Efficient Ribbon Blenders for Precision

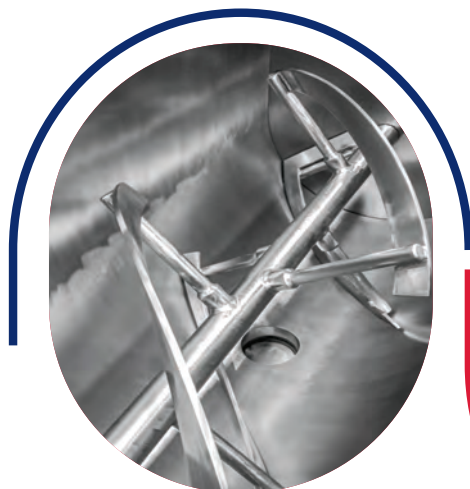

Our U-Trough (UT) mixer is a horizontal mixing machine that is well suited for the efficient blending of free-flowing materials and is considered as the workhorse of the powder mixing industries.

The proven design of Winkworth mixers ensures reliability and longevity. Made in stainless steel and designed to perform for 25 years or more. Features for hygienic mixing, easy maintenance, avoidance of cross contamination and high mix quality are all standard paramount in the UT mixer design.

Winkworth 'U' trough mixers incorporate many innovative features aimed at providing improved ergonomics and easier maintenance.

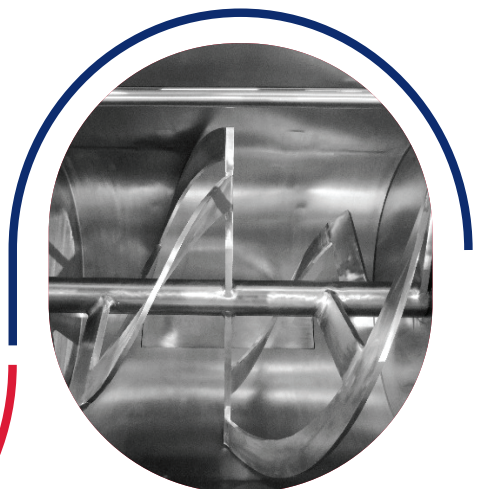

Key Features

- W** 'U' shaped trough for improved access and effective cleaning
- W** Full **stainless steel** construction throughout
- W** Fully welded blade designs
- W** Dust tight lids with quick release closure
- W** Key operated safety interlock systems
- W** All models conform to the "**CE Mark**" European Directives and the "**UKCA**" marking requirements
- W** Compact and space saving 'footprint'
- W** Very quiet running, typically around 75dB (a) or less

Interrupted Spiral Blade
(standard)

Contra Flow Blade

Special Blades
(Available on Request)

