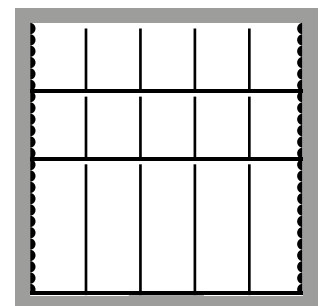

Subdivision lengthwise
2 lanes

Subdivision crosswise
3 lanes

Subdivision lengthwise
3 lanes

Subdivision crosswise
3 lanes

The ultimate in flexibility

Even if your requirements change, order remains. With the Slotted Rail Holder subdivision, there is no limit to flexibility. Simply add or remove elements at any time to suit your changing needs.

Installation made easy

In just three easy steps you can divide a complete drawer. Simply stick the Slotted Rail Holder to the inside of the drawer, insert the Aluminium Rail into the desired position, adjust the Sliding Dividers to the width of the lanes, insert, done!

Standard system heights

- 35 mm for an interior drawer height from 40 mm
- 45 mm for an interior drawer height from 50 mm
- 55 mm for an interior drawer height from 60 mm
- 100 mm for an interior drawer height from 110 mm
- 125 mm for an interior drawer height from 135 mm
- 150 mm for an interior drawer height from 160 mm
- 200 mm for an interior drawer height from 210 mm
- Made-to-measure heights also available

2

The Sliding Divider Drawer Inserts

The removable insert affords a perfect overview and makes cleaning a breeze.

