Precision Begins with a Clear View – Clean Optics for Every Mission

*Dirt on your riflescope can mean the difference between success and failure.
How clear is your view really?*

Anyone who goes hunting or serves in the military or law enforcement knows: every detail matters. Dust, grease, or fingerprints on optical surfaces not only obstruct your view, they also reduce precision. Especially in changing weather conditions or with frequent use, thorough, residue-free cleaning is essential.

The Optic Cleaning Set from BALLISTOL, developed in collaboration with Leica Sport Optics, delivers a professional solution for all optical surfaces whether glass or plastic. The combination of a soft cleaning cloth, a professional-grade optics cleaner, and a retractable goat-hair brush with three adjustable bristle stiffness levels) removes even stubborn dirt gently and effectively.

To ensure nothing gets lost or damaged, all components are neatly stored in a durable pouch. The practical case can be easily attached to a belt or to PALS or MOLLE systems, keeping your equipment within reach at all times. Thus, you can restore a clear view in seconds.

Key benefits at a glance:

- Reliably removes dust, grease, oil and fingerprints for crystal-clear visibility
- Three brush firmness levels allow gentle cleaning even for sensitive plastic lenses
- Developed in cooperation with Leica Sport Optics for guaranteed premium quality
- Durable pouch with belt attachment options for easy transport
- Compact kit including cleaner, brush, and cloth

Clear vision is no coincidence, it's the result of meticulous care. How do you ensure your optics are always mission-ready? With this set you have everything you need in one compact pouch, ensuring a clear view for every mission.