Popular Applications

Bath Bombs

Sport Nutrition Powders

Larval Diet

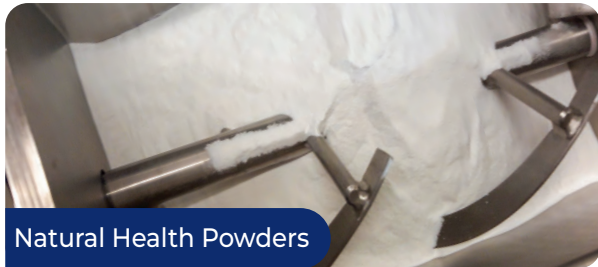

Fertiliser

Plastic Powders

Food Powders

Natural Health Powders

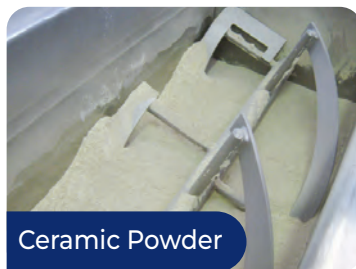

Equine Food Supplements

Granola / Muesli

Vermiculite

Ceramic Powder

Activated Carbon

Muffin Mix

Household Cleaners

Rice and Corn Mix

Spices and Seasonings

Fondant Paste

Butter Melting

Waterproof Sealant

Coffee

Milk Powder

Features / Specifications

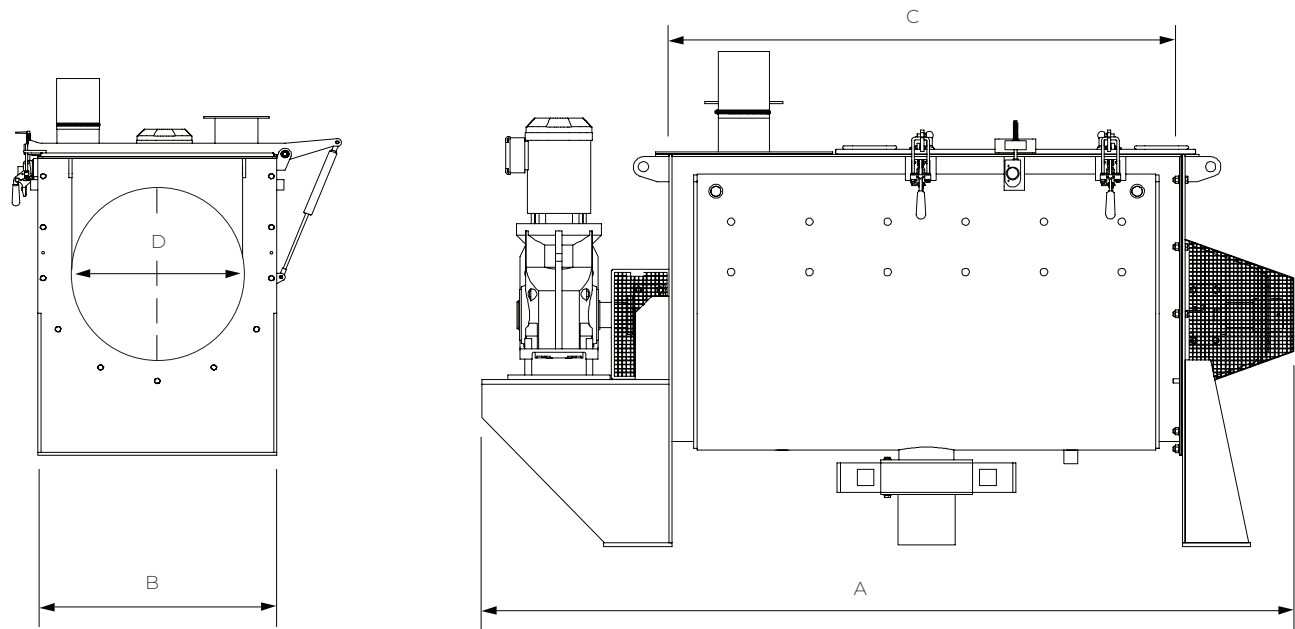

Winkworth tailors each ribbon blender to your unique requirements. The accompanying choice chart, which applies to our entire UT series with working volumes ranging from 25 to 11500 litres, is a guide to help you develop the specification for your machine.

	Standard	Optional
Full stainless steel construction throughout	✓	
Compact drive and control panel solutions	✓	
Dust tight hinged opening lid	✓	
Slide valve outlet	✓	
Interrupted spiral ribbon blade	✓	
Heavy duty models		○
Hardened steels or 316 grade stainless-steel contact parts		○
Heating or cooling jacket		○
Contra-flow spiral or bespoke blade options		○
Vacuum models for drying or de-aerating of the product		○
ATEX certified models for gas / dust zones		○
HMI control panel for recipe control and machine data logging		○
Continuous mixing range		○
Outlets include flush-fit bomb doors, plug valves and butterfly valves. All manual or automated		○
Bespoke lids (Part opening, inlet valve attachments, etc.)		○
High shear refiners		○
Side access hatches		○
Liquid additions / spraying		○

Standard Range

Model	Approx. Capacity (Litres)		Approx. Overall Mixer Dimensions (mm)		Chamber Dimensions (mm)	
	Working	Total	Length (A)	Width (B)	Length (C)	Diameter (D)