The perfect overview
in just three easy steps

Step 1: Frame

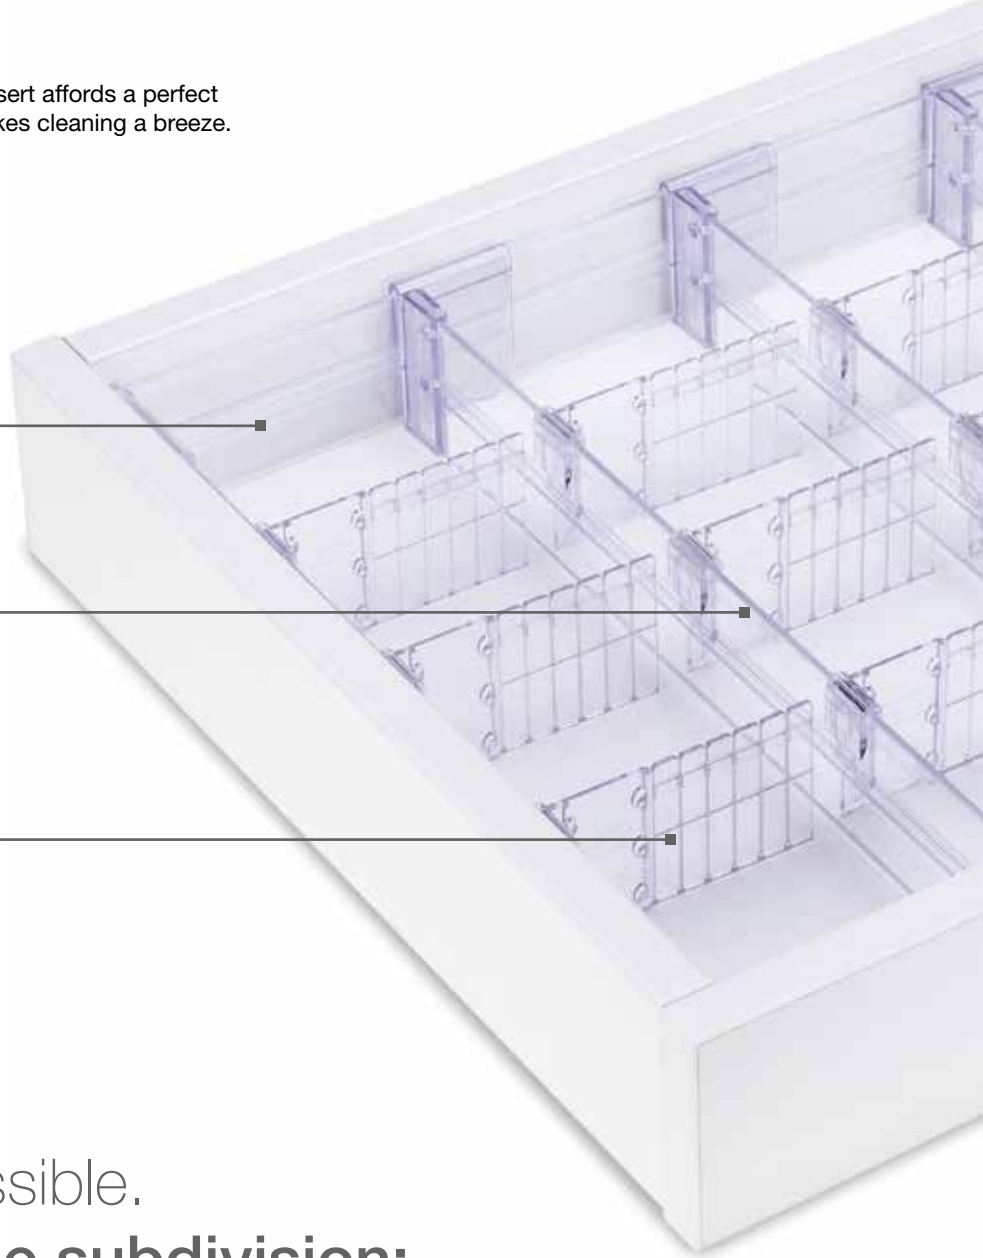

Simply frame the inside of your drawer with four matching dividers.

Step 2: Dividers to create lanes

Add dividers onto the frame and move to the desired position.

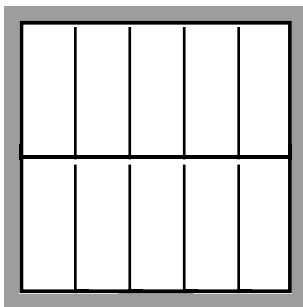

Step 3: Sliding Divider

Adjust to the desired length by snapping off at one of the predetermined breaking points. Optimise clarity with our labelling system.

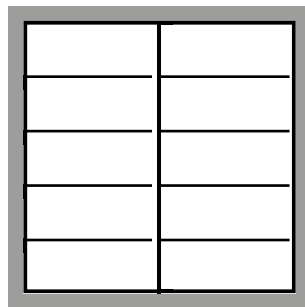

Nothing is impossible.

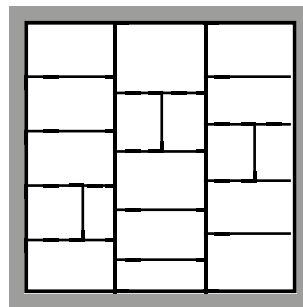

Examples of the subdivision:

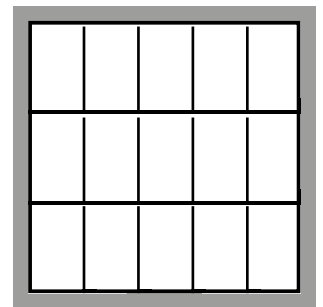

Subdivision crosswise
2 lanes

Subdivision lengthwise
2 lanes

Subdivision lengthwise
3 lanes

Subdivision crosswise
3 lanes

A Solid Framework

The entire framework of this insert can be easily removed for effortless cleaning or relocation to another drawer. Due to its flexibility, the subdivision guarantees perfect order and overview.

Clean in no time

Given that the entire insert is easily removable, quick cleaning and thus maintaining optimal hygiene requires very little effort. After cleaning, simply return the insert back into the drawer and you're done!

Standard system heights

- 35 mm for an interior drawer height from 40 mm
- 45 mm for an interior drawer height from 50 mm
- 55 mm for an interior drawer height from 60 mm
- 100 mm for an interior drawer height from 110 mm
- 125 mm for an interior drawer height from 135 mm
- 150 mm for an interior drawer height from 160 mm
- 200 mm for an interior drawer height from 210 mm
- Made-to-measure heights also available

3

The Sliding Divider Drawer Trays

Order, overview and easy cleaning
made possible with removable Drawer
Trays.

The perfect overview in just three easy steps

Step 1: Insert Tray

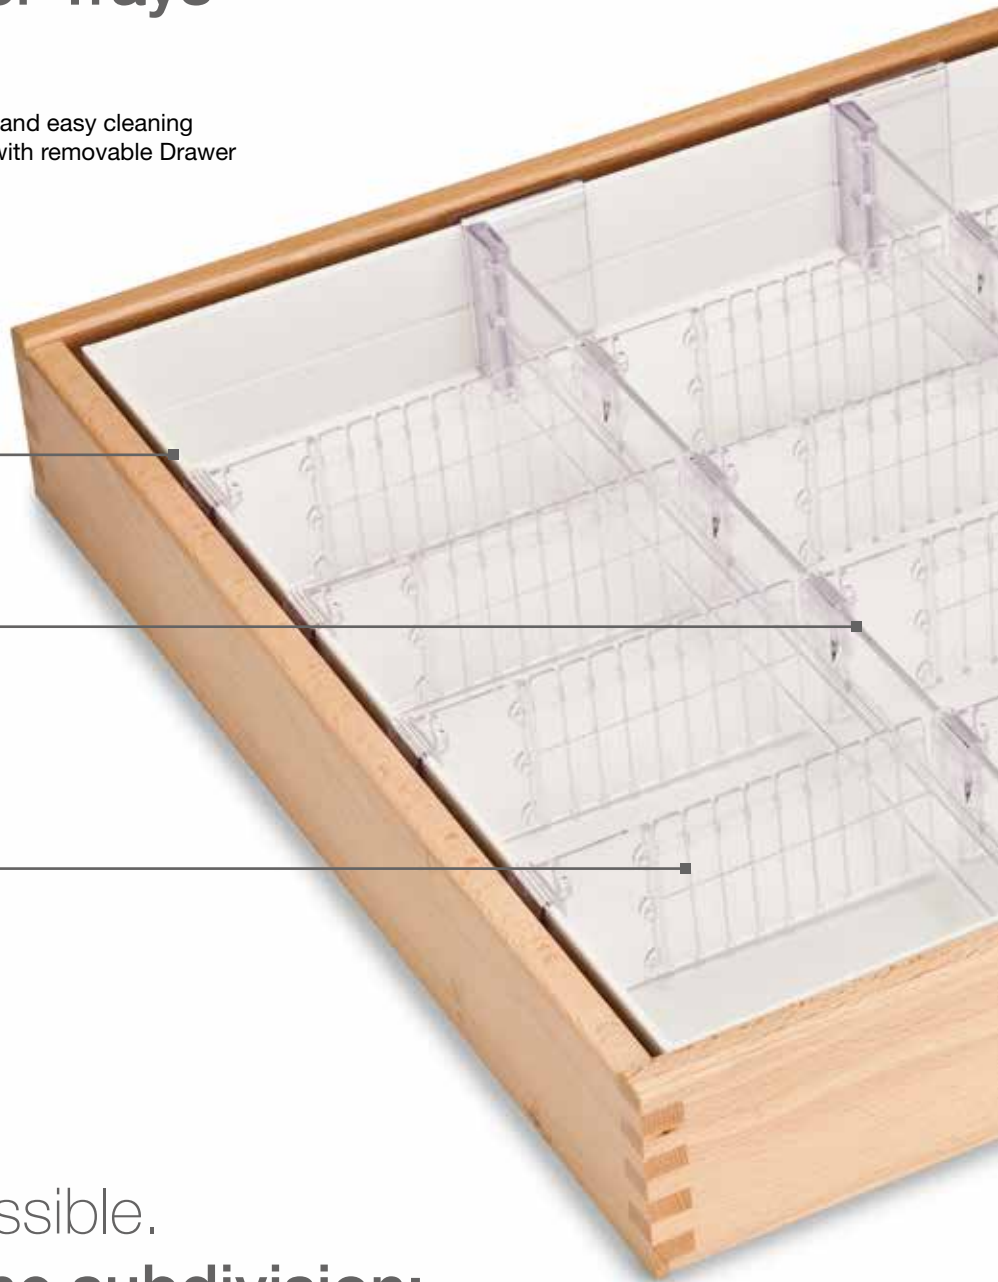

Insert suitably sized tray into the
drawer. H+H SYSTEM custom
builds those trays in all sizes.

Step 2: Dividers to create lanes

Move the lengthwise Dividers to
the desired position.

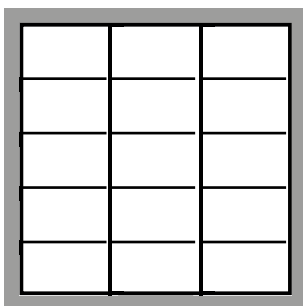

Step 3: Sliding Divider

Adjust to the desired length by
snapping off at one of the prede-
termined breaking points. Optimise
clarity with our labelling system.

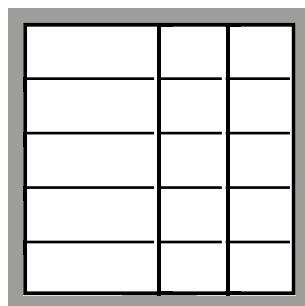

Nothing is impossible.

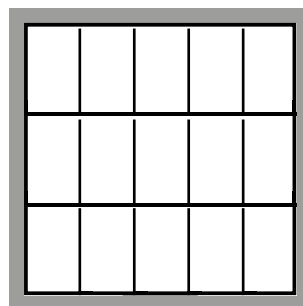

Examples of the subdivision:

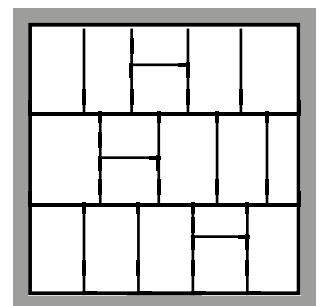

Subdivision lengthwise
3 lanes

Subdivision lengthwise
3 lanes

Subdivision crosswise
3 lanes

Subdivision crosswise
3 lanes

Flexibility and quality of the highest order

A completely removable, custom-built tray provides the ultimate hygienic storage solution. Due to their flexibility, trays ensure lasting order in all drawers.

Maintain hygiene quickly and easily

Given that all trays are easily removable, quick and thorough cleaning is effortless, thus maintaining optimal hygiene. After cleaning, simply return the tray to the drawer and you're done!

Standard system heights

- 35 mm for an interior drawer height from 40 mm
- 45 mm for an interior drawer height from 50 mm
- 55 mm for an interior drawer height from 60 mm
- 100 mm for an interior drawer height from 110 mm
- 125 mm for an interior drawer height from 135 mm
- 150 mm for an interior drawer height from 160 mm
- 200 mm for an interior drawer height from 210 mm
- Made-to-measure heights also available

Additional Storage Solutions

Divider with T-Profil

A cost-effective solution which can be assembled quickly.

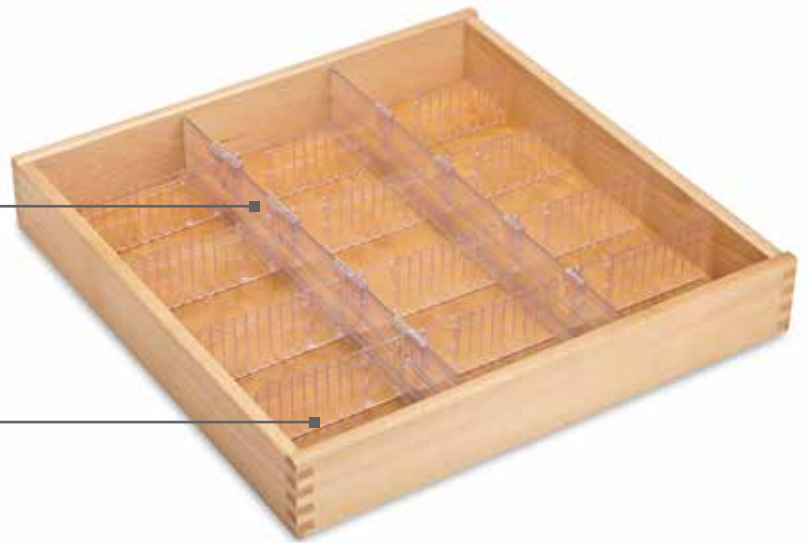

The perfect overview in just two easy steps

Step 1: T-Profil

Define your desired lane width by simply sticking the Divider to the bottom of the drawer.

Step 2: Sliding Divider

Adjust to the desired length by snapping off at one of the predetermined breaking points. Optimise clarity with our labelling system.

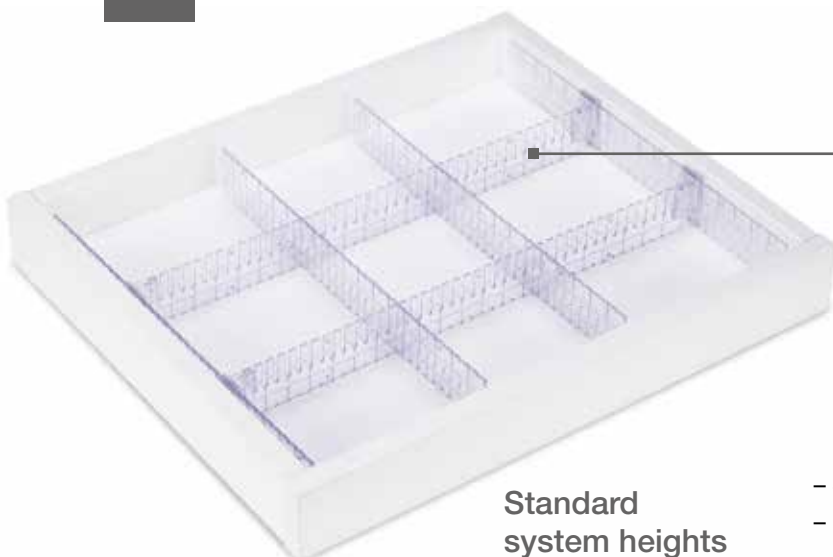

Standard system heights

- 35 mm for an interior drawer height from 40 mm
- 55 mm for an interior drawer height from 60 mm

Subdivision with Cross Recess Divider

FlexRail for longitudinal and cross division

H+H SYSTEM provides you with rails of exactly the desired length which can simply be slotted into one another.

Standard system heights

- 45 mm for an interior drawer height from 60 mm
- 100 mm for an interior drawer height from 110 mm
- 200 mm for an interior drawer height from 210 mm

Perfect clarity with our integrated labelling options

Card Holders for clear labelling

The Integrated Card Holders, located on every Flexible Sliding Divider, ensure maximum clarity in your drawers. Simply label the cards according to the product and replace them when changing the product.

Flexible labelling

Cards can be labelled by hand or printed with the product's bar code for effortless inventory control.

Cards

Card Holders on the drawer fronts guarantee a complete overview of the entire drawer's content.

A perfect match.

H+H SYSTEM's products are designed to fit seamlessly into your workspace.

Integration of inventory management systems

Labels and Card Holders are available in various sizes in order to suit your existing inventory management system.
